# INTRODUCTION

## Introduction & Purpose

The USA Historical AFV Register is intended to provide a cataloging of all of the historical Armored Fighting Vehicles (AFV), including tanks, APCs and self-propelled artillery, etc that are on preserved or otherwise displayed in museums or as monuments in the United States. As such the registry ranges from the World War I-era Skeleton Tank to modern M1 Abrams tanks. However, the registry is not intended to include modern AFVs that are still in service.

## Format

The USA Historical AFV Register is organized by state and city or town as follows.

### STATE

#### CITY OR TOWN

Location (GPS Coordinates)

AFV Model                      Man./User              status      Notes and/or location

Man./User denotes the original manufacturer (country) and various users, using three letter country codes.

Status is denoted by one of the following codes.

ind = indoor display

out = outdoor display

std = stored (this can be either indoor our outdoor storage, but clearly not on display)

wre = wreck (typically vehicles recovered from a target range or simply in very bad condition)

Often, if there are a large number of AFVs on display in a particular town or military post, sub listings are also provided, organized by location - museum, building, road, etc.

Many of the vehicles listed as "Unconfirmed" are from the "Central Registry" of donated vehicles maintained by the U.S. Army's Tank-automotive and Armaments Command (TACOM). Many of these vehicles donated to American Legion and VFW Posts may actually be located in local parks. Additionally, many of the "Unconfirmed" World War II era vehicles – such as Sherman and Stuart tanks – have since been moved or may no longer exist.

Additional information about a particular vehicle is often included in footnotes.

Serial Numbers (SN) and Registration Numbers, aka "USA" numbers (RN) are given when available. Note that many M60 tanks have two SNs, the original one as built and an Anniston Army Depot (AAD) rebuild SN (which ends in an A) or a Mainz Army Depot (MAD) SN (which ends in an M). For British and Canadian WWII era vehicles, War Department (WD) Numbers are given when known, as are post-war Vehicle Registration Numbers (VRN) for British vehicles.

## Sources

The USA Historical AFV Register is compiled from a number of sources. Firstly, the register is an expansion of Leslie Delsing's [Wrecks and Relics in the USA](#) tank registry, posted to the [AFV News Discussion Board](#) on 22 May 2006. The register has also been greatly expanded thanks to armyjunk2 and his copy of the TACOM Central Registry. Some of the other notable online sources include the Waymarking Military Ground Equipment Displays site, the former [Tanks for the Memories](#) geocaching site, [The Sherman Register](#), [Toadman's Tank Pictures](#), Trevor Larkum's Preserved Tanks, Robert Buettner's [War Memorials of Wisconsin](#), and Don Moriarty's [The History of the Ontos](#) as well as forums and message groups such as the [AFV News Discussion Board](#), [G104](#) (the Sherman Register mailing list), [G103](#) (dedicated to Stuart tanks), and [G136](#) (dedicated to M8 Greyhound and M20 armored cars). Where possible, the origin of information on a particular vehicle is denoted in footnotes. A large number of individual contributors, many of which are credited throughout the registry, have provided invaluable information.

## Note

All Serial Numbers, Registration Numbers, War Department Numbers, Vehicle Registration Numbers, etc come from the public domain or directly from the owner with permission. Public domain includes publicly visible areas of the vehicle (commonly stamped or marked on the exterior) when on display, data plates if visible/open to display, or other public domain forums and sources (such as reference works, the AFV News Discussion Board, G104, Sherman Register, etc).

## Special thanks

Special thanks goes to Pierre-Olivier Buan and Silvio Iacuone, who took the time to check this version for errors and added both valuable information.

## Contact

If you have any comments or corrections, please send them to Michel van Loon at [afvregister@gmail.com](mailto:afvregister@gmail.com), or simply post to the [AFV News Discussion Board](#).

<sup>21</sup> Prototype.

<sup>22</sup> Missing tracks.

<sup>23</sup> Joe DeMarco (G104, 4/2004).

<sup>24</sup> Burnt out. 1 of 9 known US surv. Information from Joe DeMarco (G104, 9/2004).

<sup>25</sup> Used by the French army, carried the name "Niederbronn" (probably in honor of a WWII Sherman of the same name). Was later used as a monument in Bad Kissingen by the 14th Armored Cavalry Regiment and 1st Squadron, 11th Armored Cavalry Regiment. Arrived at APG c1/2006. SN from Joe DeMarco (G104, 3/2006).

<sup>26</sup> This tank has an HVSS suspension and a 76mm gun. It was built by Fisher and is SN 69278, accepted in May 1945, the final month of production (Joe DeMarco). It is one of two pilot models that were built on British request.

<sup>27</sup> Kurt Laughlin (G103, 6/2003). See also Hunnicutt, Stuart (San Francisco: Presidio Press, 1992), 364.

<sup>28</sup> Only survivor.

<sup>29</sup> Without guns.

<sup>30</sup> Used to be on the mile of tanks in Aberdeen Proving Ground MD, date of acquisition 20/06/1950 (Rick Eshleman, Afv Discussion Board, 07/2015)

<sup>31</sup> Slugger, has RN 40177404 (Joe DeMarco, G104, 4/2004). Formerly at the US Army Ordnance Museum, Aberdeen Proving ground, Md. M36 Serial Number 76 didn't have a main gun muzzle brake installed at the factory. It is thought that the muzzle brake was installed and tested on this tank at Aberdeen Proving Ground, and that it was retained in the museum's collection

<sup>32</sup> Has 3 shocks per side. Training and test vehicle used at Yuma Proving Ground, according to the Ordnance Museum Guide CD. Earliest known existing M60. Unique shock configuration identified by Joe D (12/2006).

<sup>163</sup> Former range hulk

<sup>164</sup> Former range hulk, Removed for recovery training use?

<sup>165</sup> The M4A1 is not SN 525. It is a number related to the hull only, the 525th hull cast by Continental-Hubbard factory. From Joe DeMarco: The SN number of the Chino is unknown, since it doesn't have its dataplate. However, it has the loose build number 786 stamped in to the side of the hull in the rear. I think it was assumed that that was the tank's SN number, & that is how it came to get the USA Number 3015543. As best I can determine, 786 means that it was the 786th Pressed Steel Car cast hull. (They were making welded hull M4s at the same time.) If I'm correct, that tank would have been accepted in January, 1943, and the SN Number would have been in the 110XX range, & the USA Number would have been in the 30160XX range.

<sup>246</sup> "Barfly"; Has RN 30116372 (Jeff Button). SN identified by Joe DeMarco. Formerly at 4th ID Museum Fort Hood. This is one of 525 M4A3(76) VVSS manufactured by Fisher, it was remanufactured to HVSS in the 1950s.

<sup>247</sup> Built by Fisher as a M4A3(75) VVSS in December 1944 (Jim Goetz). Of interest on that unit is that the spacers for the gun travel lock were apparently removed from a Jumbo & retrofitted to a regular M4A3 hull. This seems like more trouble than it would have been worth simply to make a display tank. It may have been done by a remanufacturing firm to make a useable post war Sherman.

<sup>268</sup> built by Chrysler in October, 1944. Formerly owned by Fred Ropkey. When the tank was restored, the Serial Number was painted as the USMC Registration Number, but this is incorrect as this RN was not used for a USMC Sherman. The USMC had its own registration number system, which towards the end of WW2, consisted of 6 digits, beginning with "10".

Believed to be the first pilot, which was located at Aberdeen Proving Ground until at least 1946, then at Fort Belvoir by at least 1951. The T28 was "lost" for about 20 years (believed to have been scrapped) until it was found at the Combat Developments Research Lab range at Fort Belvoir in 1975. After its re-discovery, the T28 was recovered by the Patton Museum. The other, second T28 pilot is believed to have been destroyed by fire during testing at Yuma, Arizona 1946. <sup>401</sup> Formerly behind the Patton Museum. The NACM's Panzer III is one of the 450 Ausf. F variants produced. However it is unique. Ausf. Fs were originally produced with the 37mm KwK 36 L/45, though later this was upgraded to the 50mm KwK38 L/48. Our Ausf. F was upgraded later in its service to the longer and more powerful 50mm KwK 39 L/60. It also received numerous armor upgrades, including reinforced armor on its front upper hull and the addition of Schurzen (skirts) to the turret. This makes this particular Panzer III Ausf. F appear closer to the later Ausf. J standard. However, her "Fahrgestellnummer" (chassis number) of 61266 reveals her true identity. Her interior is relatively untouched since World War II.

The turret is probably the one sent by Great Britain to the United States in 1944/1945 (along with a sister sent to Canada) and originally mounted on an M4A3 Sherman for test by the AGF Board and the Ordnance Department, according to Mark Hayward, Sherman Firefly (Essex, England: Barbarossa Books, 2001), p 145, 153 and David Fletcher, Military Ordnance Special No. 19 Sherman VC M4A4 Firefly (Darlington, MD.: Darlington Productions, 1997). If so, the placement of the turret on this M4A2 appears to have been done post-war. <sup>557</sup> This M60A1E2 originally was used at Fort Knox Armor Evaluation Board. One of four LP tanks used to test and evaluate the concept and pictured in "Patton" by RP Hunnicutt. This tank along with her sisters paved the way for our modern Fire Control systems that went into the XM803, M1, and M60A3. In my opinion a piece of Armor history worth saving (Joe Daneri).

<sup>592</sup> "4th Armored Division General Sherman Tank Knocked Out During the Battle of the Bulge Dec. 16 1944 - Jan.23 1945" is painted on the (4 inch?) slabs of (German?) armor welded on the hull sides. Battle of the Bulge casualty seems doubtful in that the up-armoring process didn't commence until February. The glacis armor was taken directly from another Sherman, complete with hull lifting rings as well as headlamp and gun travel lock fittings. According to Joe DeMarco, with no prospect of further deliveries of Jumbos, in February 1945, the Third Army embarked on a program to "up-armor" its M4A3(76)s (P-O Buan).

<sup>731</sup> SN By Joe\_D, Afv Discussion Board, 04/2011

<sup>732</sup> Build by Ford in may 1943 as a M10A1, RN 40469XX witch is a Ford M10A1 registration. It was later converted to M36 probably by Montreal Locomotive Co. This is an ex-Yugoslavian Army vehicle, probably equipped with a T-55 engine. Has the E9 spaced out suspension. Serial by David D. Jackson

<sup>733</sup> In bad shape?

<sup>734</sup> Or 48754, Fisher build. The appliqué armor on the side was most probably applied to repair a damage, as the tank might be a WW2 combat, It was formerly displayed at Ferris Barracks, Erlangen, Germany (Joe deMarco).

<sup>735</sup> Identified by Scott Moore (11/06). SN identified by the TACOM Central Registry (8/2007).

<sup>766</sup> This is one of the few places where they actually have a power plant co located with a tank, and outdoors at that. Without trying to sound like a nitpicker, that engine/transmission combo is not for an M60 (A0). The engine is an AVDS-1790-2DA and the transmission is fitted with Hydro-mechanical brakes on the output shafts. It's a 2DA engine based on the 300 amp air cooled generator, easily identified by the air ducting running to the forward part of the engine from it. The large oil coolers, electrical harness connectors and starter relay located on top of the engine make it a "D" model with this generator. The tubing running from the exhaust stacks along the top of the oil coolers is for the VEDES system (Vehicle Exhaust Dust Ejection System). The "A" in 2DA is for VEDES equipped. These particular engines were installed in late model M60A1 RISE Passives, M728A1 CEV's and M60A1 AVLB's. M60A0's had only Mechanical brakes and were never issued with the VEDES system. The tank itself has the earlier aluminum air cleaner units too, only the armored units were equipped with VEDES. The Kansas National Guard never had M60A1's, they went from M60A0 to M60A3's. Most likely this pack came from an M60A1AVLB or M728A1 CEV, since they were in the inventory long after the M60's were retired (Joe\_D Avf Discussion Board, 02/2015).

<sup>987</sup> AAD rebuild. SN identified by the TACOM Central Registry (8/2007)

<sup>988</sup> This tank is definitely an odd ball. Hull has small drivers hatch and does not have the turntable opening for the M24IR driver's night sight. All M103's had the night sight, part of BII. Makes her one of the early T43/43E1 tanks that didn't get upgraded to M103 standards. RN number is bogus, missing a digit and all wrong. Shame, might help ID her. Of the initial batch of T43E1's all but 6 were converted to M103. The remaining 6 we kept for testing. Some hulls were used for experimental turrets like the T57 and T58. Others for testing upgrades to automotive and turret improvements eventually for use in M103A1 and A2 Tanks. Based on these pictures I'd bet the hull was one of those 6 and eventually was used to test the AVDS-1790 set up used in the M103A2. The turret looks like an M103A1. Cupola and lack of searchlight fittings indicate so, but with these pictures I can confirm it's not an M103A2. The bulge located under the turret bustle where the gunner was originally located in the M103 is complete. When they converted M103's to A1's they moved the gunner forward but the bulge remained. When upgraded to M103A2 standards they had to cut part of the bulge off and plate it over in order for it to clear the newer, higher rear deck. This one isn't cut. Just wish I had a better image of the sight housing opening and top of turret. There is an odd chance this tank started off as a T43E1, then was used to make one

of the pilot T43E2/M103A1's, then eventually was used to test the M103A2 diesel setup. Also could be they stuck this excess M103A1 turret on this hull that was used for all sorts of experiments. That's the problem with the standard 85" turret ring. You can plop any turret with the same diameter on it for display, Covers M48's all the way to M1A2SEP version whatever. <sup>1424</sup> Currently at Fort Drum for Repainting. The M4A3 "Sherman" tank outside the New York State Military museum was formerly a display piece at the New York State Armory in Carthage, N.Y. prior to the armory closure. The tank sat outside the armory for approximately 20 years. The specific history of this vehicle has been lost. Presumably the tank was used by New York National Guard Soldiers of the 27th Armored Division or the 42nd Infantry Division during the 1950s.

<sup>1590</sup> Build by ALCO in March 1944

<sup>1591</sup> Build by ALCO in June, 1943. Formerly at Aberdeen Proving Ground

<sup>1592</sup> Identified by Dustin Roderigas (3/2007).

<sup>1593</sup> Formerly at Fort Knox, KY. This vehicle is one of the original vehicles which became the Patton Museum in 1948 (Dontos, Afv Discussion Board, 09/2010).

<sup>1594</sup> Formerly at the Ordnance Museum, Fort Benning and before that at the Patton Museum, Fort Knox, Kentucky

<sup>1595</sup> Recovered from Tunisia. Ordnance Museum Guide CD and Tank Data, 125. Formerly at Aberdeen Proving Ground

<sup>1596</sup> Believed captured from Italian forces in North Africa, Ordnance Museum Guide CD.

<sup>1597</sup> Recovered from Italy. Ordnance Museum Guide CD and Tank Data, 111. Formerly at Aberdeen Proving Ground.

<sup>1598</sup> Missing muzzle brake. Formerly at Aberdeen Proving Ground. Also features "additional appliqué armor." Recovered from ETO (Ordnance Museum Guide CD, as well as Tank Data, 79).

<sup>1599</sup> Formerly at Aberdeen Proving Ground

<sup>1600</sup> Captured either on Luzon in the Philippines or on Okinawa, according to conflicting sources. According to Andrei M. Tomczyk, Japanese Armor, Volume 5 (Gdansk, Poland: AJ Press, 2006), p 4 (and supported by Preserved Japanese Tanks, p 27), the Ho-Ni served with the "2nd Company, 2nd Self-Propelled Artillery Regiment, and captured by the American 37th Infantry Division near Aritao (Luzon, Philippines) on April 6, 1945." However, Ordnance Museum records and the Ordnance Museum Guide CD claim it was captured on Okinawa from the 27th Tank Regiment. Formerly at the US Army Ordnance Museum, Aberdeen Proving Grounds, MD

<sup>1601</sup> Only survivor? CannonArtillery.com claims it is the last of three built.

<sup>1602</sup> "King Kong", behind the fence a few years ago it was taken 'behind the fence' for painting. Once there, however, the T92 was dismantled, the chassis is nearly intact (Museum Ordnance, March 1994). Formerly at Aberdeen Proving Ground

<sup>1603</sup> M53 pilot, formerly at Aberdeen Proving Ground

<sup>1604</sup> RN from Dustin Roderigas (3/2007).

<sup>1605</sup> SPH1 firing prototype. One of two Crusader prototypes built. Fate of SPH2 mobility prototype unknown.

<sup>1614</sup> Identified by the TACOM Central Registry (8/2007).

<sup>1615</sup> SN identified by the TACOM Central Registry (8/2007).

<sup>1616</sup> Former M60A1 SN 4018. GEN 2 hull with large escape hatch and late casting A1 turret. Someone had stenciled a bogus USMC registration number (579008) on the side. This tank was a former National Guard vehicle before retirement and had all the usual late model Anniston features to include the M68A1 105mm gun and forward thermal shroud as initially used on the M1. Also had modified torsion bar anchor plugs fitted with grease zerks. Typical late MWO done at MATE sites (Joe\_D, Afv Discussion Board, 02/2015).

<sup>1909</sup> New Guinea combat veteran. This tank was transported to Milne Bay, then transported by barge to Buna. It is one of the seven M3 Stuarts of the 2/6th Armored Regiment that were supporting troops of the 2/9th Infantry Battalion at Cape Endaiadere. On December 24, 1942 this tank suffered a hit to the driver's flap from one of the Japanese 76.2mm Type 3 Naval Gun emplaced at Buna Airfield (Old Strip). It was recovered from the Buna battlefield in mid-1973, and was transported to Port Moresby by barge. Then it was shipped to the Nimitz Museum to be displayed (<http://www.pacificwrecks.com/>) Identified by Kurt Laughlin (4/2007).

<sup>1910</sup> Identified by Kurt Laughlin (4/2007).

<sup>1911</sup> It is in a very poor condition, missing its wheels, tracks, suspension and many other parts" (Preserved Japanese Tanks, 7).

<sup>1912</sup> Originally arrived in the U.S. via Ogden Air Force Base, which was the initial point of research on captured war materiel, before being assessed at Aberdeen Proving Ground, Maryland. From APG it went to San Clementi Island, a target range for the U.S. Navy and Marine Corps" (Preserved Japanese Tanks, 7). See also The Restoration of Shinhoto Chi-Ha.
