

There is more to life than politics, but politics controls much of our lives. It shouldn't !

Politics has many of us arguing among ourselves, costing us money, telling us what to teach children & excepting bad policies, etc. We aren't a herd of animals, we're humans. We are vain and proud to change. We're like those from our past. But we should be wiser? See what one politician did to try to make his times better.

Rome 49 BC v. United States of America 2023, Where is our Cato ?

" If you don't learn from history -you'll never predict the future." Einstein 1951

Who was **Cato the Younger** and have you heard of the Cato Institute? Cato, a Roman Senator was fighting crooked politicians in Rome, which included Julius Caesar. In an example of corruption, the Roman government had "**Senators & high-level citizens not paying taxes while Cato was in charge of the Treasury of Rome.**" WHY? Cato discovered politicians and some friends, opted out of tax payments with false legal excuses for not paying their taxes. Cato discovered they would apply to officials for relief when The Senate was in session and he himself had to be present. Absent Senators, believed no one would notice. Cato then passed a law that stated; " tax exempt requests could not be addressed when the Senate was in session, allowing Cato to monitor forgiving tax issues. Julius Caesar and other friends of Cato were corrupt and disliked this action. However they all *respected Cato's integrity*. Rome was at the same place then, that America is today, the beginning of its possible collapse! Who is our Cato?

The principles of the **Declaration of Independence** and the **Constitution** are the bedrock of American values for individual liberty, limited government, & free markets. Freedom is fragile. The **Cato Institute** has been forwarding policies involving world peace, economic growth, health care, immigration, education, and above all *limited government since 1977* - **Who's listening?**
