## ARTICLES OF INTEREST

November 15, 2019

### QUOTE(S) OF THE WEEK

“True originality consists not in a new manner but in a new vision.” – Edith Wharton

“We live in a society exquisitely dependent on science and technology, in which hardly anyone knows anything about science and technology.” – Carl Sagan

“A law of nature is not a formula drawn up by a legislator, but a mere summary of the observed facts — a "bundle of facts." Things do not act in a particular way because there is a law, but we state the "law" because they act in that way.” – Joseph McCabe

“Learning is not the same as education, and busy is not the same as productive.” – Seth Godin

“I'm not an environmentalist. I'm a cultural repairman. It's all about efficient and restorative use of resources to make the world secure, prosperous and life-sustaining.” – Amory Lovins

“To mistrust science and deny the validity of scientific method is to resign your job as a human. You'd better go look for work as a plant or wild animal.” – P. J. O'Rourke

“Who in the same given time can produce more than others has vigor; who can produce more and better, has talents; who can produce what none else can, has genius.” – Johann Kaspar Lavater

“I have things in my head that are not like what anyone has taught me — shapes and ideas so near to me — so natural to my way of being and thinking that it hasn't occurred to me to put them down. I decided to start anew, to strip away what I had been taught.” – Georgia O'Keeffe

This email is a free service of the **National Creativity Network (NCN)**. The articles are from a variety of sources and, therefore, do not necessarily reflect the views of the NCN. Despite our best efforts, links may fail without warning since each news source posts and archives its articles differently. We apologize for any inconvenience.

Have you found an article you'd like to share? Email the link to [george.tzougros@wisconsin.gov](mailto:george.tzougros@wisconsin.gov).

# # #

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
