About Us

Green projects

Equipment, infrastructure and working capital projects.

Non-bank Financial Intermediaries

About Us

We are a team of expert professionals, committed to our clients, always looking for the best alternatives for the success of small producers, micro, small, medium, large companies, non-banking financial intermediaries, Higher Education Institutions, CSOs, Research Centers and Government entities, among others.

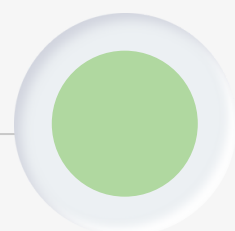

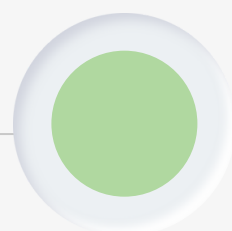

Our Brief History

05

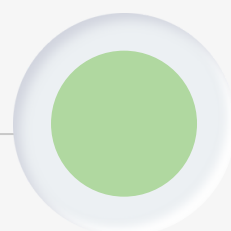

Ecoprodel
Began
2009

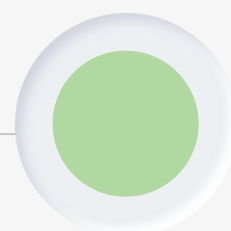

2009 - 2016
Research and
investment projects
RENIECYT

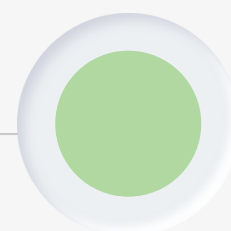

Funding big
enterprises
2017

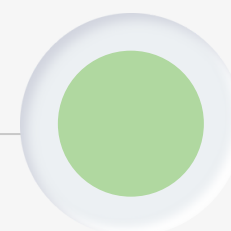

2018
Our team expanded
its international
funding sources

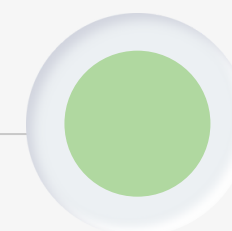

Our team expanded its
funding sources with
private equity funds.
2019

2020
We achieved our recognition in
Connectamericas, the business
network of the Inter-American
Development Bank

Our team expanded its
sources of financing from
micro, small, medium and
large companies. Our first
own financial arm arises for
MSME's.
2022

Our Main Mission

Contribute to the improvement of the sustainable development of companies and their territories, through the multidisciplinary planning of the elements, from the approach of the General Systems Theory (TGS) and the approach of Environmental, Social and Corporate Governance (ESG) criteria.

Our Core Values

Service

Go the extra mile in helping our clients achieve their goals.

Innovation

Be at the forefront of trends, strategies and technologies when it comes to funding sources.

Diversity

Grow an impressive portfolio of diverse brands as clients and business partners.

Green projects

- 1.- Projects with sustainable processes
- 2.- Reduce resources: reduce waste and pollution by changing production and consumption patterns.
- 3.- Innovate in the development of alternatives to technologies
- 4.- Technical assistance by the European Union

Equipment, infrastructure and working capital projects

Equipment, infrastructure and working capital projects, short, medium and long term, for all economic activities. Giving support to all the production lines that make up its value chain, from primary production, industrial process and marketing.

Non-bank Financial Intermediaries

We look for the best solutions to legal financial institutions that can grant credit, leasing and factoring, better known products, which may or may not be regulated.

Tailor-made financing

We seek the best financing structure for our clients.

What do we offer?

Present various financing proposals, according to their projects and the needs of the companies, in favorable market conditions, that are efficient, capitalizable and with preferential guarantees, with a great perspective.

Some financial sources

06

What can we offer?

- We have no minimum or maximum amount for financing.
- The origin of the resources can be national or international.
- International resources are aimed at large companies, mainly. In addition to their needs for working capital, machinery, equipment or infrastructure, we offer non-reimbursable resources for their green projects and institutional strengthening.

Financial conditions

Depending on the project:

- There may be a capital grace period.
- National currency, USD or currency of your choice.
- It is defined according to the risk and benchmarking of its debt profile.
- The payment of the loan can be short, medium and long term.

**We have virtual offices
in more than 3,000
