

Wildlife and Plant Field Surveys

1. Early project clearance surveys for key wildlife and plant species to support Environmental Impact Assessments and baseline data
2. Threatened and Endangered Species surveys and biological assessment preparation
3. Migratory Bird and Bald/Golden Eagle surveys and incidental take avoidance support
4. Weed detection and mapping
5. Habitat evaluations

Wildlife, Plant, and Ecological Monitoring

1. Construction monitoring
2. Easement monitoring
3. Rangeland health, inventory, and monitoring

Conservation Planning and Strategy

1. Inventory and assessment of existing habitats
2. Determining site potential for restoration and develop restoration goals
3. Development of alternatives to meet restoration goals
4. Assistance with implementation
5. Long-term habitat management guidance and support

Information and Technology

1. GIS mapping and field data collection
2. Survey form development, specific to survey/monitoring needs
