Hello!

Below are before/after photos of the daily on-site porter service, photos from the pressure washing service that took place 5/12-5/13, and notes from our daily on-site crew. Dondia and I have been in communication with the day porters to get a better insight as to what they are seeing on the daily. Zoning the porter each day with the supplied map has helped our team to be able to focus on certain areas each day. Within these zones, the porter is working diligently to remove the debris as efficiently as possible. Their daily reporting mainly involves homeless hanging out in certain areas and some graffiti vandalism, but trash pickups has been moving smoothly. The team is still getting versed in using the app for reporting and responding to any items. Landscape crew was on site last Thursday, 5/8 for the first weekly service. They will be on site again Thursday 5/15 for the next service. **Pressure washing** took place the night of 5/12 into the morning of 5/13. A crew of 3 technicians were on site pressure washing the sidewalks and any graffiti located on unpainted surfaces. U
