

Staking Cardano Using Daedalus

Setting Up Your Wallet

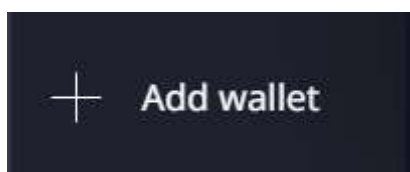

Download Daedalus wallet <https://daedaluswallet.io/> (Always use only the official source)

Install the wallet, run and allow to sync to the blockchain.

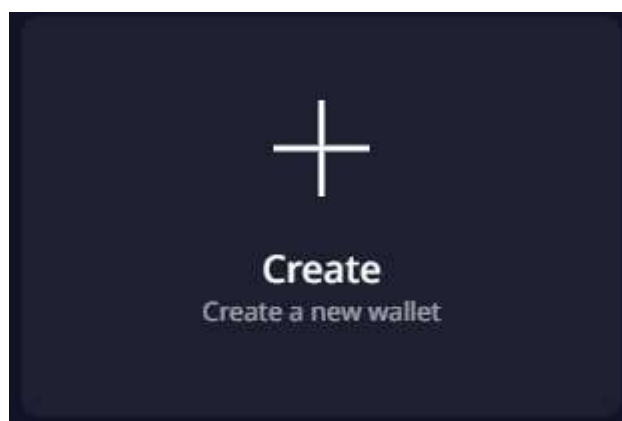

Once this is complete you will see a tick in the top right corner

Click 'Add wallet' at the bottom

Then 'Create'

Enter a name for your wallet and a spending password and click 'Create Shelley wallet'

CREATE A NEW WALLET ×

Wallet name

Spending password

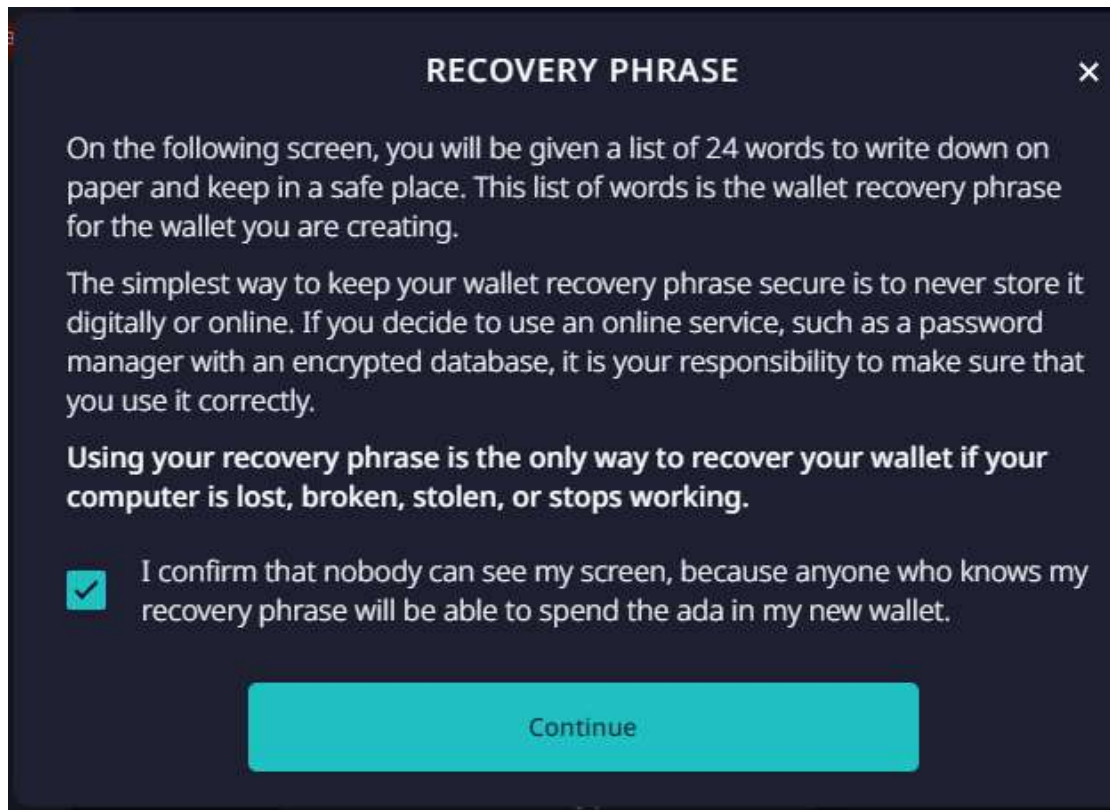

Keep your wallet secure by setting a spending password

Enter password **Repeat password**

The password needs to be at least 10 characters long.

[Create Shelley wallet](#)

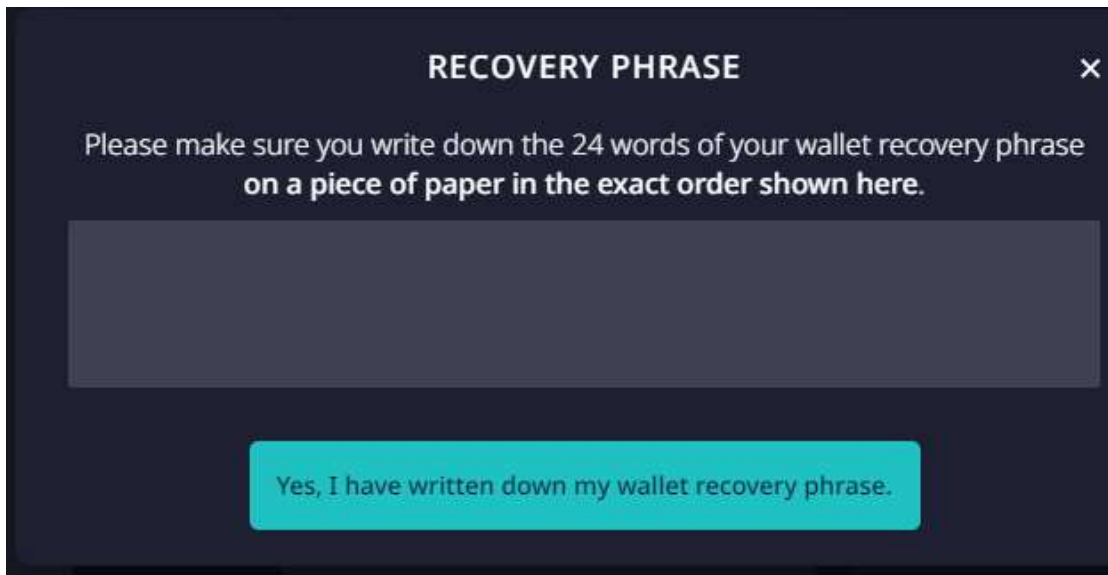

Read the information carefully, tick the box and click 'Continue'

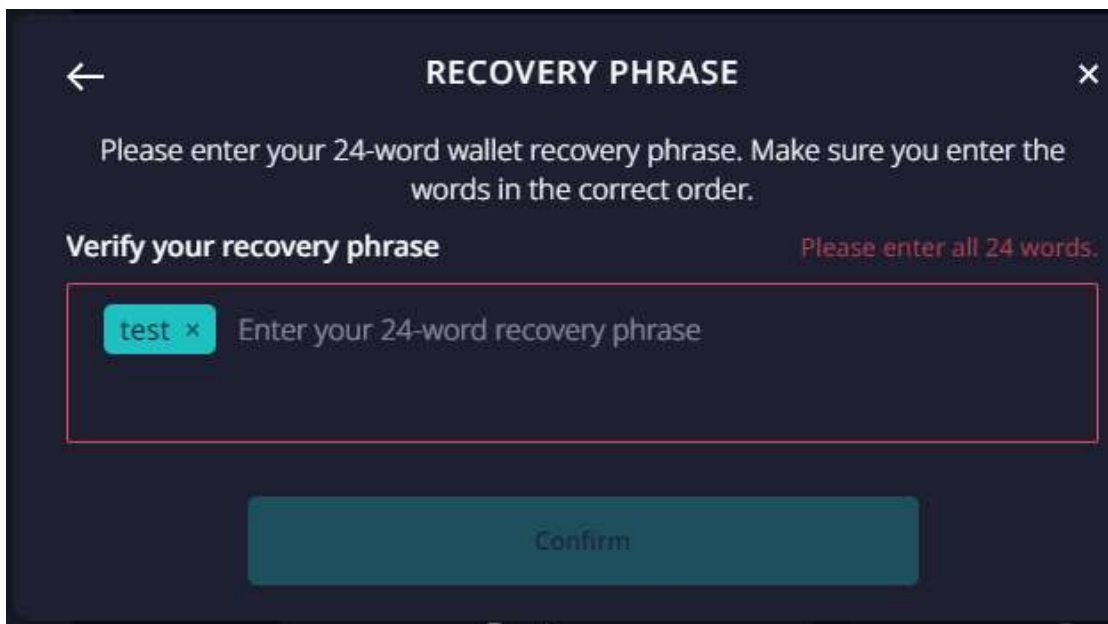

It is ESSENTIAL that you keep your recovery phrase safe, backed up if possible and NEVER share with anyone.

If anyone asks for your phrase they are a scammer.

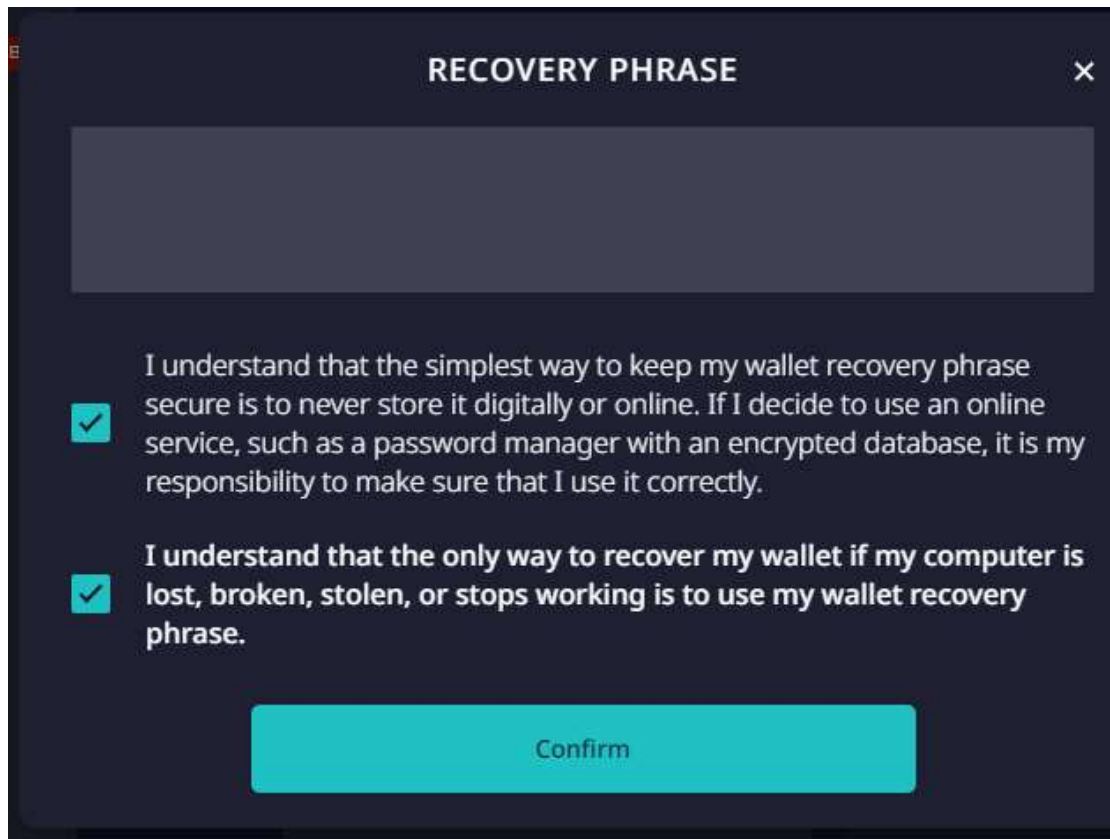

Once your phrase is recorded, click 'Yes, I have written down my wallet recovery phrase'

You will then have to reenter in for verification. Once you have entered, press 'confirm'

Read the information, tick the boxes if you are happy and click 'Confirm'

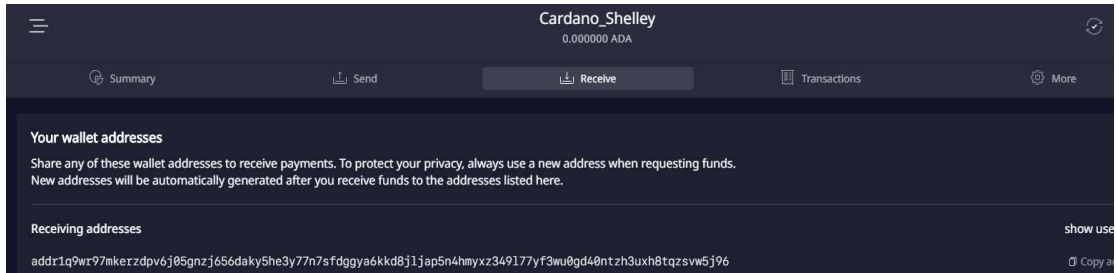

Wait until the wallet is fully in sync with the blockchain

Funding your wallet

Go to the Receive tab and fund your wallet using one of the receiving addresses

Delegation and Earning Rewards

Rewards are distributed automatically to your wallet after you have delegated your ADA to a stake pool. This is always done from a trusted wallet and your ADA stays in your wallet and control. NEVER send ADA to anyone for delegation or to anyone you do not know or trust.

Open the delegation centre by clicking the icon on the left of the screen

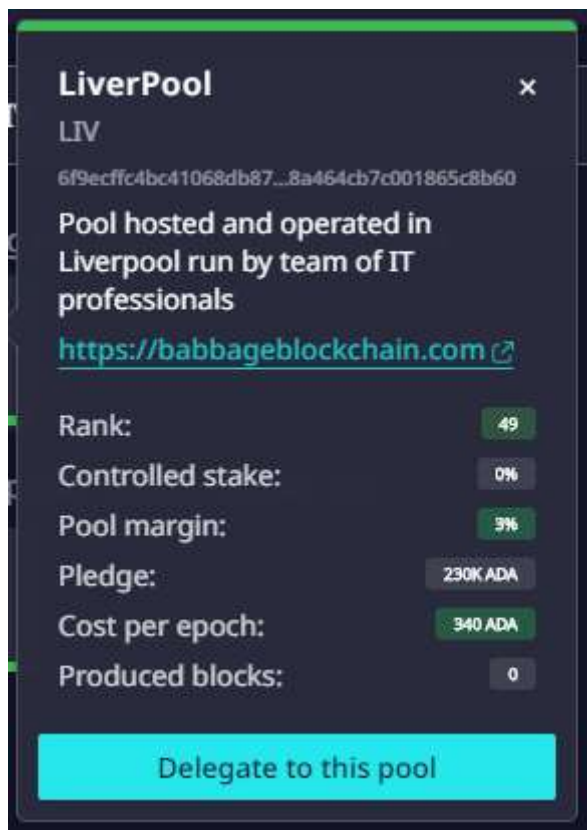

Select the wallet that you have created, this will rank the pools for you based on the amount in your wallet

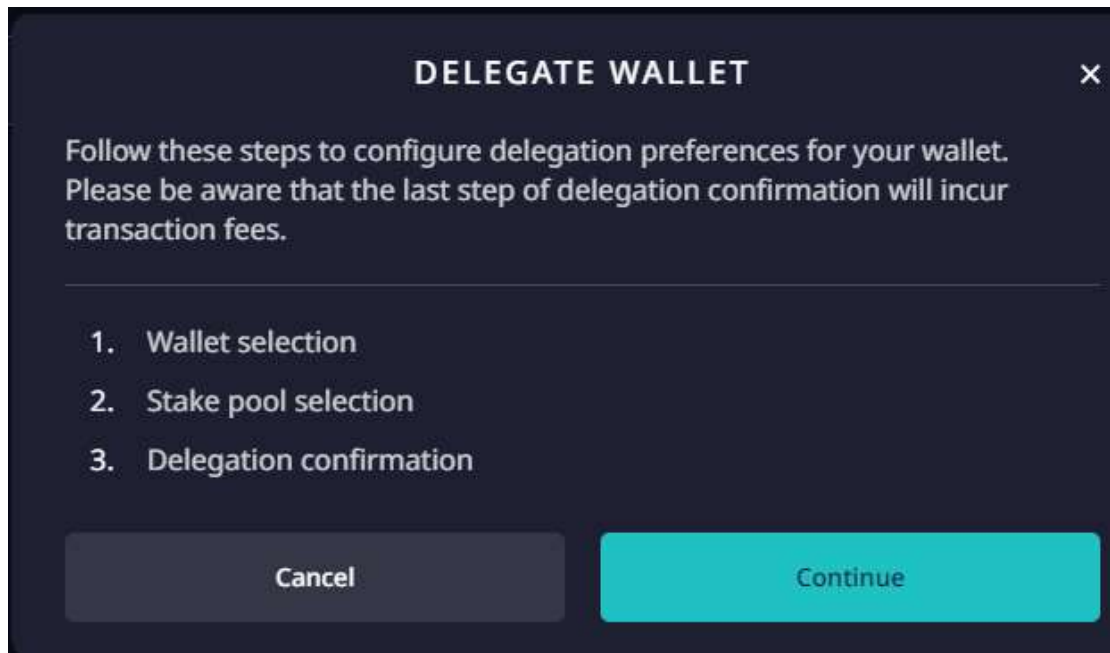

Alternatively you can search for your favourite pool

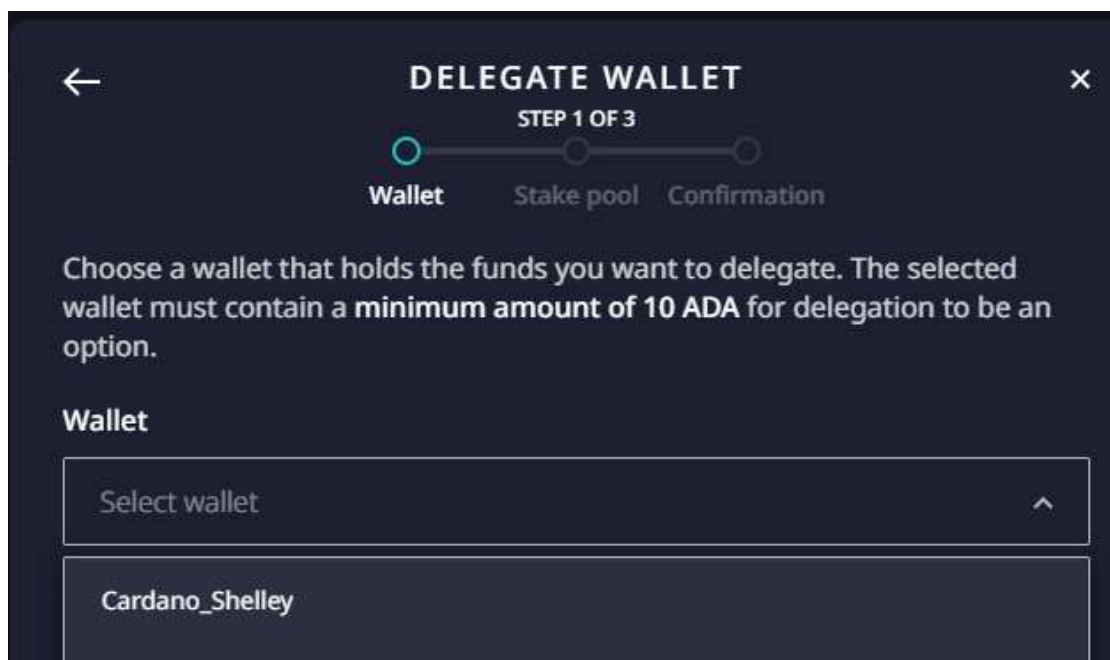

Click on the pool icon (LIV in this example), then 'Delegate to this pool'

Read the instructions, then press 'Continue'

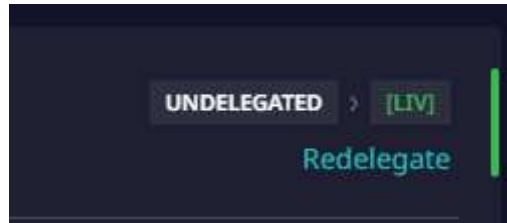

Select the wallet that we created earlier, then press 'Continue'

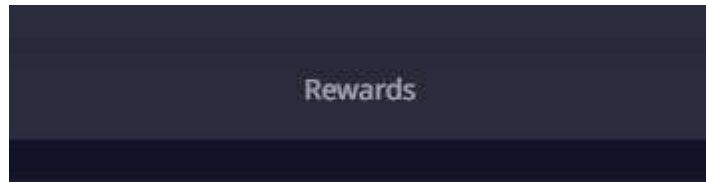

Enter your password and press confirm. Wait for a few moments for the delegation to complete.

In the Delegation Centre, you will now see that your ADA is delegated to your chosen pool

Please Note - You will have to wait 2 Epochs for your initial delegation to take place, after this time you will begin to see rewards appear.

Check back periodically in the 'Rewards tab' to see your earnings. These can be spent and withdrawn at any time.
