

MOVING FORWARD

Official newsletter From LETC at Earle C. Clements Job Corp Center

Our T-Ten Hybrid program gets a BIG UPGRADE from TOYOTA

We recently received news that Toyota has allocated 2 Highlander Hybrid SUV's to our program. These vehicles come in addition to our 2021 Prius Prime to help continue the investment in not only hybrid technology, but our students and our program.

Mercedes Benz brings new equipment and tools to Earle C. Clements

We are extremely proud to be partners with several manufacturers at our center and those partnerships continue to be fruitful for our students. Recently we were recognized as a MB Star campus and have begun receiving a host of engines, transmissions, new work stations and tool boxes to add to the Mercedes Benz program here at Earle C. Clements.

LETC NEWS

With the new year firmly on its ever forward path we look forward to the spring and summer months but remember the winter and its constant reminders that it can change our world instantly. This is the mantra that we move forward with now, our days and instructions always prepared to change and continue moving forward, hence the name of this newsletter.

This last year has marked some interesting and rewarding challenges to overcome and not just for our students, but staff also. Recently our T-ten instructors attended the annual T-ten conference virtually. This challenge like all others was met with only success in mind. After 3 days of a virtual conference we can call it exactly that. A complete success.

This last few months we have hit some very significant milestones in every program we have here at Earle C. Clements and most of them have to do with our expansion and growth. Our partners see the potential for growth and the quality of our students here so they continue to invest and help us meet the need of our students and the industry that they are joining. Continue reading to learn more!!!

*Thank
you
Earle C.
Clements*

We wanted to make sure that we recognized our fantastic home center for working with us and providing funding for our students to take their first ASE tests.

Upcoming ASE Testing:

The first Cohort of T-Ten students are preparing for their first trip to the ASE testing facility. Currently the center is still under full Covid-19 protocol with face coverings, social distancing, and sanitizing procedures, but with informed planning we can make sure our students have a safe and productive time on their trip to the ProMetrics testing center.

T-TEN PROGRAM UPDATES

Hybrid Program Update (Continued from page 1)

With the current trends going to Hybrid technology and more electrified cars, Toyota is leading the way and making sure its technology is available to the current students and future technicians at its dealerships. Toyota has been instrumental in helping build the T-Ten program at Earle C. Clements and continues with investing in the program and our students. The expected delivery of our new Highlander Hybrids is February 2022, and will arrive by the time you read our next newsletter, This adds to our current 2021 Prius Prime to make an impressive start to our Hybrid fleet. We are excited to see the finishing touches put on the Toyota Hybrid Training program and with a member of our T-Ten staff actually helping to write the final examination for the program and being on the conference calls for the curriculum development, we are invested from beginning to the end with this industry changing technology and cant wait to bring this to our students and our industry. Stay tuned for more updates on this and other exciting news from our T-Ten program and LETC family.

T-Ten Annual Conference Virtual Edition

Recently our T-ten instructors attended the annual T-ten conference digitally as well. This challenge like all others was met with only success in mind. After 3 days of a virtual conference we can call it exactly that. A complete success.

T-Ten Second Cohort

Though Covid has directly impacted the arrival of new students on center we are very proud to announce that we have started the second cohort of T-Ten students and look forward to updating you on their progress as the months go by.

MERCEDES BENZ PROGRAM UPDATES

Mercedes-Benz

Snap-on tools donated by Mercedes Benz

Pictured: Cody Johnson and Darrien Noriega check over the new tools and engines

Pictured: Rajanajoy Gregory-Smith gets familiar with the newest MB offerings

Recently Mercedes upgraded our program to MB Campus from MB Star Connect, their post secondary school college level designation.

The MB Campus accreditation that we received also comes with some amazing upgrades from Mercedes Benz to benefit our students. Pictured to the left you will see some of the amazing recent additions we have had the pleasure of adding to our program. Mercedes Benz sent tools, new boxes, work stations and several engines and transmissions to add to their already impressive offering here at Earle C. Clements. If you want to learn more and get your hands on, give us a call or drop us an email.

HEAVY DUTY DIESEL PROGRAM UPDATES

Exciting things happening in the Medium Heavy program here at Earle C .Clements Job Corp center. We Have received a TEXA Diesel Laptop system to use for various diagnostic applications. The TEXA Diesel laptop has far more diagnostic capabilities than a standard scan tool and is able to run system tests and also adjust parameters in the truck onboard diagnostic system. This tool is just one example of some of the amazing tools in our ever growing Heavy Duty Diesel Technology program.

Desktop Launcher

The [Diesel Laptops Desktop Launcher](#) is the quickest and easiest way to access, learn about, or get support for all the software on your dealer level diagnostic kit and it is fully integrated into TEXA's IDC5 Software.

Groundbreaking Truck Software

View live data and OEM flash codes, access built-in troubleshooting information and wiring diagrams, and perform bi-directional commands with a lifetime TEXA IDC5 Truck license.

KnowledgeBase

Another product you will only find from Diesel Laptops! This program puts access to tens of thousands of PDFs in your hands when you need them. This includes step-by-step PDF guides, wiring diagrams, remove and replace instructions, and much more. This software program covers both Truck and Off Highway.

Exclusive Repair Information

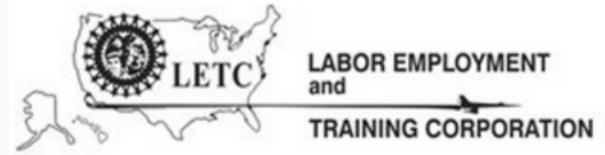

This kit includes DTC Solutions Off-highway Edition. This is the world's first and only off-highway repair information program. Troubleshoot codes with detailed step-by-step repair information and wiring diagrams.

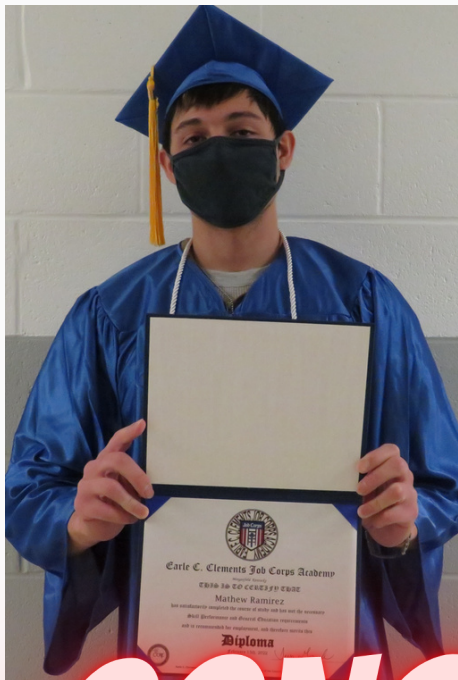

ISSUE 3 MARCH 2022
