QUOTE(S) OF THE WEEK

“A theory is only as good as its assumptions. If the premises are false, the theory has no real scientific value. The only scientific criterion for judging the validity of a scientific theory is a confrontation with the data of experience.” – Maurice Allais

“The person who knows HOW will always have a job. The person who knows WHY will always be his boss.” – Alanis Morissette

“I tried out various experiments described in treatises on physics and chemistry, and the results were sometimes unexpected. At times, I would be encouraged by a little unhoped-for success; at others, I would be in the deepest despair because of accidents and failures resulting from my inexperience.” – Marie Curie

“Everybody wanted to know what kind of makeup I was taking up—they didn’t care about how well-prepared I was to operate the arm or deploy communication satellites.” – [Sally Ride](#)

“To think is to practice brain chemistry.” – Deepak Chopra

“We can only see a short distance ahead, but we can see plenty there that needs to be done.” – Alan Turing

“A life spent making mistakes is not only more honorable, but more useful than a life spent doing nothing.” – George Bernard Shaw

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
