

ZENERIC LLC

Service-Disabled Veteran-Owned Small Business | Reverse Engineering & Technical Data Development

CAGE: 9CZV2 | UEI: U74CSEMM8997 | NAICS: 541330 | PSC: R425

COMPANY OVERVIEW

Zeneric LLC is a Service-Disabled Veteran-Owned Small Business resolving Diminishing Manufacturing Sources and Material Shortages (DMSMS) and obsolescence challenges for defense sustainment programs. We support development of manufacturable Technical Data Packages (TDP) and Source Approval Request (SAR) pathways that enable competitive re-sourcing of legacy DoD components across NAVSUP, NAVAIR, and DLA sustainment portfolios, converting sustainment risk into structured, executable engineering solutions.

CORE COMPETENCIES

- DMSMS identification, risk assessment, and mitigation planning
- Obsolescence resolution through reverse engineering coordination
- Manufacturable Technical Data Package (TDP) development support, structured to MIL-STD-31000B Level 3, with GD&T applied per ASME Y14.5-2018
- Source Approval Request (SAR) pathway support
- Engineering analysis support for legacy component replacement
- Technical documentation review and completion support
- Program coordination and deliverable tracking for engineering support tasks

STRATEGIC FOCUS

- Navy and DLA sustainment programs with active DMSMS requirements
- Defense components with limited or discontinued OEM support
- Legacy systems requiring technical data reconstruction for competitive sourcing
- SAR-eligible NSNs where engineering coordination accelerates qualification
- Programs within NAVSUP, NAVAIR, and DLA sustainment portfolios

PAST PERFORMANCE

Department of Commerce — Bureau of Industry and Security

Subcontract | NAICS 541519 | Federal Technical Support Services
Active federal subcontract delivering compliance-focused technical services in a federal contracting environment.

CERTIFICATIONS & REGISTRATIONS

- SAM.gov — Active Registration (expires Mar 2027)
- SDVOSB — Registered with SBA.gov
- JCP Certified — DD Form 2345 (valid through Mar 2031)
- DLA Enhanced Validation (DEV) — Approved Mar 2026 (valid through Mar 2029)
- Access to DLA export-controlled military critical technical data (DIBBS / cFolders)
- RPPOB-100 Approved — DLA Source Qualification
- Small Disadvantaged Business (SDB) — Self-Certified
- Minority-Owned Small Business — Self-Certified
- CMMC Level 1 — Self-Attested
- Member, Defense Industrial Base Consortium (DIBC)
- Member, Maritime Sustainment Technology & Innovation Consortium (MSTIC)
- Member, ARM Institute

DIFFERENTIATORS

- SDVOSB — eligible for set-aside and sole-source awards under FAR Subpart 19.14
- Veteran technical background: Navy Electronics Technician; USS Enterprise, NCTAMS LANT, White House Communications Agency
- Direct owner-operator engagement on all contracts — no subcontracted management layers
- Hampton Roads defense ecosystem: Naval Station Norfolk, NNSY, HII, NASA Langley, JEB Little Creek, Fort Eustis, Coast Guard Sector Hampton Roads
- Federal contracting infrastructure active: SAM.gov, WAWF, PIEE, GPC-capable
