NAME SURNAME

100\$ GIFT CARD

Sea otters have flaps of loose skin under each forearm that they use like a pocket to carry as much food as possible back to the surface. They also use them to stash rocks to crack open clams and crabs on their stomachs.

KEEP CALM AND WATCH THE LEAVES FALL

Baked Apple Pie BATH SALTS

Supplies:

1/2 Cup Epsom Salt
10-20 Drops Apple Pie Fragrance
Brown Powdered or liquid Food Coloring (optional)
Hinged Lid Glass Jars

To make:

You will simply mix the salts and fragrance together until the desired scent is achieved! If you'd like to make them look a little more like apple pie, you can add a few shakes of brown powdered food coloring and mix well. You can also use liquid food coloring sparingly but then place your salts out on a cookie sheet and let them dry completely prior to placing them in a jar.

DIY FLANNEL COASTERS

You'll need:

- 2- 5" squares of flannel & 1 of felt,
- sewing machine or fabric glue
- scissors.

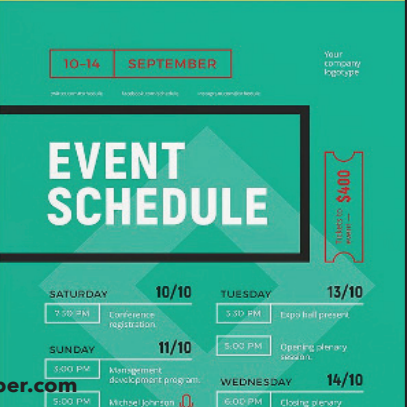

To make:

Cut flannel and felt pieces to size. If sewing, line up and pin pieces with felt on outside and flannel inside out. Sew all sides, leaving an opening to turn around (then sew closed). For the no sew method, line up pieces right-side-out and glue each piece to each other and allow to dry.

pumpkin pie FUDGE RECIPE

Ingredients:

- 1 can sweetened condensed coconut milk (7.4 oz)
- 1 and 1/2 cups nut butter (i.e. almond butter, cashew butter, or peanut butter)
- 1/4 cup pumpkin puree (not pie filling)
- 2 tbsp maple syrup
- 2 tsp pumpkin pie spice
- 2 tsp vanilla extract
- 1/4 tsp salt

Directions:

Line a loaf pan with parchment paper, leaving some paper hanging over the edges.

This will prevent the fudge from sticking to the pan.

Warm a pot or saucepan over medium heat. Add sweetened condensed coconut milk, nut butter, pumpkin puree, maple syrup, pumpkin pie spice, vanilla extract, and salt.

Whisk the ingredients together until evenly combined and melted through.

Pour the mixture into the lined loaf pan. If desired, add any toppings of your choosing (like crushed pecans or chocolate chips).

Chill the fudge in the freezer for 2 hours (or until it sets).

Lift parchment paper out of the pan to easily remove the fudge.

Slice into squares.

LOCATED IN CAMBRIA

Ingredients:

6 granny smith apples coarsely
chopped (about 5 cups)
¼ cup white sugar
¼ cup brown sugar
1 tsp cinnamon
¾ tsp nutmeg
pinch salt
1 package spice cake mix
¾ cup butter melted
caramel sauce (optional)

Directions:

Preheat oven to 350 degrees. Spray
a 9×13 baking dish with cooking
spray.

In a large bowl mix together the
apples, sugars, cinnamon, nutmeg,
and salt.

Pour all fo the apple mixture into
the baking dish.

Sprinkle all of the dry cake mix over
the top of all of the apples. Do not
mix.

Microwave butter in 20 second in-
tervals until melted and pour evenly
over the cake mix. Do not stir.

Bake cake for 50 minutes, until
golden brown.

Optional - Drizzle all of cake with
caramel sauce and top with both
scoops of vanilla ice cream and
whipped cream.

7 TIPS FOR READYING YOUR OUTDOOR POWER EQUIPMENT FOR WINTER

(NAPSI)—After your lawn gets its last cut before winter, it will be time to put away spring and summer outdoor power equipment, like lawn mowers, leaf blowers, and trimmers. It's also important to ready snow throwers, generators and other small engine equipment for winter use. How and when you prepare your equipment for seasonal changes can save you time and money later.

Readying your equipment for winter needs is important as the weather changes. It's also important to put your fall equipment away correctly. What you do now when you put away your equipment, sets you up for an easier start in the spring.

Here are seven tips to ensure snow throwers will be ready for Winter and Spring:

#1 - Review owner's manuals. Re-familiarize yourself with how to handle equipment safely. Lost manuals can be found online. Save a copy on your computer if possible, so it can be consulted when needed. Be familiar with your equipment, and all its features, including how to turn it off quickly and safely.

#2 - Service all equipment. Before storing spring and summer equipment, clean and service it or take it to a small engine repair shop. Change engine oil and safely dispose of the old oil. Service the air filter, and do other maintenance as directed by the owner's manual. Check winter equipment and see if any maintenance and repairs are required.

#3 - Handle fuel properly. Unused fuel left in gas tanks over the winter can go stale and even damage equipment. Before storing equipment, add fuel stabilizer to the gas tank, then run the equipment to distribute it. Turn the engine off, allow the machine to cool, then restart and run until the gas tank is empty. For winter equipment, buy the recommended type of fuel no more than 30 days before use. Use fuel with no more than 10% ethanol in outdoor power equipment. Use a fuel stabilizer if recommended by the manufacturer. Get more information on safe fueling for outdoor power equipment at <https://www.opei.org/programs/ethanol-warning/>.

#4 - Charge batteries. Remove and fully charge batteries before storing. Don't store batteries on metal shelves or allow them to touch metal objects. Store them on a plastic or wood shelf in a climate-controlled structure.

#5 - Shelter equipment from winter weather. Store spring and summer equipment in a clean and dry place such as a garage, barn or shed. Winter equipment should be kept away from the elements, but be easily available for use.

#6 - Prepare, prepare, prepare. Make space in the garage or basement before the weather changes, so there is room to store larger yard items. Remove sticks, debris, dog and kid's toys and other items from your yard that can damage or destroy equipment. Clear the paths used regularly, especially during the winter when snow can "hide" things.

#7 - Have the right weather appropriate extension cord for your generator. Keep heavy duty outdoor-rated extension cords on hand. Ensure the cord is the right length to operate the generator a safe distance from the building. Never operate a generator indoors, in a garage, breezeway or under an open window or near any air intake for a building.
