## ARTICLES OF INTEREST

August 28, 2020

### **NCN Articles of Interest | In Memory of Sir Ken Robinson**

*National Creativity Network*

#### **QUOTE(S) OF THE WEEK**

"Now the problem with standardized tests is that it's based on the mistake that we can simply scale up the education of children like you would scale up making carburetors. And we can't, because human beings are very different from motorcars, and they have feelings about what they do and motivations in doing it, or not." – Sir Ken Robinson

"Don't think. Thinking is the enemy of creativity. It's self-conscious, and anything self-conscious is lousy. You can't try to do things. You simply must do things." – Ray Bradbury

"It is known that Whistler when asked how long it took him to paint one of his "nocturnes" answered: "All of my life." With the same rigor he could have said that all of the centuries that preceded the moment when he painted were necessary. From that correct application of the law of causality it follows that slightest event presupposes the inconceivable universe and, conversely, that the universe needs even the slightest of events." – Jorge Luis Borges

"My main concern with the condition of mathematics in high school is that there's a lot of fear involved! Math is not, generally speaking, presented in a fun way. The concepts, as I see them, are fun, and that's the way I'd like to convey them myself." – Danica McKellar

"It is wise to keep in mind that neither success nor failure is ever final." – Roger Babson

"To see things in the seed, that is genius." – Lao Tzu

"If people never did silly things nothing intelligent would ever get done." – Ludwig Wittgenstein

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
