### QUOTE(S) OF THE WEEK

"We live in a world we ourselves create." – Johann Gottfried Herder

"It is known that Whistler when asked how long it took him to paint one of his "nocturnes" answered: "All of my life." With the same rigor he could have said that all of the centuries that preceded the moment when he painted were necessary. From that correct application of the law of causality it follows that slightest event presupposes the inconceivable universe and, conversely, that the universe needs even the slightest of events." – Jorge Luis Borges

"Instead of insight, maybe all a man gets is strength to wander for a while. Maybe the only gift is a chance to inquire, to know nothing for certain. An inheritance of wonder and nothing more." – William Least Heat-Moon

"Now is the accepted time, not tomorrow, not some more convenient season. It is today that our best work can be done." – W.E.B. Du Bois

"To see things in the seed, that is genius." – Lao Tzu

"If people never did silly things nothing intelligent would ever get done." – Ludwig Wittgenstein

"To stimulate life, leaving it free, however, to unfold itself, that is the first duty of the educator." – Maria Montessori

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
