

ORGANIZATIONS THAT HELP WITH PAYING FOR YOUR VET

BILLS

****Regarding Diagnosis Prognosis... you want to make sure that you have gotten that prognosis from a veterinary neurologist who has daily experience with cases similar to your pet's and knows about all the options out there vs. your local general practitioner vet who may not be familiar with the various treatments and may not give a proper diagnosis prognosis simply because they do not know any better... Also do not be afraid to get 2nd and 3rd opinions. Research veterinary neurologists who have lots of experience treating cases like yours. You'll find that your diagnosis prognosis may go from poor to fair or even good. Many organizations will not help cover costs with poor prognosis so it's very important that you are having your pet properly diagnosed from an experienced specialist who has LOTS of experience treating similar or the same conditions.*

Please CAREFULLY read through each website to make sure that you qualify before applying. Some sites are specific to conditions or breeds or geographies
