Re: 2010-2011 Level 1 Reserve Management Plan

Dear Mr. Jones

We are pleased to submit this Level 1 Reserve Management Plan for the Windemere Townhome Association.

If you have any questions about this Plan, please contact us at the phone numbers listed below. We look forward to doing business with you in the future.

Sincerely,

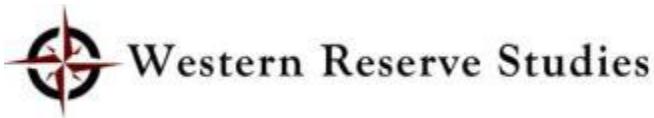

Steve Bennington (970) 819-3194

Chris Hart (970) 819-2935

Windemere Townhome Association Reserve Management Plan Summary

The following Level I (full update with-site-visit) reserve study was performed for Windemere Townhome Association ("property") located at 1541 Camino Real, San Diego, CA, 92019. The property has 237 units and 4 different model types. The reserve study is for the fiscal year starting July 1, 2010, and ending June 30, 2011.

The purpose of this reserve study is to produce a reserve funding plan that will project future contributions and expenditures to assure that reserve funds are available as needed.

The calculations, projections and reports in this reserve study were generated using the PRA System (PRA). PRA has received a Quality Assurance Evaluation from a Certified Public Accounting firm verifying the system for accuracy and compliance with the AICPA's Audit and Accounting Guide for Common Interest Reality Associations, cash flow projections, and tax calculations consistent with IRS guidelines for 1120c and 1120h corporations. PRA provides for complete, flexible reserve study assumptions while allowing for either current cost or future cost projections while calculating interest and projecting cash flows on a monthly and annual basis.

As of July 1, 2010, the estimated reserve fund balance is \$1,500,000. The estimated current replacement cost of the reserve items is \$5,683,343, and with an annual compounded inflation rate of 3.00% the future replacement cost is \$8,251,330.

The cash flow method was utilized in preparing the reserve plan with the objective that reserves funds would be available as needed. The following describes how the cash flow was produced:

- Reserve Fund Balance – projected from the date of the reserve study to the beginning of the fiscal year above;
- Reserve Item Data - for each reserve item the following was determined: description, category, basis cost, cost, quantity, estimated useful life and estimated remaining life;
- Expenditures - the reserve item data above was used to project when the initial and recurring expenditures will be incurred over the next 30 years (includes taxes on interest earned);
- Interest – calculated on the available funds;
- Contribution – determined based on the following: annual contribution increases, interest earned with related taxes and inflation on reserve items.

No items have been reserved for which have an estimated useful life of less than two years or a total cost less than \$500.00.

Based upon the following financial assumptions:

- Annual Contribution Increase - 2.00%
- Interest Earned - 3.00%
- Taxes on Interest Earned - 25.00%
- Inflation on Reserve Items - 3.00%
- Contingency - 3.00%
- Contingency Time - 30:00 Yr:Mo

The contingency amount is 3.00% of the current cost of replacement, \$5,683,343. This amount will be funded over 30:00 (years:months) time period. This will increase the total monthly contribution by \$0.

The required reserve amount at the end of the current fiscal year utilizing the cash flow method is \$1,500,000. The reserve plan, based on all the assumptions, assures that funds for major repairs and replacement will be available when needed and that this method is equitable for charging current rather than future owners with the cost of current use.

The annual contribution for the initial year of this reserve study is \$386,016, \$32,168 on a monthly basis and on an average of \$135 per unit. The monthly contribution per unit type is:

Model	Operations	Reserves	Total
A		\$111	
B		\$125	
C		\$139	
D		\$167	

The average interest rate earned before and after taxes for the initial of this reserve study are 3.17%, and 2.38%, respectively.

Based upon Percent Funding, as of July 1, 2010, with an estimated reserve fund balance of \$1,500,000, 100% Funded being \$3,718,256, the percent funded amount is 40.34%. If the cash flow funding plan is adhered to by the board of directors, sufficient funds should be available as needed.

If applicable, developer records, association records, and industry manuals were used for determining the current cost of reserve items. The financial representations set forth in this summary are based on the best estimates of the preparer at that time. The estimates are subject to change.

Project Description

General Description: The Windemere Townhome Association consists of thirty seven (37) buildings constructed in 10 phases with four models. There are two hundred thirty seven (237) townhome units, as identified in the declarations. The structures are of wood construction, built-up membrane roofs and stucco exterior walls. For purposes of identification the buildings are referred to throughout this report as unit buildings.

The units are in multiple buildings two stories in height. Units are accessed from grade level entrances. Each unit has one, two car garage.

General Findings: The first phase of the Windemere Townhome Association property was originally constructed in 1981. Many of the exterior building components appear to be new to the original structure and appear to be in good to fair condition.

The overall condition of the facility is considered *good*. Components which have been replaced and maintained over the life of the buildings are generally in *good* condition.

Most components which date to the original construction are beyond the end of their useful life (UL) and are considered to be in *fair* condition, unless otherwise noted.

At thirty years of age most building systems are approaching or past the end of their life expectancy. Components which may generally be considered to have a UL greater than thirty years will in most cases require replacement within the thirty year period covered in this reserve study.

As all buildings age the level of maintenance can be expected to increase if the facilities are to be maintained in optimum condition. Maintenance recommendations which may be made throughout this report are based on generally accepted industry practices for maintaining residential buildings after taking into account the age and current condition of the various building components.

Per management, historically the Windemere Townhome Association has funded major renovation year ending balance shortfalls with excess operating cash balances, short term loans or special assessments.

Components which do not have a readily identifiable useful life, and therefore are not generally included in long range reserve funding schedules include:

- Foundation systems
- Structural components
- Water supply & waste piping
- Electrical switchgear & branch wiring

Item Parameters Reports - Introduction

These Item Parameters reports follow this cover page:

[Item Parameters - Summary](#)

[Item Parameters - Category - Chart](#)

[Item Parameters - Full Detail Reports](#)

The Item Parameters - Summary report is a listing of all the components/assets which form the basis for this reserve study. This report includes the following information for each component:

Basis Cost (the cost per 1 component per line item)

Quantity (number of components per line item)

Service Date (the date the component was last maintained/replaced)

Current Cost (basis cost times quantity)

Estimated Life (estimated life of component as of service date)

Adjusted Life (estimated life adjusted to more realistic total life of component)

Remaining Life (remaining life of component as of analysis date)

Future Cost (the future cost at end of Remaining Life adjusted for inflation rate)

Straight Line Allocation (Future Cost divided by Adjusted Life years)

100% Funded (amount in reserve account based on number of years/months transpired since Service Date)

The Item Parameter - Category - Chart graphically shows the current replacement cost for each category of components. The total replacement cost per category is shown on the preceding report, Item Parameters - Summary.

Item parameters - Full Detail Reports - Introduction

In this sample reserve study, not all assets/components are shown on the following six pages. The following sample assets are included:

Appliances

Balcony Decks

Built-Up Roofs

Carpeting

Typically, there are one or two report pages for each asset. Photos of the asset/component are included on the reports plus measurement date and a description of the overall condition of the item.

Comments

In an actual reserve study, notes are added to this area concerning overall condition of the appliances, the remaining life and the size of the units. This example shows 20 appliances which have to be replaced within 4 - 5 years. The association may want to cycle the replacement of the appliances over a 3 or 4 year period. This strategy can be accurately projected and all applicable reports adjusted.

Windemere Townhome Association

Analysis Date - July 1, 2010

Inflation:3.00% Investment:3.00% Contribution Factor:0.00% Calc:Future

There are 237 balcony decks and rails on the property. The replacement of the decks and rails will start in 2011 with 7.9 replaced every year for the next 30 years. The estimated unit cost is \$1,100 per deck. The condition of the decks ranges from fair to excellent, depending upon the construction phase.

The built-up roofing systems are on a schedule to be replaced every 20 years. All roofs should be inspected annually and needed maintenance performed in order to maintain a 20 year life. If deferred maintenance is allowed, the estimated useful life of the roofs could be shortened. The replacement schedule is from 2010 to 2028.

Comments

The carpet was installed in July, 2005, with an estimated live of 8 years. There are 3 years remaining. The condition of the carpet is fair to good. It doesn't appear the replacement date will have to moved up due to the current condition of the carpet.

Percent Funded Reports - Introduction

These Percent Funded reports follow this cover page:

Percent Funded - Annual

Percent Funded - Allocation

Percent Funded - Annual - Chart

The Percent Funded - Annual report shows the annual percent level of funding for the next 30 years. The percent funded is determined by dividing the beginning balance in the reserve account by the 100% funded balance. The following information is provided in the report:

100% Funded: To attain a 100% level of funding, please note the following example: If a component has a 10 year life with a replacement value of \$10,000, an association must have \$4,000 set aside at the end of 4 years ($\$10,000 \text{ divided by } 10 \text{ years} = \$1,000 \text{ times } 4 \text{ years} = \$4,000$). The \$4,000 represents 100% funding at the end of 4 years.

Beginning Balance: The beginning balance in the reserve account for each year.

Percent Funded: This is calculated by dividing the beginning balance by the 100% funded balance.

Contribution: The amount of member contributions/assessments for each year of the reserve study.

Interest: Income generated from reserve account investments.

Expenditure: The annual cost of expenditures for asset replacement and major maintenance for each year of the study.

The Percent Funded - Allocation report is analysis of the percent funded per each component in the reserve study. It shows the level of contributions/assessments for the year, interest earned on investments, and component replacement/major repair for the year.

Percent Funded - Annual - Chart graphically shows the contributions plus interest for a ten year period, expenditures for each year, the projected balance in the reserve account for each reporting period, and the 100% funded balance for comparison.

Reserve Study Funding Options

There are four funding plans for associations to consider for their reserve studies. They are as follows:

- Full Funding: This is a goal of an association to keep reserve account balances at 100% funded. For example, if an association with an estimated useful life of 10 years and a replacement value of \$10,000, the association must have \$5,000 on account at the end of year 5 in order to be fully (100%) funded (\$10,000 divided by 10 years = \$1,000 per year times 5 years = \$5,000). \$5,000 on account after 5 years, in this situation, equals full funding. This system is referred to as the "pay as you go" option.
- Threshold Funding: An association may opt to maintain a certain level of reserve account funding to pay for future asset replacement. This is called threshold funding and is based upon a pre-determined amount in the reserve accounts. This amount becomes the minimum amount to be held on account.
- Baseline Funding: The goal of an association is to keep the reserve balances above zero. The reserve balance does not drop below zero during the reserve study during the projected period of the study, usually 30 to 40 years. If the remaining life of an asset is reduced, the association may be faced with the uncomfortable options of either borrowing funds or implementing a special assessment to pay for the asset replacement. Under this scenario, an association may need a reserve study prepared annually.
- Statutory Funding: Some states may have laws which dictate the level of funding for reserve accounts. This, obviously, becomes the minimal level of funding.

Cash Flow Reports - Introduction

These Cash Flow reports follow this cover page:

[Cash Flow - Annual](#)

[Cash Flow - Monthly](#)

[Cash Flow - Chart](#)

The Cash Flow - Annual report summarizes the annual cash flow for the Association beginning July 1, 2010 through September 30, 2040. The report shows the beginning reserve account balance for each period, the member contributions/assessments for each period, the interest earned on investments, projected expenditures (asset replacement and major maintenance), and the ending balance for each year.

The Cash Flow - Monthly report is a monthly summary of the cash flow for fiscal years 2010 and 2011. The same information shown on the annual report is listed on the Cash Flow - Monthly report.

The Cash Flow - Chart compares the total annual contributions/assessments plus interest earned to the total expenditures for asset replacement and to the total balance in the reserve account.

Cash Flow - Chart

Expenditures Reports - Introduction

These Expenditures reports follow this cover page:

Expenditures - Category/Description

Expenditures - Monthly Beginning July 1, 2010 through Expenditures - Monthly Beginning July 1, 2019

The Expenditures - Category/Description report lists the projected expenditures for asset replacement/major repairs by year for the next 30 years. The Expenditures - Items 2010 through Expenditures - Items 2019 reports show the following information:

Service Date (Date asset last replaced/repaired)

Estimated Life (The number of years asset will last before replacement)

Future Cost (The cost of major maintenance or replacement amount based on the assumed inflation rate for this report)

Salvage Value (The estimated value that an asset will realize upon its sale at the end of its useful life)

Phases & Models Contributions Allocation - Introduction

The governing documents of homeowner associations determine the basis for the monthly/annual contribution/assessment for each owner. The Windemere Townhome Association allocates the total assessments due on a square footage basis to the owners. In the Windemere Townhome Association development there are four different sizes of models, ranging in size from 1,600 square feet to 2,400 square feet. Although this development of 237 units was constructed in 10 phases, there are just four models.

Two reports following this intro page which show the calculations of the monthly contributions. They are as follows:

Phases Units & Models

Model Allocation

The Phases Units & Models report shows a breakdown of the A, B, C, and D models in each of the 10 phases.

The Model Allocation report is an analysis of the number of units in each model, the square footage of each of the four models, the total square footage in each model category, the percent square footage to the total square footage in the development, and the monthly contribution by model and individual owner of the unit within a certain model.

Cash Management Reports - Introduction

These Cash Management reports follow this cover page:

Cash Management - Account Data

Cash Management - Funds Availability

Cash Management - Average Interest Rate Earned

Cash Management - Interest Earned/Accrued

This Reserve Management Plan contains a cash management module which is designed to track the portfolio of investments in the reserve fund. Each investment can be tracked separately with projected interest rates as approved by the Windemere Townhome Association Board of Directors. The interest earned on each investment is calculated on a monthly basis, and the total interest received for each month is then reflected for that month in the monthly cash flow.

The Primary Account is a "catch-all" account. The beginning cash balance in the reserve is initially entered into the Primary Account. As additional investments are added (with balances as of the beginning date of the reserve study) into Cash Management, the principal amounts of these investments are deducted from the primary Account. Additional investments can be added in the future with available funds and will be deducted from the Primary Account as of that date of investment.

The attached Cash Management reports are useful tools for investing available funds into longer term investments which could have higher returns on investment than short term, Primary Account, funds.

Every Association should develop an investment policy to maximize the safe return on investment for all reserve study investment assets. Associations should establish a general investment goals and objectives, investment strategy, specific investment securities to be included in the portfolio, and review procedures.

Supplemental Accountants Reports - Introduction

These Accountants Reports follow this cover page:

Supplementary Information on Future Major Repairs and Replacements - Categories

Supplementary Information on Future Major Repairs and Replacements - Items

The Accountants Reports listed above meet AICPA Guidelines for compilations, reviews and audits for Common Interest Realty Associations. The reserve study software (Property Reserve Analysis reserve study software developed by Advanced World Concepts, Inc.) used by Western Reserve Studies for the Windemere Townhome Association includes a Quality Assurance Evaluation from a Certified Public Accounting Firm verifying the system for accuracy and compliance with the AICPA's Audit and Accounting Guide for Common Interest Realty Associations, cash flow projections, and tax calculations, consistent with IRS guidelines for 1120c and 1120h corporation tax returns. The software provides for complete, flexible reserve study assumptions while allowing for either current cost or future cost projections while calculating interest and projecting cash flows on a monthly and annual basis.

These reports contain the following information:

Estimated Remaining Useful Lives (in years and months)

Estimated Future Replacement Cost

2010 Funding Requirement (represents a projected allocation of the projected contribution of assessments and interest for the year)

Components of Fund Balance at the End of the Reporting Year (an allocation of the total reserve funds as of the year end to each listed component in the report)

Windemere Townhome Association

Windemere Townhome Association Reserve Management Plan Limitations and Disclosures

Western Reserve Studies has no control over future events and we do not claim that all the events we anticipate will occur as planned. We expect that inflationary trends will continue and we expect deposits into savings accounts will continue to earn interest from the institutions in which the deposit is made.

We do however take great care in the areas we can control; such as listed common assets, measurements and all information received from the association or management company. The information acquired from the association and/or management includes but is not limited to; reserve contributions, current reserve balance, reserve interest earnings. Other information we may have requested depends on the specific property and the goals the association is trying to achieve. All information asked for and provided to Western Reserve Studies by the association and/or management is assumed correct and up to date and is not verified by Western Reserve Studies.

The purpose of a reserve management plan is to assist the association, management or developer in predicting as accurately as possible, all cost for future replacement or refurbishment of the common area elements, interior and exterior. With this in mind it is important to understand the ongoing aging process of these elements and the ever changing financial situation of the association on a yearly basis and that a reserve management plan is considered and intended to be a one year document.

The Reserve Management Plan is designed to be a document intended for weekly or monthly use. This document should be updated on an annual basis with a new Level I study completed every 3 to 5 years.

No invasive or destructive testing has been employed in the investigative phase of this study and no environmental assessment of any kind was performed. This Reserve Management Plan is not intended to address or discover construction defects and no representation is made herein that is meant to imply any such warranty.

The statements contained in this Reserve Management Plan are true and correct to the best of our knowledge and belief.

Useful life and remaining useful life estimates are based on industry standards, not on engineering or architectural inspections of the property.

A preventative maintenance program is recommended to obtain the maximum useful life of the components listed in this Reserve Management Plan and is a pro-active approach to the management of these assets. Western Reserve Studies also recommends that when applicable a licensed professional contractor is obtained for specialty work such as but not limited to high voltage electrical maintenance or repairs.

Information regarding association financial parameters have been provided by representatives of the association and **is assumed to be accurate** for the purposes of this report. This Reserve Management Plan is a reflection of information provided to us by third parties and cannot be used for the purpose of performing an audit, forensic analysis or verification of historical records.

Information regarding the reserve fund beginning balance has been obtained from association representatives. The information is deemed reliable and is not based on an audit of the association's financial condition and should not be used for purposes other than those intended in this study.

This Reserve Management Plan was prepared in accordance with nationally recognized guidelines for the preparation of reserve studies for common interest developments, established by the Community Associations Institute (CAI); and the rules set forth in the Audit & Accounting Guide Common Interest Realty Associations (May 1st 2008) published by the American Institute of Certified Public Accountants (AICPA), for maintaining a fund for future major repairs and replacements.
