## ARTICLES OF INTEREST

October 22, 2021

### QUOTE(S) OF THE WEEK

“To imagine is everything, to know is nothing at all.” – Anatole France

“In my experience, each failure contains the seeds of your next success — if you are willing to learn from it.” – Paul Allen

“Get into your own creativity. Sketch and paint with different mediums and follow your heart.” – Peter Max

“We sometimes talk as if "original research" were a peculiar prerogative of scientists or at least of advanced students. But all thinking is research, and all research is native, original, with him who carries it on, even if everybody else in the world already is sure of what he is still looking for.” – John Dewey

“One does not discover new lands without consenting to lose sight of the shore for a very long time.” – Andre Gide

“It is of the nature of idea to be communicated: written, spoken, done. The idea is like grass, It craves light, likes crowds, thrives on crossbreeding, grows better for being stepped on.” – Ursula K. Le Guin

“People ask me, 'Don't you ever run out of ideas?' Well, on the first place, I don't use ideas. Every time I have an idea, it's too limiting and usually turns out to be a disappointment. But I haven't run out of curiosity.” – Robert Rauschenberg

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access

to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
