ARTICLES OF INTEREST

June 25, 2021

The NCN Articles of Interest will be on break next week and will return on Friday, July 9, 2020. Be well!

QUOTE(S) OF THE WEEK

“Don't let anyone rob you of your imagination, your creativity, or your curiosity. It's your place in the world; it's your life. Go on and do all you can with it, and make it the life you want to live.” – Mae Jemison

“Trust your own instinct. Your mistakes might as well be your own, instead of someone else's.” – Billy Wilder

“We can only see a short distance ahead, but we can see plenty there that needs to be done.” – Alan Turing

“After a certain high level of technical skill is achieved, science and art tend to coalesce in esthetics, plasticity, and form. The greatest scientists are always artists as well.” – Albert Einstein

“Well, I play purely from the heart, y'know, and so if it doesn't work the first couple of hours, forget it. Unless we feel like we're somehow on the right track then I'll keep on going. That's it, really; I don't have any magic where I just press a button and it happens. It'll either happen or it won't.” – Jeff Beck

“You know what a champion is? A champion is someone who's ready when the gong rings - not just before, not just after - but when it rings.” – Jack Dempsey

This email is a free service of the **National Creativity Network (NCN)**. The articles are from a variety of sources and, therefore, do not necessarily reflect the views of the NCN. Despite our best efforts, links may fail without warning since each news source posts and archives its articles differently. We apologize for any inconvenience.

Have you found an article you'd like to share? Email the link to george.tzougros@wisconsin.gov.

#

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
