## Follow These Easy Steps to Get Connected

1

### Provide Your Information

Let's begin your online application. A few simple questions and you're on your way to being connected on the T-Mobile Network. This process should only take 7-10 minutes. **Just a reminder to have all your documents and information readily available—if you leave the application without completing it, you will have to start over.**

2

### Check Your Phone's Compatibility

You have a special connection with your phone—your memories, apps, contacts and more. So bring your own phone and we'll check to see if it's compatible with our network.

3

### The National Verifier Process

During your Assurance Wireless application, you will be redirected to the National Verifier website, which is Lifeline's centralized application system. It validates your identity and address, and determines your eligibility for Lifeline.

4

### Providing Proof of Eligibility

If you're applying through a government program or based on your income, the National Verifier might automatically check your details using databases for programs like Medicaid, Housing Assistance (FHAP) and Veterans Benefits (VA). If they can't find your information, you'll need to upload proof of program enrollment or income documents.

5

### Ready. Set. GO Get Your Service Started

Once your application has been processed and approved, we will keep you in the know on your next steps. Look for emails and other communication from our team to follow your order.

6

### Activate My Account

Finally, you're on your way to stay connected, right? Make sure you activate "My Account" where you can manage your plan details and keep up to date on Assurance Wireless news. That's the way to go.
