

Let's talk **PROFHILO** ✍️ ⚡

### What is Profhilo?

Profhilo comes under a new injectable category called bioremodeling. It is made of hyaluronic acid – which we have in our body naturally, it's what gives us 'plump', hydrated, tight skin. When injected, Profhilo gradually spreads through the skin, all the way down to the basal layer. It encourages collagen and elastin production, meaning powerful moisturizing, tightening and lifting properties from the most superficial skin layer down to the deepest skin layer! This results in:

- Improved skin laxity
- Reduced fine lines/wrinkles
- Remodelling of ageing/sagging tissue
- Hydration of all three skin layers

### Where can Profhilo be injected?

It can be used almost anywhere on the body! The most common areas are:

- Face/neck/décolletage
- Tummy/'mum tum'
- Upper arms/'bingo wings'
- Hands

### Who can have it?

This amazing treatment is suitable for most people and packages can be tailored to your need. It is perfect for:

- Clients aged 30 and above looking to prevent ageing or smooth skin/wrinkles
- Post-menopausal ladies looking to restore skin quality and hydration
- Anyone who is looking to improve their appearance but is not keen on botox/filler
  - Profhilo does not change the shape/movement of your face, keeping everything super natural!
- Clients who have regular upper face botulinum toxin (botox), Profhilo is perfect to help smooth skin and improve skin quality in the lower portion of your face/neck
- It is an excellent treatment to use in conjunction with dermal fillers
- It can also be used in younger clients looking for that 'glow' to their skin!

### Procedure/Appointments

- Minimum of two treatments are recommended 4 weeks apart
- Treatment time: 30 mins
- Back to work: Immediately
- Risks: Bruising/swelling
- Results: Last 6-12 months
- Maintenance treatment: Every 3-6 months

### How much does it cost?

- Single facial/neck treatment £225
- Second and third treatment £200
- Body – pricing dependent on area
