ART INFO

Vector: EPS, AI, PDF, SVG. These files are usually made in Illustrator. Just because these files may have this extension doesn't mean they are always Vector. Some times raster images will be placed within these file extensions and look like they are Vector. One way to tell is to open the file and zoom all the way in, if you can't see individual pixels, its vector.

Raster: JPG, PNG, TIF, BMP, PSD. These files are created in either Photoshop or Corel. These are set to a specific pixel dimension (resolution), measured in dpi or ppi (dots per inch/pixels per inch). If I have a 3x3in file at 300dpi that means I have 900pixels x 900pixels, which is a lot of information that allows you to zoom in quite far before seeing the pixels. If I have a 3x3in file at 72dpi that means I have 216pixels x 216pixels, which is much less information resulting in a lower quality imprint.

RGB vs CMYK:

RGB Color: Is Light Based color. "Additive". Monitors and TV screens project color in the RGB color spectrum. 16+ Million different color combinations are possible. RGB is how our eyes perceive color as well. The color of an object is determined by the light, in the RGB color spectrum, that it reflects and cannot absorb.

CMYK Color: Is Print based color. "Subtractive". The more colors of ink that you mix together, the more the color is absorbed and less of it is reflected. So if we mix all the colors (cyan, magenta, and yellow) together we will end up with black, since all the colors are absorbed and nothing is reflected back. We unfortunately cannot print with light waves, RGB, so anything you see printed is a form of CMYK (Subtractive) ink. CMYK files can be converted to RGB but will not have the same vibrancy of an original RGB file of the same file.

PMS Color Matching: Only Screen print can match PMS colors.

Tone on Tone: Embroidery can be done lighter, darker, or closest to garment color. Must be specified.

TERMS & CONDITIONS

- **Production Time:** Standard production time is 10 business days from when both art is approved and garments are received. (Times subject to change based on production load.)
- **Unclaimed Garments:** Garments that are in On Par Inks possession for more than 90 days become the property of On Par Ink. Misprinted garments become On Par Inks property after 30 days. It is the customer's responsibility to claim any garments before these deadlines.
- **Disputes of Quality:** Claims must be made within 30 days of the order being shipped by On Par Ink.
- **Shipping Charges:** Shipping charges are calculated based on the actual weight, Box Size, distance traveled, declared value, and type of shipping method that is standard or requested. On Par Ink is not responsible for estimates on shipping charges. \$5 per box plus freight.
- **Garment Reaction To Heat:** Some brands of garments will curl and shrink when exposed to heat. This is a risk inherent in the nature of the garment that On Par Ink cannot take responsibility for or control.
- **Damage/Spoilage:** We reserve the right to credit, instead of replace damaged items, for the actual cost of damaged items up to 2% of the order.
- **Dye Migration Warning:** Polyester and nylon dye migration happens when the dye in the fabric of the garment permeates through the ink and causes discoloration of the ink. Dye Migration may appear hours, days, or weeks after the ink is cured. On Par Ink cannot control dye migration and the customer must accept the risk of it when printing on polyester, polyester blends, camo hex, tie-dye, pigment dyed, and nylon goods. On Par Ink takes every precaution to prevent dye migration.
- **Art/Proof Revision Fees:** If revisions to proof or art are requested due to changes made by the customer, there will be a \$50.00 charge for each additional change. 1st change will be done free of charge. A customer requesting a proof without an order in house will be charged \$25 per proof. If an order is submitted using that proof we will credit that money back to your account. If after 30 days the proof doesn't become an order you will be billed.
- **Cancellations/Revisions:** Order cancellations or revisions must be confirmed in writing prior to release of order to production. For non-produced cancellations, any associated costs leading up to the time of cancellation will be invoiced accordingly. (i.e. art proofs, art setups, etc.)
- **Printing on Youth AND Adult Garments:** If different sized imprints are needed for printing the same design on youth and adult garments, then print charges will be based on separate runs. However, an imprint size can sometimes be used to print on all sizes, resulting in combined pricing, and the imprint will be sized to max out on the smallest sized garment. The request for separately sized designs must be stated on your PO otherwise the standard is one size for all.
- **PDF-Proofs:** New Designs over 12 pieces will receive a PDF proof at no charge. It is up to the customer to review the proofs with great attention to detail to guarantee they are correct before approving. On Par Ink will not be responsible for errors in approved proofs and will produce as seen in approved proof.
- **Individual Unbagging Fee:** Items that come individually bagged or slip sheeted will be charged \$2 per dozen and rounded up to the nearest dozen.
- **Bulk Shipping:** We do our best to combine all orders for bulk shipping. Any orders shipped separately will be paid by the customer.
- **Outbound Sorting Fee:** Purchase orders with more than 3 shipping manifests will be charged a \$0.50 per item sort fee.
- **Personalization:** Personalization must be supplied in a typed Excel or Word Document noting which names or numbers go on what garment (noting size, color, type, etc). Names will be decorated as received, we are not responsible for mis-spellings of names or incorrect numbers if it was received as such.
- **Receiving Product Delays:** During busy times receiving can be delayed up to 24hrs.
- **Receiving Issues:** If the product received does not have a matchable PO# in our system, (ex. Order states PO# is "123456-Test" and product received says "Test" or "123456" or "123-Test", it will not be a match to an existing order in our system) the order will be delayed until we can find the order in our system it matches up to. On Par Ink will not be held responsible for delayed orders due to mismatched PO#'s. To prevent this issue, please ensure your PO# is on the product being sent to On Par Ink as well as the SAME PO# as the order sent in.
