

Collegian Notes

Tax Payment Due; Miller On Council

Monday is the due date for the final payment of 1967 estimated Federal income tax, according to H. Alan Long, District Director of Internal Revenue for Western Pennsylvania.

An amended declaration of 1967 estimated income tax may be required by Monday morning during the last quarter of 1967 that cause substantial increase or decrease in tax.

E. Willard Miller, professor of geography and assistant dean for resident instruction and continuing education in the College of Earth and Mineral Sciences, has been appointed to Advisory Council of the Institute for Mediterranean Affairs.

This is a non-profit educational, research and public information institute chartered by the Board of Regents of the University of the State of New York.

Grape juice is not the same as grape drink, according to Mrs. Ruth J. Beck, extension foods and nutrition specialist of the University.

To be labeled "juice," the product must consist of natural grape juice or juice and finely blended pulp. If sugar is added, this must be stated on the label.

John W. Slocum Jr., has been appointed assistant professor of management at the University. He is a graduate of the United States Naval Academy and received his bachelor's degree in management from Westminster College in 1962.

His master's degree in business administration was conferred by Kent State University, while his doctorate in business administration degree was received last March at the University of Washington.

IFC Winter Rush Goal: 100% Pledge Increase

By MARGE COHEN

Collegian IFC Reporter

Fraternity rush for Winter Term officially got under way Monday night. Open to any man of second term or higher standing.

More than 650 men have registered for rush, according to John Kiley, Interfraternity Council rush chairman. He added that rush registration will continue every day this week in the IFC office, 203 Hetsel Union Building.

IFC will also conduct registration Sunday in the residence hall dining areas, pending approval by the Men's Residence Council.

Last term, Kiley said, approximately 400 men pledged fraternities, but he said that IFC is aiming to double this figure with Winter Rush.

Most parties are open to rushees every Friday and Saturday night, so they should feel free to attend if they so desire," Kiley explained. He said that there are a number of rushees who have not yet made contact with fraternities because they have not attended fraternity functions.

Kiley said that University men should take advantage of the fraternity open houses to be held within the next several weeks.

Kiley also said that although a man needs either a cumulative or previous term average of 2.2 to pledge a fraternity, he need not have that average in order to rush. Pledging by students with low averages would not begin until after their averages have improved.

Bids to Winter Term rushees may first be extended January 22, and cannot be accepted until January 29. After these dates, bids may be extended and accepted throughout the term.

Questions concerning rush can be answered at the IFC office by calling 855-3455. For questions concerning a particular fraternity, rushees should contact the rush chairman of that house.

EACH OF THE NINE MUSICIANS IN THE BACH ARIA group is world-famous in his own right—so much so that each as a solo performer commands nearly the fee of the whole group. They will render portions of the tuneful, yet inspiring, music Bach wrote for Leipzig churches at 8:30 tomorrow night in Schwab. Tickets are available free to students at the Hetsel Union Building desk.

24 Sororities Participate

Over 400 Take Pledge

More than 400 coeds have registered for Winter Term pledge, the Panhellenic Council announced last night. The girls represent 24 sororities:

- Alpha Chi Omega: Susan J. Bonasutti, Martha Coppaluzzi, Linda C. Conroy, Leah S. Goffney, Carol A. Fricker, Sherry B. Goldstein, Joan K. McCoy, Joyce J. McQuinn, Nancy A. Nye, Barbara M. Sheedy, Judith L. Stoney, Joanne E. Turnbull, Peggy L. Wilson, Kathleen M. Kuhl.
Alpha Delta Phi: Mary Ann Kohn.
Alpha Phi: Gail A. Bracalente, Sharon L. Clanton, Patricia G. Gensler, Janet L. Verkes.
Alpha Sigma Alpha: Mary J. Brackler, Nancy A. Johnson, Barbara J. Kasper, Renee Koffmeyer, Ann J. Kraker, Eleanor R. McCarty, Lydia A. Nardone, Nancy A. Pitzer, Linda L. Salzman, Rosemarie Seidner, Meredith Williams, Judy Johnson.
Alpha Xi Delta: Linda Blumencranz, Deborah M. Kaufman, Nancy E. Kenney, Madeline L. Kosaki, Myra L. Lewis, Gloria E. O'Rourke, Robert M. Robroy, Diane L. Justice, Dall C. White, Kathryn Wall.
Chi Omega: Mary M. Callahan, Karen A. Gorman, Peggy D. Fazio, Deborah J. Kahl, Charlotte Krasner, Karen C. Kuehn, Kathleen E. Kuehn, Paula S. Madigan, Rebecca L. Wray, Sandra S. Wray, Elizabeth J. Zeman, Anna M. Mahan, Judith Schmitt, Eleanor J. Smith, Linda A. Pickett, Deborah A. Lilly.
Delta Delta Delta: Karen S. Baker, Kathleen Somers, Janice Lindstrom, Barbara J. Martin, Gail C. Smith, Julie M. Storkman, Doreen L. Gindoff, Eleanor Parsons, Evelyn J. Ruddy, Martha A. Libber, Linda E. Miller.
Delta Gamma: Wendy S. Anderson, Marilyn D. Campbell, J. Ann, Ceras, Cathy M. Kiser, Patricia S. Kiser, Ann M. Sheridan, Gail C. Smith, Julie M. Storkman, Christine S. Waack, Martha J. Wirth.
Delta Zeta: Nancy A. Brando, Barbara M. Betsch, Patricia K. Herrings, Barbara J. Palko, Joanne L. Zabel.
Gamma Phi Beta: Cynthia L. Brown, Nancy E. Christman, Debbie K. Gerli, Claire E. LeBorgne, Mary D. Miller, Norma H. Papp, Gertrude G. Peters, Adele R. Potts, Alicia C. Pratt, Shirley R. Ryan, Susan E. Ryan, Linda Sloan, Nancy Wilson, Barbara A. Waters.

Second Brooklyn Failure Heart Recipient Dies

NEW YORK (AP) — Louis Block, the world's fifth heart transplant recipient, died yesterday, 10 hours after he was given a woman's heart a little more than half the size of his heart.

A spokesman at Brooklyn's Maimonides Medical Center, where Dr. Adrian Kantrowitz, chief performer of the 8-hour-and-20-minute operation, said Kantrowitz would not discuss the transplant failure "until they get results of the post-mortem and report them to the proper medical authorities."

First reported in "reasonably satisfactory condition" immediately after the surgery—in which two major surgical steps were performed—Block's condition became critical shortly after midnight, when his blood pressure began to fall. He died a few hours later.

Officials of Maimonides attributed Block's death to "the pumping capacity of the transplanted heart and the poor condition of the lungs due to the long, low-stimulant heart bypass."

With Transplant: Block's was the fifth such operation in 37 days—and the second to end in death for Kantrowitz. On Dec. 6, Kantrowitz transplanted the heart from one infant boy to another. The boy died one day later.

Block, 57, a retired fireman who weighed 170 pounds, and had a long history of heart trouble, was given the much smaller heart of a 100-pound woman, Helen Krouch, 23, who died of a brain tumor about noon Tuesday.

Kantrowitz said Miss Krouch's heart was "rather small—about half the size we would have thought best. But he decided to go ahead with the surgery because her blood type and Block's were perfectly matched—AB-positive—that the chance of Block's body tissues rejecting the alien heart were lessened."

Immediately after surgery Tuesday night, Kantrowitz said "we have had some problems" because of the smaller size and pumping capacity of Miss Krouch's heart.

After the Pump: He said an auxiliary balloon pump was also inserted into Block's main artery to assist the small heart in maintaining blood circulation. The doctors thus performed two additional procedures in the operation.

The pump was developed by his brother, Dr. Arthur Kantrowitz, and others at Avco Corp. Cambridge, Mass.

A neighbor of Block's said the historic surgery was Block's 15th hospitalization for his heart condition, and added, "There was no other way."

And Block's heart specialist for the past 10 years, Dr. George E. Seiden, who referred Block to Kantrowitz, said: "He was quite aware that his was quite a gamble and he was very realistic about it. He was almost euphoric to think that maybe he had a chance to have a life. He didn't feel he had very much to lose."

One of Block's two sons, George, 27, said after his father's death, "If I don't know what to say... You learn from trial and error. Maybe this will help someone else to live."

Help Someone Live: Ironically, the wish to "help someone else to live" was expressed by Miss Krouch only last Saturday night, her family said, when she was being taken to the operating room.

Block's was the fifth such operation in 37 days—and the second to end in death for Kantrowitz. On Dec. 6, Kantrowitz transplanted the heart from one infant boy to another. The boy died one day later.

One of Block's two sons, George, 27, said after his father's death, "If I don't know what to say... You learn from trial and error. Maybe this will help someone else to live."

in perfect health. Her parents, Mr. and Mrs. George Krouch of East Passaic, N.J., said the family had been watching a television documentary on heart transplants Saturday when Helen—"a very sentimental girl"—turned with tears in her eyes and said, "If I ever could save someone's life with my heart I would do it. I knew I was going to die. I would like to die that way."

Krouch said everyone forgot her remark just then because "it seemed so strange at the time. I mean that she was ever thinking about death. There was nothing wrong with her."

But Monday afternoon outside the Paterson automobile sales agency where she worked, Miss Krouch collapsed, speechless. Doctors discovered a "rapidly growing" brain tumor, which took her life less than 24 hours later.

"Then I remembered what Helen had said 'Saturday night,'" said Krouch, "and I agreed right away... The rest everybody knows, I guess."

He said an auxiliary balloon pump was also inserted into Block's main artery to assist the small heart in maintaining blood circulation. The doctors thus performed two additional procedures in the operation.

The pump was developed by his brother, Dr. Arthur Kantrowitz, and others at Avco Corp. Cambridge, Mass.

Calves Act As Heart Bank?

WASHINGTON (AP) — A research project aimed at preconditioning the hearts of unborn calves for ultimate transplanting into human beings was found.

In a related development, Prof. Maurice Levi announced Wednesday in Tel Aviv that he had replaced a damaged human heart valve with one taken from a calf. The surgeon said his patient was doing "quite well."

He said an auxiliary balloon pump was also inserted into Block's main artery to assist the small heart in maintaining blood circulation. The doctors thus performed two additional procedures in the operation.

The pump was developed by his brother, Dr. Arthur Kantrowitz, and others at Avco Corp. Cambridge, Mass.
