Sect / Treasurer	Judy Paddock

# APPLE NEWS

As promised, Apple released the new Mac Pro and Pro Display XDR last week, complete with astonishing specs and eye-watering prices.

The starting price for the Mac Pro is \$5999, and fully maxed out, it's nearly \$53,000. (That's not even accounting for the rack-mount version coming soon that costs \$1500 more or the 8 TB SSD option that's not available yet.) The Pro Display XDR starts at \$4999, but with nano-texture glass and a Pro Stand, it's almost \$7000

iOS 13.3 for HomePod.As

## Amazon's Alexa can now play Apple Podcasts on Echo devices

The whole of Apple's Podcasts library is now available on Amazon Echo devices and can be played by asking Alexa for particular shows or episodes.

## Apple avoids iPhone, iPad and Mac tariff as US and China strike trade deal

Fears of a pending iPhone import tax were assuaged on Thursday as President Trump signed a limited trade deal with China that draws back existing tariffs and cancels a new round of levies set to go into effect on Sunday.

## Malwarebytes: Mac threat detections are increasing, but it's a nuanced situation

Chance Miller - Dec. 16th 2019 3:06 pm PT

Malwarebytes has **published** a new study that suggests threat detection levels for macOS are increasing in comparison to Windows. The data shows that overall, Mac threats accounted for more than 16% of total Malwarebytes detections.
