

Recommended Selling Price

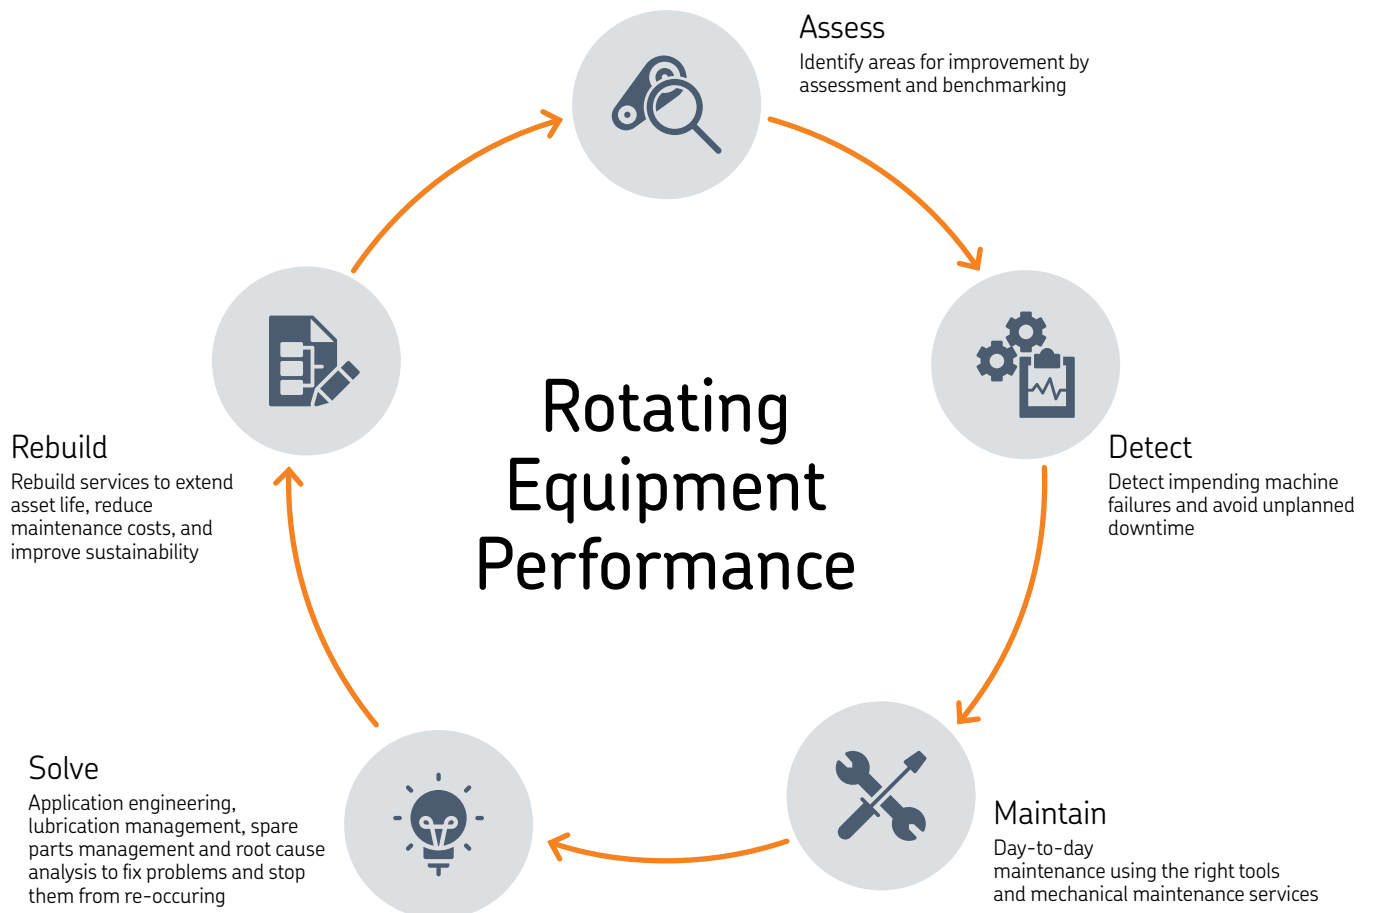

For imported SKF industrial products

EFFECTIVE
FROM
1ST APRIL,
2020

Optimizing your rotating equipment performance

- Improve output
- Trim your Total Cost of Ownership
- Gain new insights into your machinery
- Reduce reliance on scarce talent
- Operate more safely
- Be more sustainable

Ahmedabad plant

Bengaluru plant

Haridwar plant

Global Technical Centre India

Pune plant

Making in India. For India.

SKF started its operations in India in 1923 and today provides industry leading automotive and industrial engineered solutions through its five technology-centric platforms: bearings and units, seals, mechatronics, lubrication solutions and services. Over the years the company has evolved from being a pioneer ball bearing manufacturing company to a knowledge-driven engineering company helping customers achieve

sustainable and competitive business excellence.

SKF's solutions provide sustainable ways for companies across the automotive and industrial sectors to achieve breakthroughs in friction reduction, energy efficiency, and equipment longevity and reliability. With a strong commitment to research-based innovation, SKF India

offers customized value added solutions that integrate all its five technology platforms.

SKF has a pan India footprint consisting of 6 manufacturing facilities, 12 offices, a supplier network of over 300 distributors and an employee base of more than 2600 dedicated professionals.

Our India Distribution Centre is now ready to serve you!

A milestone in our continued journey towards customer centricity

- Increased stock availability
- Online tracking facility
- Faster delivery turnarounds
- Cutting-edge infrastructure
- Error-free support and service
- LEED certified logistics centre

Condition monitoring solutions from SKF

It helps you determining the condition of machinery while in operation to reduce the possibility of catastrophic failure

Power transmission products and solutions from SKF

Helping your business reduce the total cost of ownership in the long-run

Bearings, units and housings from SKF

Expertise in manufacturing virtually every type of ball and roller bearing

Sealing solutions from SKF
Customized for your system performance

Sealing solutions from SKF
Customized for your system performance

Maintenance products from SKF

Help your bearing achieve its maximum service life and increase your plant productivity and efficiency by applying the right maintenance practices and using the correct tools

Lubrication solutions from SKF

Help you realize the true potential of lubrication

SKF Cooper Split Bearings

Designed for today, tomorrow and the years after

New solutions from SKF

SKF SEAL JET DD MACHINE

This is a unique simple CNC "light" machine that produces low volume standard machined seals on demand directly on site.

- High speed, flexibility and customer proximity with low investment
- Satisfy approximately 80% of standard industrial application demands

VIBRACON – machinery mounting chock

SKF Vibracon is a machinery mounting chock that is easily and accurately adjusted. The chock accommodates the angular difference, up to 4°, between machine and the mounting base without expensive machining of the base.

- Eliminates the possibility of a soft foot in the production line
- Saves installation time
- Re-adjustable / re-useable

SKF ball bearing units – UC range

SKF new ball bearing units are especially designed for Asia customers. These are fully interchangeable with Japanese Industrial Standard equipment.

- Higher reliability through secure SKF locking system
- Widely available via the SKF distribution network
- Superior quality and long service life

High performance INSOCOAT bearings

INSOCOAT bearings now upgraded to ensure high performance even in countries with a humid climate.

- Fully interchangeable design
- Stable electrical performance
- Robust during handling, storage and operation

SKF Agri Hub Disc Plough

This cost effective and ready-to-mount solution for Disc Plough applications comes with a robust sealing system to withstand highly contaminated environment and completes the competitive range of SKF Agri Hubs that are ready to mount and are virtually maintenance free

World-class quality for demanding applications

In response to market demand and our commitment towards 'Make in India' SKF launches new range of housing and accessories. The range covers a wide variety of industrial applications, delivering world-class quality and performance that you associate with the SKF brand.

SKF Three-barrier solution

For highly contaminated environments, SKF recommends the SKF Three-barrier solution, as contaminants must pass through three barriers to reach the bearing.

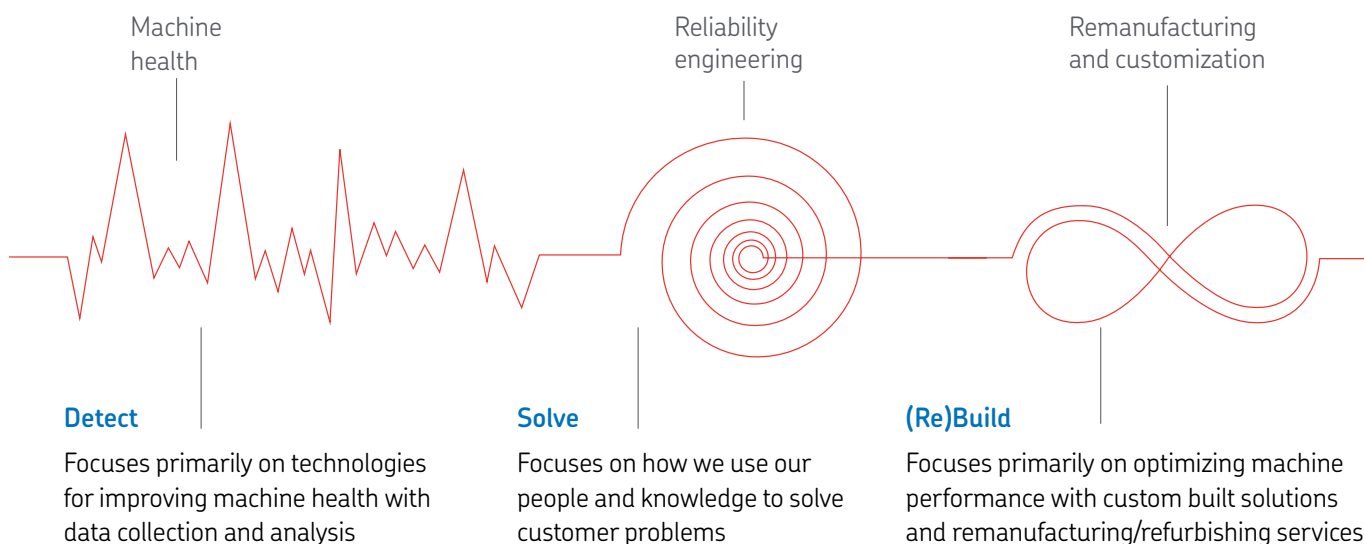

The SKF Three-barrier solution extends bearing service life without the use of large quantities of grease to purge contamination. This SKF solution consists of:

- Sealed SKF Explorer spherical roller bearings
- SKF split block housings
- Standard SKF L or S-type seals for SNL housings and Posi-Trac Plus seals for SAF and SAFD housings
- SKF LGGB2 biodegradable or LGEP2 as the barrier grease

Services and solutions – India

We apply SKF knowledge and services to design, create and deliver custom solutions to even your toughest productivity challenges.

SKF Solution Factories are located at – Pune, Manesar, Jamshedpur and Bengaluru.

Our capabilities:

Spindle repair

SKF offers capabilities for reconditioning and optimization of machine tool spindles with unmatched global support.

Remanufacturing

SKF offers professional capabilities to remanufacture, refurbish, recondition, rework or upgrade of key industrial components and systems.

Remote diagnostic services

Enabling world-class predictive maintenance for any industry, anywhere worldwide

Machine condition data is collected, either with an on-line system or with hand-held devices by skilled personnel – your own, a service partner or by SKF. Certified SKF analysts interpret and report on the data from Remote Diagnostic Centres using the most advanced, cloud-based technology and proprietary SKF signal analysis techniques. These subscription based services provide access to machine data and to expert SKF diagnostics from anywhere, any time.

Key benefits:

Cost savings

Avoid capital investments for hardware and software.

Global access

View reports or actual vibration data plots any time day or night from any location.

Data integrity

Automatic data uploading minimizes human error and establishes consistency and standardization throughout your organization.

Expert analysis

SKF knowledge enables us to apply 100 years of accumulated experience to diagnose collected data and make recommendations for actions.

Make your gearboxes perform like new – or even better!

SKF takes a systems approach to gearbox refurbishment, drawing on our knowledge developed from designing bearing systems for all types of rotating equipment for many OEMs, as well as from our expertise in bearings, gears, seals and lubrication.

SKF gearbox remanufacturing services result in:

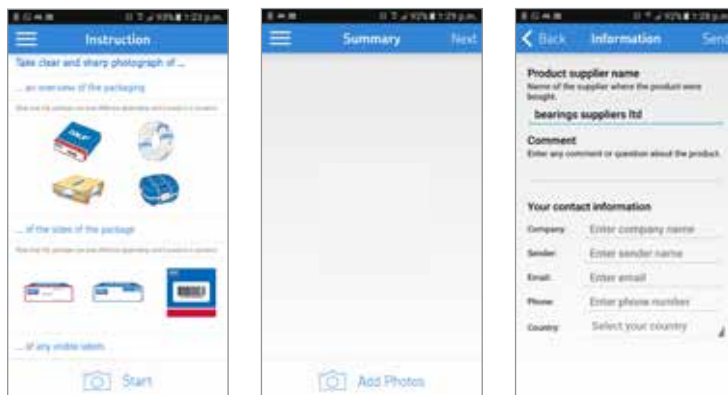

- Increased reliability and availability
- Increased service life
- Upgradation of existing gearboxes
- Reduced life cycle costs
- Improved gearbox performance

Want to authenticate your product?

Do you think that you may have accidentally bought a counterfeit SKF product? The SKF Authenticate app includes clear instructions on how to photograph the product and automatically submit a request, all in one process. Dedicated SKF experts then review the information, authenticate the product and reply through email.

The SKF Authenticate app is available for free on Apple App Store or Google Play. Scan the QR-code below for download options.

If you have any questions, contact SKF at genuine@skf.com

Plain bearings

Tough job?

Get a tough bearing.

New upgraded SKF Explorer self-aligning roller bearings can provide up to twice the service life as the original under tough operating conditions

Combining clean and homogenous high-quality steel with an improved heat treatment, new upgraded SKF Explorer bearings have a superior balance between hardness and toughness. This advancement gives upgraded SKF Explorer self-aligning roller bearings a higher degree of wear resistance, enabling as much as twice the service life as the original, in applications where there are high levels of contamination or poor lubrication conditions.

All standard SKF spherical roller bearings, CARB toroidal bearings and most spherical roller thrust bearings have now been upgraded to the SKF Explorer performance class.

For more information on the product and actual test results, download the brochure from www.skf.com/upgrade.

Note: ■ Domestically available, subject to availability.

Y– bearings and Y–bearing units

Except for the cage and seals, SKF Y-bearings (ball bearings) for high temperatures correspond in design to standard Y-bearings with grub screws in the YAR 2-2F series. The bearings have a shield and a flinger on both sides to prevent the ingress of solid contaminants into the bearing. The radial internal clearance is a multiple of C5 to prevent the bearings from seizing, even when they cool rapidly.

The entire surface of the bearing and the shields and flingers are manganese phosphated to enhance adhesion of the lubricant to the metal, thus improving the running-in properties of the bearing.

Y-bearings and Y-bearing units

Seals for general industrial applications

Fluid power sealing systems

Sealing solutions

Being the world's only bearing company with seal manufacturing capabilities, SKF supplies a wide range of sealing solutions for rotating, reciprocating and static applications to industries worldwide. Innovative SKF sealing solutions help customers to increase productivity and process reliability as well as to reduce Total Cost of Ownership.

Based on extensive knowledge and experience in material technology, design and manufacturing processes, SKF offers standard seals and custom engineered sealing solutions in a broad range of elastomers, thermoplastics and thermoplastic elastomers. Our dedicated local teams of experts are there to solve your challenging application demands.

For more information about SKF sealing solutions, please contact your local SKF representative, or visit www.skf.com/seals.

V-ring seals

Large diameter seals

Sealing solutions

Machined seals

SKF is the global market and technology leader in high quality custom engineered sealing solutions offering a comprehensive range of machined seals for many industries.

The innovative production system - SKF SEALJET - reduces manufacturing and dispatch time to a minimum. Virtually any kind of seal for any conceivable application, in any dimension and design, can be produced.

SKF offers machined sealing solutions for fluid power, fluid handling and power transmission applications including special large diameter seals with a virtually unlimited diameter range.

Oil seals

The demand for increased speeds, higher operating temperatures and synthetic lubricants with aggressive additives increase the stress on oil and grease seals. SKF seals deliver unparalleled performance over a wide range of operating conditions for most demanding applications.

Speedi-Sleeve

Over time, contaminants and conditions can cause particles to become trapped inside a lip seal. Particles then form wear grooves on the shaft, eventually leading to seal failure and severe shaft damage. Repairs are expensive, time-consuming and too often, ineffective. With an SKF Speedi-Sleeve, they are unnecessary.

SEALING SOLUTIONS CUSTOMIZED FOR YOUR SYSTEM PERFORMANCE

Speed-Sleeves

SKF offers expert advice and provides support throughout the life cycle of your sealing system.

Power transmission products

From the brand you trust.

Along with linking mechanical moving components, power transmission products play an important role in overall bearing performance. Backed by deep SKF knowledge about the interplay between bearings and transmissions,

SKF Power transmission products can help customers improve machine maintenance and performance.

SKF Power transmission is a product line that provides a complete range of high quality belts, chains, couplings, pulleys, sprockets, bushings and hubs. Required in virtually every industry, power transmission components enable processes to run by connecting moving parts in machinery.

For more information about SKF Power transmission products, contact your local SKF representative, or visit www.skfptp.com.
