

National Creativity Network

ARTICLES OF INTEREST

October is **National Arts and Humanities Month** in the USA.

October 23, 2020

QUOTE(S) OF THE WEEK

“Cubicle slavery is on its last legs. Commodity strategies are by and large bankrupt. Passion and commitment matter most. Creativity wins.” – Tom Peters

“In my experience, each failure contains the seeds of your next success — if you are willing to learn from it.” – Paul Allen

“We sometimes talk as if “original research” were a peculiar prerogative of scientists or at least of advanced students. But all thinking is research, and all research is native, original, with him who carries it on, even if everybody else in the world already is sure of what he is still looking for.” – John Dewey

“It is of the nature of idea to be communicated: written, spoken, done. The idea is like grass, It craves light, likes crowds, thrives on crossbreeding, grows better for being stepped on.” – Ursula K. Le Guin

“The poet, described in ideal perfection, brings the whole soul of man into activity, with the subordination of its faculties to each other according to their relative worth and dignity. He diffuses a tone and spirit of unity, that blends, and (as it were) fuses, each into each, by that synthetic and magical power, to which I would exclusively appropriate the name of Imagination.” – Samuel Taylor Coleridge

“What matters most is that we learn from living.” – Doris Lessing

“In the end, science offers us the only way out of politics. And if we allow science to become politicized, then we are lost. We will enter the Internet version of the dark ages, an era of shifting fears and wild prejudices, transmitted to people who don't know any better.” – Michael Crichton

“Great scientific discoveries have been made by men seeking to verify quite erroneous theories about the nature of things.” – Aldous Huxley

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
