QUOTE(S) OF THE WEEK

“Anxiety is the handmaiden of creativity.” – Chuck Jones

“We worry about what a child will become tomorrow, yet we forget that he is someone today.” – Stacey Tauscher

“A discovery is said to be an accident meeting a prepared mind.” – Albert Szent-Gyorgyi

“The only real mistake is the one from which we learn nothing.” – John Powell

“I believe things cannot make themselves impossible.” – Stephen Hawking

“Thinking begins only when we have come to know that reason, glorified for centuries, is the stiff-necked adversary of thought.” – Martin Heidegger

“The best use of imagination is creativity. The worst use of imagination is anxiety.” – Deepak Chopra

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
