QUOTE(S) OF THE WEEK

"The reasonable man adapts himself to the world; the unreasonable one persists in trying to adapt the world to himself. Therefore all progress depends on the unreasonable man." - George Bernard Shaw

"The older I get, the more I understand that the only way to say valuable things is to lose your fear of being correct." – Malcolm Gladwell

"Opportunity is missed by most people because it is dressed in overalls and looks like work." – Thomas A. Edison

"There is need for more science in politics and less politics in science." – Richard J. Roberts

"There are many ways of going forward, but only one way of standing still." – Franklin D. Roosevelt

"What I fear most, I think, is the death of the imagination." – Sylvia Plath

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,

- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
