

A safe, effective and convenient countermeasure against many lipid enveloped viruses and bacterial pathogens

EcoProven Anti-Viral Mouth Wash is a safe, effective and convenient preventative measure against many lipid enveloped viruses such as the SARS-CoV-2 virus, that causes COVID-19, as well as some bacteria. The EcoProven technology turns nature's most common solvent (water) into a powerful virucide. The formula is a proprietary blend of plant-based and all natural ingredients (ionic and anionic compounds) that laboratory testing has confirmed is effective at penetrating the fatty lipid structure that surrounds and protects lipid enveloped viruses.

EcoProven helps prevent initial infection of the SARS-CoV-2 virus in the upper respiratory tract. As a spray application or mouth rinse, EcoProven covers the inside surface of the mouth and throat and acts quickly to neutralize the virus before it can embed itself and migrate deeper into the lungs.

EcoProven Anti-Viral Mouth Spray / Rinse is also helpful in mitigating early stage infections and reducing symptoms. For individuals who have tested positive, the product helps to interrupt the on-set of COVID -19 symptoms. For individuals who are actively presenting symptoms, the product helps to stall the progression of the illness.

EcoProven can stay active for hours - sustained by the presence of moisture (water) in the mouth and upper respiratory tract. EcoProven as a mouth spray or rinse is a very effective defence against COVID-19 infections as well as many other viral illnesses and helps reduce the spread of viruses to others.

Physical Properties

Physical State:	Liquid at 70 F	pH:	10.4 NEAT (in concentrate)
Color:	Clear	Foaming:	Extremely low foaming
Odor:	Odorless till flavoured	Viscosity:	@20c > 225 - 375 (290 avg) cps
Taste:	Option for final product	Pounds per gallon:	8.52
Flashpoint:	None at 212 F	Specific Gravity:	1.029
Freezing Point:	32 F	Effective Period:	As long as water is present

EPA Company ID#: **97213** EPA Facility ID #: **2935261** FDA/CDC Product #: **pending**

How EcoProven Destroys Lipid Enveloped Viruses

EcoProven's technology combines with the moisture in your mouth and upper respiratory tract to become a hyperactive colloidal water solution. This solution contains countless microscopic ionic particles which discharge electrical charges in all directions. The virus body is "caught in the crossfire" of these ionic charges and the protective outer lipid membrane of the virus is shredded. Any virus that is in contact with EcoProven's powerful colloidal action is destroyed.

Once this outer protective layer is destroyed, the inner RNA is exposed and the combination of the colloidal action and antimicrobial surfactants quickly destroys the virus's RNA core as well.

Testing & Certifications

- Certified Effectiveness Against the SARS-CoV-2 Virus - Endolytics (2021)
- Certified Effectiveness Against Streptococcus pyrogens, Streptococcus mutans, E. Coli - Accugen (2021)
- Certified Safe for Human Use - Endolytics Toxicology Testing (2021)
- Internal Testing has demonstrated Effectiveness Against H1N1 as well as Gram Negative Bacteria

Protect from temperatures below 32 F and above 90 F
No special handling / storage procedures are needed
