

WE TRANSLATE YOUR SEQUENCING DATA INTO INFORMATION THAT CAN BE USED IN MOLECULAR MEDICINE, RESEARCH AND GENE THERAPY

GeneOmics Solutions stresses the importance of customer centric approach to Bioinformatic solutions and delivering Onsite, Offsite and Offshore solutions to our clients with minimal turnaround time.

GeneOmics brings world-class processes, personnel, and global expertise in Data analysis and support, and best practices to enhance the value of your application portfolio. These processes support a distributed delivery environment wherein work responsibilities are effectively assigned depending on the criticality of requests and strict adherence to Service Level Agreements (SLAs).

We provide

- Next Generation Sequencing Data Analysis
- Customized Pipeline Development for data analysis

We offer RNA / DNA Sample processing and Data analysis services at competitive prices and time scales.

We want to be the trusted partner for your Data analysis and development by providing scalable, flexible and hassle-free offshore sourcing capabilities.
