What is NTSAD?

NATIONAL TAY-SACHS & ALLIED DISEASES Association
How do they help Tay-Sachs patients

Each year NTSAD connects families through their Family Services Program. They fund Research on all levels and facilitates the steps toward clinical trials and educates families and the public to promote building healthy families through screening. Supports nearly 750 families by providing services, resources and compassionate support to the affected families of these horrific diseases.

Without treatment, Jaxson will suffer not only from muscle weakness, lack of coordination, swallowing difficulty, seizures, loss of the ability to communicate, and incontinence, but also the ability to see, walk, and eat by mouth.

THANK YOU ALL FOR YOUR SUPPORT!
