QUOTE(S) OF THE WEEK

"If education is always to be conceived along the same antiquated lines of a mere transmission of knowledge, there is little to be hoped from it in the bettering of man's future." – Maria Montessori

"May your future be limited only by your dreams." – Christa McAuliffe

"The visionary starts with a clean sheet of paper, and re-imagines the world." – Malcolm Gladwell

"Make no little plans; they have no magic to stir men's blood and probably themselves will not be realized. Make big plans; aim high in hope and work, remembering that a noble, logical diagram once recorded will never die, but long after we are gone will be a living thing, asserting itself with ever-growing insistency. Remember that our sons and grandsons are going to do things that would stagger us. Let your watchword be order and your beacon beauty." – Daniel Burnham

"As soon as a true thought has entered our mind, it gives a light which makes us see a crowd of other objects which we have never perceived before." – François-René de Chateaubriand

"As for the usefulness of poetry, its uses are many. It is the deification of reality. It should make our days holy to us. The poet should speak to all men, for a moment, of that other life of theirs that they have smothered and forgotten." – Edith Sitwell

"Art has to move you and design does not, unless it's a good design for a bus." – David Hockney

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
