# FOR SALE

**Trucking Management Software, Service & ELDS**

Application Software Business

This turn-key business consists of Trucking Management, Software Services & ELDS. This company is unique within the industry as it is capable of handling all of the needs of their clients. The software is cloud based and provides tracking for trucking, load planning, dispatch, management, maintenance and ELDS software. The program is customizable, easy to use and provides total integration and customer support.

With IT Technology on the rise, opportunity for expansion is great and can be developed by strategically building relationships with vendors and business partners across the US.

Furniture, fixtures and equipment have a fair market value of $16,000. Inventory included averages $38,000.

The business office space is leased and consists of 3,500 sq. ft.

The intellectual property rights/license agreement rights to the software are included. With 35 years of experience, the seller plans to retire.

The owner will work with a buyer through a transition period to ensure a successful transfer.
