Math & Language Labs Summer Session I

May 19 – June 18, 2026 | 9:00 – 10:30 AM Daily

Drop-off at backyard • Pick-up in front of house • Swim on Thursdays!

Optional add-on to Summer Camps | 5-Week Session | Tuesday, Wednesday & Thursday | Swimming included on Thursdays!

Group Math & Language Lab

AGES 4-14 | 9:00-10:30 AM | TUE, WED & THU | MON-FRI

Group Math & Language Lab combines the best of both worlds — a supportive, collaborative environment where students work through math lessons and practice while also exploring language through games, activities, and creative expression. Students receive tutoring and hands-on support in math through manipulative-based lessons and skill-building activities, while language time is filled with grammar, spelling, vocabulary, handwriting, reading, storytelling, reader's theatre, and collaborative writing. Each age group works in its own dedicated area to ensure a focused and age-appropriate experience for every learner.

Current Members continue their year-round learning path right where they left off. **New Members** complete a short assessment to find their starting point on our Math and Language Paths. **Prospective Members** may bring their own curriculum or complete an assessment and purchase materials. All manipulatives and non-consumables are available during sessions — members may also check out resources or access online options between visits.

Session Pricing

\$150

Full 5-Week Session

May 19 – June 18

Developmental Math & Language Lab

AGES 6-12 | 9:00-10:30 AM | TUE, WED & THU | MAXIMUM 4 STUDENTS

The Developmental Math & Language Lab provides consistent, personalized 1:1 support for students who benefit from focused, hands-on practice to build memory, fine motor skills, and concept mastery. Through a carefully curated combination of mental and physical activities — including visual discrimination, critical thinking, fine motor building, manipulative-based lessons, and skill-building games — every session is tailored to meet each student exactly where they are. Activities are always age-appropriate and aligned with the specific concepts the student is currently working toward mastering.

Curriculum is curated to fit each learner's individual needs, or families are welcome to bring their currently successful curriculum from home for consistency. **Current Members** continue right where they left off. **New Members** complete a short assessment for placement on our Math or Language Path. **Prospective Members** may bring their own curriculum or complete an assessment and purchase materials to use during sessions.

Session Pricing

\$200

Full 5-Week Session

May 19 – June 18
