QUOTE(S) OF THE WEEK

“Reading is the key that opens doors to many good things in life. Reading shaped my dreams, and more reading helped me make my dreams come true.” – Ruth Bader Ginsburg

“There is a fountain of youth: it is your mind, your talents, the creativity you bring to your life and the lives of the people you love. When you learn to tap this source, you will have truly defeated age.” – Sophia Loren

“Millions of men have lived to fight, build palaces and boundaries, shape destinies and societies; but the compelling force of all times has been the force of originality and creation profoundly affecting the roots of human spirit.” – Ansel Adams

“Reality is wrong. Dreams are for real.” – Tupac Shakur

“There are a lot of ways that equality or achieving equality is blocked or there are hurdles in people’s way, but designers can help remove those hurdles.” – [Rebecca Johnson](#)

“If a little knowledge is dangerous, where is the man who has so much as to be out of danger?” – Thomas Huxley

“Humility before nature and each other is the key. It’s our arrogance that has gotten us into so much trouble with nature and has created such anger among our fellow humans.” – Ann Druyan

“Poets are almost always wrong about facts. That’s because they are not really interested in facts: only in truth: which is why the truth they speak is so true that even those who hate poets by simple and natural instinct are exalted and terrified by it.” – William Faulkner

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
