# Train Anytime, Anywhere

Industry leaders Vertex Solutions and R4 Integration, Inc. have teamed up to develop the next generation PORTABLE flight simulator.

Predominantly 3D printed, it is lightweight, strong and self-contained. Our portable Immersive Training Device (pITD) features the latest flight simulation and extended reality (XR) technology to provide immersive and efficient training in one small package.

PORTABLE IMMERSIVE TRAINING DEVICE

pITD

PORTABLE IMMERSIVE TRAINING DEVICE

BENEFITS:

- State-of-the-art technology
- Cost-effective training
- Convenient quick set-up, anytime, anywhere
- Plug and play controls for easy customization
- Easily upgraded software/hardware

SPECIFICATIONS:

25" x 31" x 21" aluminum case w/ built-in handle and casters

Weight: approx. 148 lbs

Max user weight: 350 lbs

HARDWARE:

- 12th gen i9-12900 processor w/ Nvidia RTX 3070 Ti graphics
- Thrustmaster HOTAS Warthog w/ matching flight controller (adjustable height)
- Thrustmaster TPR -pendular rudder pedals (adj. length)
- HP Reverb G2 head mounted display w/ hand controllers
- Asus mini display
- Wireless keyboard/mouse
- Battery surge protection
