

National Creativity Network

ARTICLES OF INTEREST

October is **National Arts and Humanities Month** in the USA.

October 30, 2020

QUOTE(S) OF THE WEEK

“The chief enemy of creativity is 'good' sense.” – Pablo Picasso

“Where is all the knowledge we lost with information?” – T. S. Eliot

“The greatest discoveries have come from people who have looked at a standard situation and seen it differently.” – Ira Erwin

“We are three-dimensional creatures whose media is mostly stuck on two-dimensional rectangles.” – [Dan Pacheco](#)

“Neither wisdom nor good will is now dominant. Hope lies in dreams, in imagination and in the courage of those who dare to make dreams into reality.” – Jonas Salk

“I do what I feel impelled to do, as an artist would. Scientists function in the same way. I see all these as creative activities, as all part of the process of discovery. Perhaps that's one of the characteristics of what I call the evolvers, any subset of the population who keep things moving in a positive, creative, constructive way, revealing the truth and beauty that exists in life and in nature.” – Jonas Salk

“If the human brain were so simple that we could understand it, we would be so simple that we couldn't.” – Emerson M. Pugh

“The future is not some place we are going to, but one we are creating. The paths are not to be found, but made, and the activity of making them, changes both the maker and the destination.” – John Schaar

“Do not allow your mind to be imprisoned by majority thinking. Remember that the limits of science are not the limits of imagination.” – Patricia Bath

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
