QUOTE(S) OF THE WEEK

“All men dream, but not equally. Those who dream by night in the dusty recesses of their minds wake in the day to find that it was vanity: but the dreamers of the day are dangerous men, for they may act their dream with open eyes, to make it possible.” – T. E. Lawrence

“Nature uses human imagination to lift her work of creation to even higher levels.” – Luigi Pirandello

“Whatever creativity is, it is in part a solution to a problem.” – Brian Aldiss

“The true and best way of learning any Art, is not to see a great many Examples done by another Person, but to possess ones self first of the Principles of it, and then to make them familiar, by exercising ones self in the Practice. For it is Practice alone, that makes a Man perfect in any thing.” – Brook Taylor

“There are no new stories. Everything’s been told. It hasn’t been told from every perspective.” – Carl Reed

“The function, the very serious function of racism is distraction. It keeps you from doing your work. It keeps you explaining, over and over again, your reason for being.” – [Toni Morrison](#)

“We’ve gotten used to having machine intelligence that we can carry around with us. Now we’re going to have to get used to intelligence that has a body and moves around without us.” – [Manuela Veloso](#)

“The quantity of civilization is measured by the quality of imagination.” – Victor Hugo

“I dream, therefore I become.” – Cheryl Renee Grossman

"I think and think for months and years. Ninety-nine times, the conclusion is false. The hundredth time I am right." – Albert Einstein

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
