

EES Treatment Case Study provided by:  
Michael S. Cook, D.C., Dipl. Ac.

September 10, 2008

I have put together 12 patients for your presentation. Enclosed are the 12 files with the same information on the inside flap of each file. Please black out the names if you are going to share these. I guess HIPPA would want that? I have not provided a detailed subjective complaint and have given you only highlights in each chart. Almost everyone has seen various subjective complaint improvements but I have not compiled lab values; etc. for this to be completely accurate. My aim has really been to prove that the EES raises cellular energy, which I can prove on most of my cases. You will notice the cellular millivolt readings are given above each meridian column. The goal on the graph is to have all yellows (perfect symmetry and all meridians equal millivoltage) and to be in the 70%-100% range (ideal millivoltage strength). Most of the graphs are done after 10 hours in the chamber, however some went longer and I never test right after a session. (in between – I did include once in one at the charts though.) usually after a few days out of the chamber to get a more “real” measurement; similar to when a long needle acupuncture should wait 48-72 hours before retesting.

Most of these people did not have any other types of treatments other than some chiropractic maybe, so the results are definitely from the EES treatments. All Test 1 results were from before their first EES session.

I did this quick today, so hopefully you can read my writing. Call 757-897-3078© or 757-591-7291(w) or 757-930-1146(h) and I'll clarify anything you need. Mike

#### Patient 1

This 70-something-year-old patient has a history of (bladder)? and breast cancer and she has undergone chemo and radiation treatments in the past. She stated that she only came to treatments once or twice a week and claimed to have very low energy after each session. Enclosed are graph comparisons of all 3 tests with complete reports for Test 1 and Test 3 and Test 2. Notice on page two, CHI energy level and how it came up. ST meridian goes through breast and was low at 24.28 initially. TE still split, so maybe hormones involved or one of her 13 medications still impacting her. TE important as it governs all those organs – lungs, stomach, and bladder. She felt more energy overall and she is due to resume her visits. (She has been CA free since treatments of chemo and radiation.) Although I suspect still some issues due to my low initial readings. Better millivolts now so probably more protected.

## Meridian Analysis Information

### TE(X)

The Triple Heater (triple warmer) Meridian governs respiration, digestion and elimination.

Your Triple Heater (triple warmer) Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the triple heater meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Split chi in the triple heater meridian may indicate a potential for diseases of digestion, side of head, eyes, ears, throat, endocrine system, and upper extremity.

Imbalance in this meridian may be associated with subluxation at the T2, T3, L1, and/or Sacrum level(s).

### LI(X)

The Large Intestine Meridian controls elimination of solid waste, and functions with the Lung Meridian to regulate lung function and skin.

Your Large Intestine Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the large intestine meridian may involve one or more of the following emotional factors: Holding on to the past, Fear of letting go, Crying, Compulsion to neatness, Defensiveness.

Split chi in the large intestine meridian may indicate a potential for diseases of intestine, face, eyes, nose, mouth, teeth, throat, head, and upper extremity.

Imbalance in this meridian may be associated with subluxation at the L2, L3, L4 and/or L5 level(s).

**BL(-)**

The Bladder Meridian functions with the Kidney Meridian in water metabolism and excretion. All the associated (Shu) points are on this meridian. Your Urinary Bladder Meridian energy is deficient. Energetic disturbances in the urinary bladder meridian may involve one or more of the following emotional factors: Anxiety, Paralyzed will, Holding on to old ideas, Timidity, Inefficiency, Fear of letting go, Wishy-washy, Irritation. Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder. Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

**ST(-)**

The Stomach Meridian functions with the Spleen Meridian in the assimilation of chi from food through digestion and absorption. Your Stomach Meridian energy is deficient. Energetic disturbances in the stomach meridian may involve one or more of the following emotional factors: Holding nourishment, Digesting ideas, Dread, Fear of the new, Inability to assimilate new, Over-sympathetic, Over importance of self, Egotistic, Despair, Stifled. Deficient chi in the stomach meridian may indicate a potential for stiff shoulder, constipation, abdominal fullness or pain, poor appetite, facial swelling, weight loss, diarrhea, nausea, extremity swelling, leg weakness, facial pain/paralysis, tooth pain. Imbalance in this meridian may be associated with subluxation at the T8, T9, T10, T11 and/or T12 level(s).

Patient 2

This 60-something-year-old patient has a history of a stroke that resulted in left side paralysis with left DJD bad at knee (bone to bone). Since the stroke, other body mechanisms affected are his speech, arm movement, and left leg swelling. Patient had 40 acupuncture treatments prior to Test 1. Since EES I have done about 2 needles in certain points while in EES. 6 tests done with Test 1 and Test 6 full reports here. Good millivoltage increase with better symmetry (more yellows- more in the 70%-100% range on Test 6). Patient still has some weakness and some knee problems (all meridians to the right at LI (SP-ST) go through knee.) He has less leg swelling and more ROM of arm. It's not perfect yet but after 50 hours or so of EES treatments he'll be on his way.

(Maybe stroke patients need 100-200 hours in the chamber? I don't know.)

Blue meridians are weak.

Red are too high.

Pink is split. I think these are just as bad as any on his Test 1. LI went to almost 200 on right side and also goes up on his arm.

## Meridian Analysis Information

### SI(-)

The Small Intestine Meridian influences digestion, water metabolism, and bowel functions. Your Small Intestine Meridian energy is deficient.

Energetic disturbances in the small intestine meridian may involve one or more of the following emotional factors: Assimilation and ease in life, Fear, Worry, Not feeling good enough, Feeling lost, Vulnerable, Deserted, Absent mindedness, Unrequited love. Deficient chi in the small intestine meridian may indicate a potential for one-sided headache, disorder of lower abdomen, tinnitus, hearing difficulties, ear pain, diarrhea, cold body, cold extremities, digestive disturbance.

Imbalance in this meridian may be associated with subluxation at the T10, T11, 12 and/or Sacrum level(s).

### TE(X)

The Triple Heater (triple warmer) Meridian governs respiration, digestion and elimination. Your Triple Heater (triple warmer) Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

The Large Intestine Meridian controls elimination of solid waste, and functions with the Lung Meridian to regulate lung function and skin.

Your Large Intestine Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the large intestine meridian may involve one or more of the following emotional factors: Holding on to the past, Fear of letting go, Crying, Compulsion to neatness, Defensiveness.

Split chi in the large intestine meridian may indicate a potential for diseases of intestine, face, eyes, nose, mouth, teeth, throat, head, and upper extremity.

Imbalance in this meridian may be associated with subluxation at the L2, L3, L4 and/or L5 level(s).

**SP(-)**

The Spleen Meridian affects the spleen, pancreas, blood formation and hormones. It influences the creation and storage of chi energy, through the transformation of food and water. It nourishes the lips and tongue.

Your Spleen Meridian energy is deficient.

Energetic disturbances in the spleen meridian may involve one or more of the following emotional factors: Obsession, Worry, Hopelessness, Living through others, Being obsessed about things, Low self-esteem, Poor self image, Feeling of not being good enough.

Deficient chi in the spleen meridian may indicate a potential for weak stomach, skin disorders, bowel problems, fatigue, poor appetite, insomnia, sugar craving, flatulence, nausea, diarrhea, poor memory, jaundice, hormonal problems, pelvic involvement.

Imbalance in this meridian may be associated with subluxation at the T1, T5, T6, T7, T8 and/or T9 level(s).

**LR(+)**

The Liver Meridian controls muscles, tendons, eyes and genitals, and regulates blood volume and emotional changes, and maintains the free flow of chi.

Your Liver Meridian energy is excessive.

Energetic disturbances in the liver meridian may involve one or more of the following emotional factors: Seat of anger and primitive emotions, Problems: chronic complaining, Justifying fault finding to deceive oneself, Feeling bad, Irrationality, Frustration.

Excessive chi in the liver meridian may indicate a potential for lumbar pain, insomnia, dizziness, menstrual disorder, genital disease or pain, eye disease, chest pressure, tidal fever, allergies, fingernail symptoms, muscle or tendon symptoms, dry throat, bitter taste.

Imbalance in this meridian may be associated with subluxation at the T2, T5, T6, T7, T8 and/or T9 level(s).

Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder. Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

**GB(X)**

The Gallbladder Meridian functions with the Liver Meridian to maintain the free flow of chi and to regulate emotional changes. Your Gall Bladder Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body. Energetic disturbances in the gall bladder meridian may involve one or more of the following emotional factors: Stones: Bitterness, Resentment, Hard thoughts, Stubbornness, Condemning pride, Emotionally repressed, Depressed, Indecisive. Split chi in the gall bladder meridian may indicate a potential for diseases of gall bladder, lateral head, eyes, ears, costal region, lower extremity, anger. Imbalance in this meridian may be associated with subluxation at the T4, T5, T6, T7, T8, T9 and/or T10 level(s).

**ST(X)**

The Stomach Meridian functions with the Spleen Meridian in the assimilation of chi from food through digestion and absorption. Your Stomach Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body. Energetic disturbances in the stomach meridian may involve one or more of the following emotional factors: Holding nourishment, Digesting ideas, Dread, Fear of the new, Inability to assimilate new, Over-sympathetic, Over importance of self, Egotistic, Despair, Stifled. Split chi in the stomach meridian may indicate a potential for diseases of head, face, stomach, digestion, mouth, teeth, throat, and lower extremity. Imbalance in this meridian may be associated with subluxation at the T8, T9, T10, T11 and/or T12 level(s).

## Meridian Analysis Information

### HT(-)

The Heart Meridian governs the heart, circulation, facial complexion and mental/emotional function.

Your Heart Meridian energy is deficient.

Energetic disturbances in the heart meridian may involve one or more of the following emotional factors: Center of love and security, Attacks: squeezing all the joy out of the heart in favor of money or power, Long standing emotional problems, Lack of joy, Excess joy, Abnormal laughing, Excessively talkative.

Deficient chi in the heart meridian may indicate a potential for palpitation, pain or cold in chest and limbs, cold sweat, nausea, yellow eyes, warm palms, diarrhea, insomnia, poor respiration, speech disturbance, poor memory.

Imbalance in this meridian may be associated with subluxation at the T1, T2, T3, T4 and/or T5 level(s).

### SI(-)

The Small Intestine Meridian influences digestion, water metabolism, and bowel functions.

Your Small Intestine Meridian energy is deficient.

Energetic disturbances in the small intestine meridian may involve one or more of the following emotional factors: Assimilation and ease in life, Fear, Worry, Not feeling good enough, Feeling lost, Vulnerable, Deserted, Absent mindedness, Unrequited love.

Deficient chi in the small intestine meridian may indicate a potential for one-sided headache, disorder of lower abdomen, tinnitus, hearing difficulties, ear pain, diarrhea, cold body, cold extremities, digestive disturbance.

### Patient 3

This 50-something-year-old patient came to see me in a wheelchair due to overall pain and hard to move about. Notice that on the Graph Comparison chart that on Test 1 revealed 0 readings. She had a history of chronic infections resulting in constant steroid usage and immune weakness. After 10-20 hours in the chamber, Test 2 showed CHI energy level at 20 compared to 8 on Test 1. All meridians at least have some life. She was able to start PT and felt big increase in her energy and she no longer needed her wheelchair. She stopped coming in due to cost, however, we're trying to get her back as she really misses the treatments as she stated over the phone. She also claimed to be taking less pain medications.

Patient 4

This 60-something-year-old patient is a big supporter of energy medicine. She has a history of lumbar DJR with sciatica in which she received successful treatments from me. Please notice that on Test 1 revealed lots of splits with KI and BL channels split and weak. Test 5 great balance but BL still lagging behind. She did feel better with less lower back pain. Energy levels up on Test 1 and Test 5 summary reports with PIE score better too. (81% - 121%) Chi energy levels. Enclosed Test 1-5 summary graphs with Test 1 and Test 5 complete reports enclosed.

## Meridian Analysis Information

### LU(X)

The Lung Meridian controls respiration, the throat, nose, skin and body hair. It dominates chi throughout the whole body.

Your Lung Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the lung meridian may involve one or more of the following emotional factors: Ability to take in life, Depression, Grief, Sadness, Yearning, Anguish, Not feeling worthy of living life fully, Desperation, Cloudy thinking.

Split chi in the lung meridian may indicate a potential for diseases of chest, lungs, throat and upper extremity.

Imbalance in this meridian may be associated with subluxation at the C7, T1, T2 and/or T3 level(s).

### PC(X)

The Pericardium Meridian (circulation/sex meridian) governs circulation and hormones, and protects and regulates the heart.

Your Pericardium Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the pericardium meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Split chi in the pericardium meridian may indicate a potential for diseases of heart, chest, stomach, upper extremity, hormones.

Imbalance in this meridian may be associated with subluxation at the T2, T4, T8 and/or T12 level(s).

### **HT(-)**

The Heart Meridian governs the heart, circulation, facial complexion and mental/emotional function.

Your Heart Meridian energy is deficient.

Energetic disturbances in the heart meridian may involve one or more of the following emotional factors: Center of love and security, Attacks: squeezing all the joy out of the heart in favor of money or power, Long standing emotional problems, Lack of joy, Excess joy, Abnormal laughing, Excessively talkative.

Deficient chi in the heart meridian may indicate a potential for palpitation, pain or cold in chest and limbs, cold sweat, nausea, yellow eyes, warm palms, diarrhea, insomnia, poor respiration, speech disturbance, poor memory.

Imbalance in this meridian may be associated with subluxation at the T1, T2, T3, T4 and/or T5 level(s).

### **SI(X)**

The Small Intestine Meridian influences digestion, water metabolism, and bowel functions.

Your Small Intestine Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the small intestine meridian may involve one or more of the following emotional factors: Assimilation and ease in life, Fear, Worry, Not feeling good enough, Feeling lost, Vulnerable, Deserted, Absent mindedness, Unrequited love.

Split chi in the small intestine meridian may indicate a potential for diseases of digestion, intestine, lower abdomen, neck, head, eyes, ears, upper extremity and throat.

Imbalance in this meridian may be associated with subluxation at the T10, T11, 12 and/or Sacrum level(s).

### **LI(X)**

The Large Intestine Meridian controls elimination of solid waste, and functions with the Lung Meridian to regulate lung function and skin.

Your Large Intestine Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the large intestine meridian may involve one or more of the following emotional factors: Holding on to the past, Fear of letting go, Crying, Compulsion to neatness, Defensiveness.

Split chi in the large intestine meridian may indicate a potential for diseases of intestine, face, eyes, nose, mouth, teeth, throat, head, and upper extremity.

Imbalance in this meridian may be associated with subluxation at the L2, L3, L4 and/or L5 level(s).

### SP(+)

The Spleen Meridian affects the spleen, pancreas, blood formation and hormones. It influences the creation and storage of chi energy, through the transformation of food and water. It nourishes the lips and tongue.

Your Spleen Meridian energy is excessive.

Energetic disturbances in the spleen meridian may involve one or more of the following emotional factors: Obsession, Worry, Hopelessness, Living through others, Being obsessed about things, Low self-esteem, Poor self image, Feeling of not being good enough.

Excessive chi in the spleen meridian may indicate a potential for stomach problems, joint disorders, pus formation, positional dyspnea, bowel problems, cold lower extremity, sticky mouth, chest congestion, phlegm, fatigue, hormonal problems, pelvic involvement.

Imbalance in this meridian may be associated with subluxation at the T1, T5, T6, T7, T8 and/or T9 level(s).

### LR(X)

The Liver Meridian controls muscles, tendons, eyes and genitals, and regulates blood volume and emotional changes, and maintains the free flow of chi.

Your Liver Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the liver meridian may involve one or more of the following emotional factors: Seat of anger and primitive emotions, Problems: chronic complaining, Justifying fault finding to deceive oneself, Feeling bad, Irrationality, Frustration.

Split chi in the liver meridian may indicate a potential for diseases of eyes, joints, ligaments, liver, abdomen, urogenital system and lower extremity.

Imbalance in this meridian may be associated with subluxation at the T2, T5, T6, T7, T8 and/or T9 level(s).

### KI(X)

The Kidney Meridian dominates reproduction and water metabolism. It controls bone, hair, hearing and growth/development.

Your Kidney Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the kidney meridian may involve one or more of the following emotional factors: Criticism, Disappointment, Fear, Dread, Bad memory, Impending doom, Failure, Shame, Reacting as a child, Stones: unresolved anger.

Split chi in the kidney meridian may indicate a potential for diseases of kidney, urogenital system, bones, lung, throat, abdomen, and lower extremity.

Imbalance in this meridian may be associated with subluxation at the T8, T9, T10, T11, T12 and/or L5 level(s).

**BL(-)**

The Bladder Meridian functions with the Kidney Meridian in water metabolism and excretion. All the associated (Shu) points are on this meridian.

Your Urinary Bladder Meridian energy is deficient.

Energetic disturbances in the urinary bladder meridian may involve one or more of the following emotional factors: Anxiety, Paralyzed will, Holding on to old ideas, Timidity, Inefficiency, Fear of letting go, Wishy-washy, Irritation.

Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder.

Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

## Meridian Analysis Information

### LU(+)

The Lung Meridian controls respiration, the throat, nose, skin and body hair. It dominates chi throughout the whole body.

Your Lung Meridian energy is excessive.

Energetic disturbances in the lung meridian may involve one or more of the following emotional factors: Ability to take in life, Depression, Grief, Sadness, Yearning, Anguish, Not feeling worthy of living life fully, Desperation, Cloudy thinking.

Excessive chi in the lung meridian may indicate a potential for stiff shoulder, back pain, headache, throat problems, heaviness in chest, cough, phlegm, nasal discharge, lung distention with sweating, anal disorder, asthma, thyroid irregularities.

Imbalance in this meridian may be associated with subluxation at the C7, T1, T2 and/or T3 level(s).

### BL(-)

The Bladder Meridian functions with the Kidney Meridian in water metabolism and excretion. All the associated (Shu) points are on this meridian.

Your Urinary Bladder Meridian energy is deficient.

Energetic disturbances in the urinary bladder meridian may involve one or more of the following emotional factors: Anxiety, Paralyzed will, Holding on to old ideas, Timidity, Inefficiency, Fear of letting go, Wishy-washy, Irritation.

Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder.

Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

--	---	---

**GB(-)**

The Gallbladder Meridian functions with the Liver Meridian to maintain the free flow of chi and to regulate emotional changes.

Your Gall Bladder Meridian energy is deficient.

Energetic disturbances in the gall bladder meridian may involve one or more of the following emotional factors: Stones: Bitterness, Resentment, Hard thoughts, Stubbornness, Condemning pride, Emotionally repressed, Depressed, Indecisive.

Deficient chi in the gall bladder meridian may indicate a potential for eye disorder, chills, insomnia, fear, dizziness, gait disturbance, heavy hands or feet, yellow eyes, abnormal blood pressure, pain along meridian, ear disorders.

Imbalance in this meridian may be associated with subluxation at the T4, T5, T6, T7, T8, T9 and/or T10 level(s).

Patient 5

This 80-year-old patient has a history of narcolepsy. She has felt more alert and is missing her narcolepsy medication because she has felt more alert and forgets to take it. (She does not drive due to this.) Insomnia is associated with PC and HT so maybe some connections? Anyway, better balance but a little low on millivoltage reading – 50 avg. (BL and ST) but thers good on final test. We’ll see over time. Around 30 sessions – 60 hours total Test 1 to Test 4.

## Meridian Analysis Information

### PC(+)

The Pericardium Meridian (circulation/sex meridian) governs circulation and hormones, and protects and regulates the heart.

Your Pericardium Meridian energy is excessive.

Energetic disturbances in the pericardium meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Excessive chi in the pericardium meridian may indicate a potential for stiff shoulder, upper arm problems, heart disease, swelling or pain on sides of rib cage, heaviness in head, stomach pain, constipation, hormonal imbalances.

Imbalance in this meridian may be associated with subluxation at the T2, T4, T8 and/or T12 level(s).

### HT(X)

The Heart Meridian governs the heart, circulation, facial complexion and mental/emotional function.

Your Heart Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the heart meridian may involve one or more of the following emotional factors: Center of love and security, Attacks: squeezing all the joy out of the heart in favor of money or power, Long standing emotional problems, Lack of joy, Excess joy, Abnormal laughing, Excessively talkative.

Split chi in the heart meridian may indicate a potential for diseases of heart, chest, upper extremity, speech, emotional disturbance.

Imbalance in this meridian may be associated with subluxation at the T1, T2, T3, T4 and/or T5 level(s).

## Patient 7

This patient is a MD friend of mine approximately 60 years old. He has chronic renal failure and for years he's had high BP issues that he is regulating by taking medication. Currently he is coming in once per week for EES treatments. KI reading is better, BL not split anymore just weak. His BP has cut down and medications are lessened. GFR reading is better as well. However, at the present time he is not getting a lot of exposure time in the chamber, but also doing kidney detox and I'm hopeful overtime that all ailments will improve.

## Meridian Analysis Information

### PC(+)

The Pericardium Meridian (circulation/sex meridian) governs circulation and hormones, and protects and regulates the heart.

Your Pericardium Meridian energy is excessive.

Energetic disturbances in the pericardium meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Excessive chi in the pericardium meridian may indicate a potential for stiff shoulder, upper arm problems, heart disease, swelling or pain on sides of rib cage, heaviness in head, stomach pain, constipation, hormonal imbalances.

Imbalance in this meridian may be associated with subluxation at the T2, T4, T8 and/or T12 level(s).

### LR(+)

The Liver Meridian controls muscles, tendons, eyes and genitals, and regulates blood volume and emotional changes, and maintains the free flow of chi.

Your Liver Meridian energy is excessive.

Energetic disturbances in the liver meridian may involve one or more of the following emotional factors: Seat of anger and primitive emotions, Problems: chronic complaining, Justifying fault finding to deceive oneself, Feeling bad, Irrationality, Frustration.

Excessive chi in the liver meridian may indicate a potential for lumbar pain, insomnia, dizziness, menstrual disorder, genital disease or pain, eye disease, chest pressure, tidal fever, allergies, fingernail symptoms, muscle or tendon symptoms, dry throat, bitter taste.

Imbalance in this meridian may be associated with subluxation at the T2, T5, T6, T7, T8 and/or T9 level(s).

Michael S. Cook, D.C., Dipl. Ac. 757-591-7291	11015 Warwick Blvd. Newport News Virginia, 23661	Peninsula Pain & Rehab peninsularehab.com

**BL(-)**

The Bladder Meridian functions with the Kidney Meridian in water metabolism and excretion. All the associated (Shu) points are on this meridian.

Your Urinary Bladder Meridian energy is deficient.

Energetic disturbances in the urinary bladder meridian may involve one or more of the following emotional factors: Anxiety, Paralyzed will, Holding on to old ideas, Timidity, Inefficiency, Fear of letting go, Wishy-washy, Irritation.

Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder.

Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

## Patient 8

This patient unfortunately passed away due to cancer. She had done a lot with the vibe machine before we got the EES. Her history of cancer includes cancer of the colon, bladder, lungs, etc and through the years has undergone chemo/radiation treatments and many surgeries. As you can see, a lot of low millivolt readings on Test 1. She did get better but was getting so much radiation I think this killed her. She couldn't come up here at the end after April and took a guide dive down and passed very quickly. According to her friends, that after not coming for her treatments in the EES she quickly went down. I'll miss her. Full reports for Test 1 and 3.

## Meridian Analysis Information

### LU(X)

The Lung Meridian controls respiration, the throat, nose, skin and body hair. It dominates chi throughout the whole body.

Your Lung Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the lung meridian may involve one or more of the following emotional factors: Ability to take in life, Depression, Grief, Sadness, Yearning, Anguish, Not feeling worthy of living life fully, Desperation, Cloudy thinking.

Split chi in the lung meridian may indicate a potential for diseases of chest, lungs, throat and upper extremity.

Imbalance in this meridian may be associated with subluxation at the C7, T1, T2 and/or T3 level(s).

### TE(X)

The Triple Heater (triple warmer) Meridian governs respiration, digestion and elimination.

Your Triple Heater (triple warmer) Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the triple heater meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Split chi in the triple heater meridian may indicate a potential for diseases of digestion, side of head, eyes, ears, throat, endocrine system, and upper extremity.

Imbalance in this meridian may be associated with subluxation at the T2, T3, L1, and/or Sacrum level(s).

**LI(+)**

The Large Intestine Meridian controls elimination of solid waste, and functions with the Lung Meridian to regulate lung function and skin.

Your Large Intestine Meridian energy is excessive.

Energetic disturbances in the large intestine meridian may involve one or more of the following emotional factors: Holding on to the past, Fear of letting go, Crying, Compulsion to neatness, Defensiveness.

Excessive chi in the large intestine meridian may indicate a potential for stiff shoulder, toothache, hemorrhoids, skin conditions, fever, fullness, dry throat, asthma, facial swelling, sinus headache, dizziness, constipation.

Imbalance in this meridian may be associated with subluxation at the L2, L3, L4 and/or L5 level(s).

**SP(-)**

The Spleen Meridian affects the spleen, pancreas, blood formation and hormones. It influences the creation and storage of chi energy, through the transformation of food and water. It nourishes the lips and tongue.

Your Spleen Meridian energy is deficient.

Energetic disturbances in the spleen meridian may involve one or more of the following emotional factors: Obsession, Worry, Hopelessness, Living through others, Being obsessed about things, Low self-esteem, Poor self image, Feeling of not being good enough.

Deficient chi in the spleen meridian may indicate a potential for weak stomach, skin disorders, bowel problems, fatigue, poor appetite, insomnia, sugar craving, flatulence, nausea, diarrhea, poor memory, jaundice, hormonal problems, pelvic involvement.

Imbalance in this meridian may be associated with subluxation at the T1, T5, T6, T7, T8 and/or T9 level(s).

**BL(-)**

The Bladder Meridian functions with the Kidney Meridian in water metabolism and excretion. All the associated (Shu) points are on this meridian.

Your Urinary Bladder Meridian energy is deficient.

Energetic disturbances in the urinary bladder meridian may involve one or more of the following emotional factors: Anxiety, Paralyzed will, Holding on to old ideas, Timidity, Inefficiency, Fear of letting go, Wishy-washy, Irritation.

Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder.

Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

### SI(X)

The Small Intestine Meridian influences digestion, water metabolism, and bowel functions. Your Small Intestine Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the small intestine meridian may involve one or more of the following emotional factors: Assimilation and ease in life, Fear, Worry, Not feeling good enough, Feeling lost, Vulnerable, Deserted, Absent mindedness, Unrequited love.

Split chi in the small intestine meridian may indicate a potential for diseases of digestion, intestine, lower abdomen, neck, head, eyes, ears, upper extremity and throat.

Imbalance in this meridian may be associated with subluxation at the T10, T11, 12 and/or Sacrum level(s).

### TE(X)

The Triple Heater (triple warmer) Meridian governs respiration, digestion and elimination.

Your Triple Heater (triple warmer) Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the triple heater meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Split chi in the triple heater meridian may indicate a potential for diseases of digestion, side of head, eyes, ears, throat, endocrine system, and upper extremity.

Imbalance in this meridian may be associated with subluxation at the T2, T3, L1, and/or Sacrum level(s).

### LI(+)

The Large Intestine Meridian controls elimination of solid waste, and functions with the Lung Meridian to regulate lung function and skin.

Your Large Intestine Meridian energy is excessive.

Energetic disturbances in the large intestine meridian may involve one or more of the following emotional factors: Holding on to the past, Fear of letting go, Crying, Compulsion to neatness, Defensiveness.

Excessive chi in the large intestine meridian may indicate a potential for stiff shoulder, toothache, hemorrhoids, skin conditions, fever, fullness, dry throat, asthma, facial swelling, sinus headache, dizziness, constipation.

Imbalance in this meridian may be associated with subluxation at the L2, L3, L4 and/or L5 level(s).

Patient 9

This 60-something-year-old patient has a long history of fatigue and fibromyalgia. Just included Test comparisons here. Notice better balance (all yellows) Test 1 – Test 4. Although still low on millivolt readings; she feels the best in years. I did Test 5 right after 2 hour session, so I did see a bigger improvement, but TE hasn't shook out yet. I was just curious because so low millivolt. She has done a lot of sessions, close to 200 total hours in the chamber. She may be dehydrated but she feels so many great benefits including no more acid reflux belching, more enegy, etc. etc. etc. She can get better. Still working!

Patient 10

This 50-something-year-old patient has a history of colon problems and LS DJD. Notice 200 reading at LI on Test 1. Probably 100 hours or more – better symmetry. Back pain still there somewhat, hence split BL reading. Haven't seen her recently so not sure. Colon was better although still high reading at Test 6 but she was getting better and were going to call her to check on her. Full report Test 1 and 6.

Imbalance in this meridian may be associated with subluxation at the T4, T5, T6, T7, T8, T9 and/or T10 level(s).

Patient 11

This 20-something-year-old patient was shot in the spine and T9 level paralyzed from that level down, no feeding and no bladder control. He did over 150 acupuncture treatments before Test 1 and probably 50 vibe treatments too. Test 2 showed great increase in all the leg readings but Test 3 and 4 weak again. He's coming in for 4 one-hour sessions a week. So we'll just keep going and hopefully bladder control will come back. I've seen his legs twitch in the chamber and he says this is unusual so we'll see. He still has no feeling in his legs.

## Meridian Analysis Information

### LU(X)

The Lung Meridian controls respiration, the throat, nose, skin and body hair. It dominates chi throughout the whole body.

Your Lung Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the lung meridian may involve one or more of the following emotional factors: Ability to take in life, Depression, Grief, Sadness, Yearning, Anguish, Not feeling worthy of living life fully, Desperation, Cloudy thinking.

Split chi in the lung meridian may indicate a potential for diseases of chest, lungs, throat and upper extremity.

Imbalance in this meridian may be associated with subluxation at the C7, T1, T2 and/or T3 level(s).

### PC(+)

The Pericardium Meridian (circulation/sex meridian) governs circulation and hormones, and protects and regulates the heart.

Your Pericardium Meridian energy is excessive.

Energetic disturbances in the pericardium meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Excessive chi in the pericardium meridian may indicate a potential for stiff shoulder, upper arm problems, heart disease, swelling or pain on sides of rib cage, heaviness in head, stomach pain, constipation, hormonal imbalances.

Imbalance in this meridian may be associated with subluxation at the T2, T4, T8 and/or T12 level(s).

D [redacted] V [redacted]	Friday, July 18, 2008 3:45 PM	Source Points
Michael S. Cook, D.C., Dipl. Ac. 757-591-7291	11015 Warwick Blvd. Newport News Virginia, 23601	Peninsula Pain & Rehab peninsularehab.com

### **HT(+)**

The Heart Meridian governs the heart, circulation, facial complexion and mental/emotional function.

Your Heart Meridian energy is excessive.

Energetic disturbances in the heart meridian may involve one or more of the following emotional factors: Center of love and security, Attacks: squeezing all the joy out of the heart in favor of money or power, Long standing emotional problems, Lack of joy, Excess joy, Abnormal laughing, Excessively talkative.

Excessive chi in the heart meridian may indicate a potential for full sensation of stomach or chest, fever, constipation, dry throat, heart disease, frontal headache, weakness or cold in hands or feet, shoulder pain, speech disturbance, ruddy complexion, excessive laughter. Imbalance in this meridian may be associated with subluxation at the T1, T2, T3, T4 and/or T5 level(s).

### **SI(+)**

The Small Intestine Meridian influences digestion, water metabolism, and bowel functions.

Your Small Intestine Meridian energy is excessive.

Energetic disturbances in the small intestine meridian may involve one or more of the following emotional factors: Assimilation and ease in life, Fear, Worry, Not feeling good enough, Feeling lost, Vulnerable, Deserted, Absent mindedness, Unrequited love.

Excessive chi in the small intestine meridian may indicate a potential for headache, weak extremities, disorder of lower abdomen, shoulder pain, joint pain, flatulence, constipation, chest pressure, mouth sores, fever, sweating, stiff or swollen neck, digestive disturbance. Imbalance in this meridian may be associated with subluxation at the T10, T11, 12 and/or Sacrum level(s).

### **TE(+)**

The Triple Heater (triple warmer) Meridian governs respiration, digestion and elimination.

Your Triple Heater (triple warmer) Meridian energy is excessive.

Energetic disturbances in the triple heater meridian may involve one or more of the following emotional factors: the ability to feel and express positive emotions

Excessive chi in the triple heater meridian may indicate a potential for urination disorder, tinnitus, hearing difficulties, rigid lower abdomen, sweating, sore throat, endocrine dysfunction, shoulder pain, ear pain.

Imbalance in this meridian may be associated with subluxation at the T2, T3, L1, and/or Sacrum level(s).

### **LI(+)**

The Large Intestine Meridian controls elimination of solid waste, and functions with the Lung Meridian to regulate lung function and skin.

Your Large Intestine Meridian energy is excessive.

Energetic disturbances in the large intestine meridian may involve one or more of the following emotional factors: Holding on to the past, Fear of letting go, Crying, Compulsion to neatness, Defensiveness.

Excessive chi in the large intestine meridian may indicate a potential for stiff shoulder, toothache, hemorrhoids, skin conditions, fever, fullness, dry throat, asthma, facial swelling, sinus headache, dizziness, constipation.

Imbalance in this meridian may be associated with subluxation at the L2, L3, L4 and/or L5 level(s).

**SP(-)**

The Spleen Meridian affects the spleen, pancreas, blood formation and hormones. It influences the creation and storage of chi energy, through the transformation of food and water. It nourishes the lips and tongue.

Your Spleen Meridian energy is deficient.

Energetic disturbances in the spleen meridian may involve one or more of the following emotional factors: Obsession, Worry, Hopelessness, Living through others, Being obsessed about things, Low self-esteem, Poor self image, Feeling of not being good enough.

Deficient chi in the spleen meridian may indicate a potential for weak stomach, skin disorders, bowel problems, fatigue, poor appetite, insomnia, sugar craving, flatulence, nausea, diarrhea, poor memory, jaundice, hormonal problems, pelvic involvement.

Imbalance in this meridian may be associated with subluxation at the T1, T5, T6, T7, T8 and/or T9 level(s).

**LR(-)**

The Liver Meridian controls muscles, tendons, eyes and genitals, and regulates blood volume and emotional changes, and maintains the free flow of chi.

Your Liver Meridian energy is deficient.

Energetic disturbances in the liver meridian may involve one or more of the following emotional factors: Seat of anger and primitive emotions, Problems: chronic complaining, Justifying fault finding to deceive oneself, Feeling bad, Irrationality, Frustration.

Deficient chi in the liver meridian may indicate a potential for weak or cold hands or feet, stomach distention, dizziness, impotence, lack of libido, frequent urination, allergies, fingernail symptoms, muscle or tendon symptoms, vision impairment, tinnitus.

Imbalance in this meridian may be associated with subluxation at the T2, T5, T6, T7, T8 and/or T9 level(s).

**KI(X)**

The Kidney Meridian dominates reproduction and water metabolism. It controls bone, hair, hearing and growth/development.

Your Kidney Meridian is split. This means there is a significant imbalance in this meridian's energy between the right and left sides of your body.

Energetic disturbances in the kidney meridian may involve one or more of the following emotional factors: Criticism, Disappointment, Fear, Dread, Bad memory, Impending doom, Failure, Shame, Reacting as a child, Stones: unresolved anger.

Split chi in the kidney meridian may indicate a potential for diseases of kidney, urogenital system, bones, lung, throat, abdomen, and lower extremity.

Imbalance in this meridian may be associated with subluxation at the T8, T9, T10, T11, T12 and/or L5 level(s).

**BL(-)**

The Bladder Meridian functions with the Kidney Meridian in water metabolism and excretion. All the associated (Shu) points are on this meridian.

Your Urinary Bladder Meridian energy is deficient.

Energetic disturbances in the urinary bladder meridian may involve one or more of the following emotional factors: Anxiety, Paralyzed will, Holding on to old ideas, Timidity, Inefficiency, Fear of letting go, Wishy-washy, Irritation.

Deficient chi in the urinary bladder meridian may indicate a potential for neck and back pain and stiffness, heavy and weak sensation of extremities, sciatica, leg pain, hemorrhoids, cold back, frequent urination, enuresis, bladder disorder, prostate disorder.

Imbalance in this meridian may be associated with subluxation at the L5, S1 and/or S2 level(s).

**GB(-)**

The Gallbladder Meridian functions with the Liver Meridian to maintain the free flow of chi and to regulate emotional changes.

Your Gall Bladder Meridian energy is deficient.

Energetic disturbances in the gall bladder meridian may involve one or more of the following emotional factors: Stones: Bitterness, Resentment, Hard thoughts, Stubbornness, Condemning pride, Emotionally repressed, Depressed, Indecisive.

Deficient chi in the gall bladder meridian may indicate a potential for eye disorder, chills, insomnia, fear, dizziness, gait disturbance, heavy hands or feet, yellow eyes, abnormal blood pressure, pain along meridian, ear disorders.

Imbalance in this meridian may be associated with subluxation at the T4, T5, T6, T7, T8, T9 and/or T10 level(s).

**ST(-)**

The Stomach Meridian functions with the Spleen Meridian in the assimilation of chi from food through digestion and absorption.

Your Stomach Meridian energy is deficient.

Energetic disturbances in the stomach meridian may involve one or more of the following emotional factors: Holding nourishment, Digesting ideas, Dread, Fear of the new, Inability to assimilate new, Over-sympathetic, Over importance of self, Egotistic, Despair, Stifled.

Deficient chi in the stomach meridian may indicate a potential for stiff shoulder, constipation, abdominal fullness or pain, poor appetite, facial swelling, weight loss, diarrhea, nausea, extremity swelling, leg weakness, facial pain/paralysis, tooth pain.

Imbalance in this meridian may be associated with subluxation at the T8, T9, T10, T11 and/or T12 level(s).

Patient 12

This 70-year-old lymphoma patient is going through a lot of chemo treatments Test 9, 11 is the best so far. He definitely feels increase in energy and feels more healthy. Additionally, his liver has been off each time except once as stomach. He's very into electromedicine and has requested me to test him a lot. Probably 125-150 or so hours so far and he's pleased with the millivoltage balance and strength. A lot of his blood tests have improved and sorry for the lack of specificity. According to the patient, he may stop the chemo treatments soon because he has more faith in the EES. Naturally, I stay out of promising cures. Full reports on Test 1 and Test 12. After his chemo treatments, I saw a drop in the P.I.E. scores and his liver is consistently off and requires a liver cleanse.
