

CHOOSE THE BEST TRAMPOLINE SYSTEM FOR YOUR FAMILY

Buying the right trampoline is an important decision.
Please use this guide to help select the best trampoline system for your family.

VERSUS

Springfree Safety Features

- 1 Flexible, composite rods give a **soft, non-jarring bounce**
- 2 Rods lay beneath the jumping surface and out of harm's way
- 3 **FlexiNet™ enclosure** has flexible net rods to cushion jumpers and prevent falls
- 4 **SoffEdge™ design** eliminates contact with frame & rods
- 5 Frame is made of heavy galvanized steel and built to last

Safety Features Designed to Prevent the 4 Leading Causes of Trampoline Injury:

Colliding with another person on the trampoline*

AlleyOOP 2 9

SpringFree 1

Landing improperly while jumping or doing stunts on the trampolines*

AlleyOOP 1 2 3 4

SpringFree 1

Falling or jumping off of the trampoline*

AlleyOOP 10 11 12 13

SpringFree 3

Frame & Spring Impacts*

AlleyOOP 6 7 8

SpringFree 2 4

* U.S. Consumer Product Safety Commission Injury Data

Springfree Warranty: Must register for extended period.

Basic vs. Registered Frame

Frame	4 years	8 years
Fiberglass Enclosure Rods	1 year	2 years
Jumping Mat	1 year	2 years
Fiberglass Spring Rods	1 year	2 years
Enclosure Netting	1 year	2 years

Springfree Tech Specs – Large Oval Frame (Model SF092):

Mat Area = 92 sq. ft.; Useable Play Space* = 59 sq. ft.

* Springfree manuals instruct users not to bounce intentionally near the edge. The hourglass shape of the Springfree enclosure restricts access to the area near the edge. These factors reduce "usable" space.

Yard Space Required for Safe Clearance – 5 feet from sides – enclosure poles flex out on impact: 365 sq. ft. approx.

Single User Weight Rating –

220 lbs (SF077 Model)

220 lbs (SF092 Model)

220 lbs (SFS113 Model)

Shipping Weight/System Stability – SF077 and SF092 include sandbags for stability...

232 lbs (SF077 Model)

249 lbs (SF092 Model)

283 lbs (SFS113 Model)

Recommended For – Lighter weight, younger users. General bouncing & basic maneuvers

AlleyOOP Performance Systems and Options

- **Patented PowerBounce™** = ability to tune the bounce performance for different age, weight, and skill levels!
- **DoubleBounce™ System** allows for the widest performance spectrum for all ages and weights
- Enjoy our **VariableBounce technology** on all models = a better, safer bounce that reduces stress on the body

AlleyOOP Warranty : No registration required

Frame	Lifetime
Enclosure Poles	Lifetime
Jumping Mat	5 years
Springs	5 years
Enclosure Netting	5 years
Padding	2 years

AlleyOOP Tech Specs- 14' Frames:

Surface Area - 113 sq. ft.; Usable Play Space – 113 sq. ft.

The Most Usable Space = Room to Spread Out = Better Safety.

Yard Space Required for Safe Clearance – 3 feet around all sides

Single User Weight Rating –

245 Lbs (14' VariableBounce)

270 Lbs (14' PowerBounce)

250 Lbs (14' DoubleBounce)

300 Lbs (14' Power DoubleBounce)

Shipping Weight/System Stability – Very Stable without the use of sandbags

343 Lbs (14' VariableBounce)

379 Lbs (14' PowerBounce)

494 Lbs (14' DoubleBounce)

552 Lbs (14' Power DoubleBounce)

Recommended For – Lighter weight, younger users to adults and X-game athletes. General bouncing, basic & more advanced maneuvers, games & play
