CASE STUDY

Project: Newbery Steps, Cricket Pavilion

Scope: First and second fix carpentry, reusing 20% of existing materials

Skills & Highlights:

- Mastery of complex carpentry, including curved roof design
- Effective labor scaling and resource management
- Proactive project management to meet tight deadlines
- High-quality craftsmanship and seamless collaboration

Challenge & Solution:

The project involved a challenging curved roof design and the need to reuse 20% of the existing materials. With early site delays leading to a tight timeline, Carpentree UK responded by scaling up our team and working efficiently to maintain quality. Our proactive approach ensured the curved roof was completed flawlessly and all carpentry tasks were executed to the highest standard despite the time constraints.

TESTIMONIALS

Wolf Developments Ltd

"Exemplary Service. What you see is what you get. We were introduced via recommendation and what a recommendation it was. Carpentree constructed for us a timber frame 3 bed chalet bungalow and garage (first and second fix). From first meeting George the owner he came across as very genuine and had a clear zest for his trade as well as having an all round great knowledge of general building; these attributes were proven throughout the course of the project and were also visible throughout the rest of the Carpentree team. A-Z they were fantastic. Highly recommended, whatever your carpentry needs. A cut above!"

Adam Looker

"We recently used Carpentree UK during the construction of our office building, and they were amazing. During the design phase, they came up with an innovative way to use the available space, maximizing our footprint while making the interior as usable as possible. Their team managed the project perfectly, ensuring it was completed to a very high standard and delivered on time. Their professionalism, attention to detail, and commitment to quality were evident throughout the entire process. We couldn't be happier with the outcome. Highly recommend Carpentree UK for any and all carpentry."

Planting Trees to Help Our Planet

At Carpentree UK, we are committed to mitigating the carbon emissions generated by our work and daily activities. After exploring various options, we have partnered with Ecologi, a platform dedicated to funding carbon offset projects and tree planting worldwide.

SUSTAINABILITY

What does this mean for our customers?

With every project, we plant a number of trees. By collaborating with us, you are directly making a positive impact on our planet's environment. This not only helps offset carbon emissions and restore natural habitats but also enhances community well-being and promotes environmental sustainability.

Join us in making a positive impact on the environment by choosing Carpentree UK for your next project.
