

# **Ecosystem Services Solutions llc**

## **Full Spectrum Vegetation Management Focused on Invasive Species Removal and Suppression as Well as Native Plant Habitat Restoration.**

Our team of ISA Certified Arborist and Plant Biologists can help you assess and manage your property to keep it beautiful and make it more sustainable. Our focus on native plants keeps management costs lower while encouraging birds and pollinators to spend more time enjoying your property. While the use of native plants and suppression of invasive plants sets us apart from other vegetation managers, we are also very attuned to keeping your property safe, attractive, and in compliance with community and HOA expectations.
