

## About the Orange Home Grown Foundation

Orange Home Grown Foundation is a 501c3 non-profit helping people reconnect to a healthy and sustainable food system. The branches of the non-profit engage residents of all ages, ethnicities, and income levels in creative environments and programs. These programs foster education, awareness and action around farming, food and health while celebrating the positive agricultural attributes of the City of Orange and its surrounding cities.

## Volunteer Opportunities & Donations

There are a variety of volunteer opportunities available with the Orange Home Grown Foundation. To learn more about the opportunities available, email [info@orangehomegrown.org](mailto:info@orangehomegrown.org), visit our website, or follow our social media channels for details.

Donations are used to support the branches of the Orange Home Grown Foundation, directly benefiting the Orange Community.

Visit [orangehomegrown.org](http://orangehomegrown.org) to donate and learn more about ways to get involved.

## Farmers & Artisans Market

Established in 2011

**Every Saturday 9 AM – 1PM • Rain or Shine**  
**303 West Palm Avenue**

*Between Lemon & Cypress Street in Orange*

The Certified Orange Home Grown Farmers and Artisans Market sources farms from the Southern California region that hold a California Certified Producers Certificate (CPC), keeping produce local and fresh. Food Artisans found at the market sell items such as breads, cheeses, oils, and dips that are made using traditional methods, increasing the diversity of goods and foods found at the market and the chance to share in someone else's food culture. The local craft artisans section at the market provides handmade goods like soap, pottery, clothing, and jewelry to the community.

Activities at the market include: live music, pet sitting, kid's club, cooking demos, yoga, educational classes, a food trunk rotation, market tours, and more.

*We proudly accept EBT and Market Match incentives.*

## Education Farm

Established in 2016

**Volunteer Every Friday from 9:30 – 11:30 AM**  
**356 N. Lemon Street Orange, CA 92866**

The Orange Home Grown Education Farm is a community farm space dedicated to providing hands-on regenerative farming volunteer opportunities and educational events for all ages. The Education Farm is a collaborative space open to anyone who wants to put their hands in the soil. To learn more about volunteering at the farm, email [info@orangehomegrown.org](mailto:info@orangehomegrown.org).

## Scholarship Opportunities

Established in 2013

Each year Orange Home Grown awards scholarships to high school seniors or college level students whose studies align with the Orange Home Grown Foundation mission.

Assisting youth with aligned interests and goals is both a win for those awarded and our community. To learn more and apply visit, [orangehomegrown.org](http://orangehomegrown.org).

## Seed Lending Library

Established in 2016

The Orange Seed Lending Library is a free self-serve system located at the Orange Public Library, the Taft Library, the El Modena Branch Library in the city of Orange, and once a month at the Farmers Market. Community members are invited to borrow seeds for their garden. Since seeds are a living thing, they must be renewed each year by someone, or unique varieties can become extinct. Growing just one seed and returning it to the library is a valuable contribution to the future.

## Youth Food Literacy Program

Established in 2017

The Youth Food Literacy Program is a nine month course where high school students engage in the entire food production cycle, from seed to dinner table and beyond. This course gives them the tools to make powerful choices related to food, their health, and their future, and offers opportunities for potential job experience after program end. Since 2017, scholarships have also been provided to each student who completes the program.
