

Waste Water Disposal Cost Share Campbell County Conservation District

8350 East Main Street
Alexandria, KY 41001
859-635-9587

In recent years Campbell County has seen increases in population, development, and economic growth. Unfortunately, the County has also seen increases in water pollution. Untreated effluent from rural homes and camping trailers is discharged into the streams that provide our drinking water. This Waste Water Disposal cost-share program is a financial incentive for landowners to dispose of this effluent properly by providing funds for code-compliant plumbing installation/modifications of both supply- and drain/vent- pipes to carry wastewater into existing sewer/septic systems. Leach line repair will also be considered.

A project may be funded up to \$2,500 and applicants must provide at least 25% of the total cost of the project.

Campbell County residents are eligible to receive financial assistance only one time per location address.

All projects must be installed according to NKY Health Department requirements, and a Work Permit must be issued by the appropriate agency before beginning work. Please call for Permitting instructions:

- For Plumbing Permits/Inspections, call the Kentucky Division of Plumbing (859)341-8228;
- For Septic System Permits/Inspections, call Northern Kentucky Health Department (859)341-4151.

This is a reimbursement grant. Before funds are reimbursed, the applicant must:

- Provide a copy of a Passing inspection report from the appropriate agency.
- Provide receipts/invoices to substantiate the expenses for which reimbursement is being sought.
- Sign a maintenance agreement declaring the work will be maintained for at least 10 years.
- Complete a W9 form if you receive over \$599 in total reimbursement.

Projects must be completed within one year of approval, although up to two six-month extensions may be considered with extenuating circumstances.

Applications will be accepted and evaluated as they are received. The program will be available until all grant funds are expended. If the program is oversubscribed with eligible applications, applications will be prioritized for funding based on the total project need. If your project is funded, Conservation District representatives will document the progress of the project. Funds for this cost-share program are made available from Campbell County property tax dollars through the Campbell County Conservation District.
