## ARTICLES OF INTEREST

April 26, 2019

### QUOTE(S) OF THE WEEK

“Be brave enough to live life creatively. The creative place where no one else has ever been.” – Alan Alda

“I believe only in art and failure.” – Jane Rule

“A new scientific truth does not triumph by convincing its opponents and making them see the light, but rather because its opponents eventually die, and a new generation grows up that is familiar with it.” – Max Planck

“The more original a discovery, the more obvious it seems afterwards.” – Arthur Koestler

“Part of the scientific temperament is this tolerance for holding multiple hypotheses in mind at the same time.” – David Eagleman

“The essence of architecture is form and space, and light is the essential element to the key to architectural design, probably more important than anything. Technology and materials are secondary.” – I. M. Pei

“They say that each generation inherits from those that have gone before; if this were so there would be no limit to man's improvements or to his power of reaching perfection. But he is very far from receiving intact that storehouse of knowledge which the centuries have piled up before him; he may perfect some inventions, but in others, he lags behind the originators, and a great many inventions have been lost entirely. What he gains on the one hand, he loses on the other.” – Eugène Delacroix

“If people did not sometimes do silly things, nothing intelligent would ever get done.” – Ludwig Wittgenstein

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
