

# **DNP-series**

## **Electrothermal Incubator**

### **(Stable Temperature)**

### **Description**

First, use of applies to health care, medicine, biology, agriculture, scientific research departments to store bacteria, biological training to carry out the necessary research facilities.

### **Features**

1. Microcomputer intelligent digital display temperature control device, with timing, setting, two measured temperatures also showed that accurate and reliable temperature control.
2. Outside the door wide selection of transparent observation window type, box items at a glance. Inner semi-circular arc corners easy to clean, adjustable shelves.
3. Electric heating by external heat type, the temperature had no value or damage to the culture of the disadvantages.
4. Liner for the stainless steel inner tank.

## Specifications

MODEL	DNP-9025A	DNP-9052A	DNP-9082A	DNP-9162A	DNP-9272A
Working size (cm)	25*25*25	35*35*41	40*40*50	50*50*65	60*60*75
power	≤150W	≤250W	≤300W	≤400W	≤600W
G.W: kg	27	45	58	85	108
N.W: kg	17	34	45	59	95
Packaging size	46*45*64	58*56*80	61*64*88	76*73*108	86*84*118
Temperature range	+5-65℃				
Temperature fluctuation	±0.5℃				
Temperature accuracy	±1℃				
Supply power	220V 50HZ
