

I am a family nurse practitioner returning to school to complete the Psych NP program. I had such difficulty finding a preceptor as my school couldn't find one to fit my busy schedule and basically left it up to me. I even had to put off the program for a year because of this. I recently was connected to Dr Linet through Preceptor Psych. As a graduate that has experience with other preceptors, I find Dr Linet that has truly made an impact in my experience. He has played a huge role in providing essential knowledge I will use in my practice as a Psych Np. Preceptor Psych has been supportive and patient with me as well throughout this process. I wouldn't have been connected with such an excellent preceptor without the help from Preceptor Psych. I would recommend this service to Psych NP students who are looking to get the most out of their clinical experience.

Kind Regards,
S.G., FNP-C
