

Wire Trough

When your clients need a tough, hard-working wire management system, look no further than this Wire Trough. Made from high-impact, glass-filled nylon, this injection molded wiring duct is cleverly designed to be snapped together in 8" increments to create any length of channel needed — perfect for evolving office spaces. The innovative Fold Fastening system allows the Wire Trough to be tilted in either direction for easy, frustration-free access to cabling — making maintenance and replacement of wires and cables a breeze. Enclose the channel with the Wire Trough end cap and easily guide wires and cables in any direction.

Specify:

- BD-WT-2-B Black / **List \$68** / 6" x 16"
- BD-WT-3-B Black / **List \$76** / 6" x 24"
