UAW-LETC Student Recognized By National Job Corps Association

Morganfield, Ky.

Ricky Smith was a former student here at UAW-LETC that truly left a mark on the student body and the Job Corps Community here at Earle C. Clements. He was president of the Student Government Association and a student in the Toyota T-Ten program. Ricky was recently recognized by the National Job Corps Association on Facebook and we are so proud of him. He is currently employed at his hometown Toyota dealership in Alabama. WAY TO GO RICKY!

Visitors to LETC

It was a tremendous blessing to have so many visitors that wanted to see our program and put a picture to all of the good things that they have been hearing about our program. We work so hard here to make our program and students shine and get the recognition that they deserve. Pictured below we have arranged some photographs to recognize some of the wonderful people that have visited us and left a lasting impression to say the least.

Department of Labor

The Philadelphia Regional Job Corps office visited the center for the first time since the pandemic started and toured our facilities. We were so happy with all of the positive comments and inspirational words from Dr. Francis S. Cole Ph.D. (pictured in blue below). Dr. Cole has been a believer and advocate for our program for many years and we were thrilled to have him with us. We hope Dr. Cole and the regional assessment team that he brought with him come back soon, we were blessed and thrilled to have him and hope that he knows it!!

Our success wouldn't be possible without the staff at MTC making the training center a home for the students. We were happy to host several MTC corporate personnel here and give them a tour of our "immaculate" facilities. We received so many positive comments about our staff, center and facilities that we are still beaming with pride.

Visitors to LETC

Physical security team

The safety and security of our students and our center are one of the most important aspects of daily life here at Earle C. Clements Job Corps Academy and the government always brings the best people to make that happen. After a day full of fire drill and equipment testing we were afforded the opportunity to meet the team that was assembled to test and check all of our security and safety systems. The amount of changes and upgrades that were done in such a short period of time were amazing and the professionalism of these guys is second to none. It truly was our pleasure to meet and talk with everyone and when we hear it was the highlight of their trip to see our shops we can't help but to feel blessed.

Advisory Council

Part of running a successful training program is to be heavily connected with the industry that you are training for and engage with them on their needs and the current trends and focus points needed to make the technicians that the dealership desires. We recently returned to our advisory councils being in person and had some industry reps come for our council meeting. It was great to see everyone and get the feeling of positive and in-person engagement going again.

Huge Thanks to Chris Townsend from Watermark Toyota, Gary Lehner from Kenny Kent Toyota, Grant Jones from Snap-on Tools and Eric Sellers from O'reilly Auto Parts. See you at the Next one guys!

EARLE C CLEMENTS CENTER UPDATES

Security and camera updates completed

MTC and the Department of Labor have consistently worked together to maintain our facilities and have worked double hard to bring our wonderful center into the 21st century. This center has a very long and storied history and deserves to be brought forward and given the opportunity to find its place in the future. Thanks to MTC and the Department of Labor we have!

The safety and security of our students and our center are some of the most important aspects of daily life here at Earle C. Clements Job Corps Academy. We do everything in our control to ensure that the students here have a safe and rewarding place to call home. Over the last several months our center has been undergoing an infrastructure upgrade to our security systems and with the job finally complete we are one step closer to making sure that the environment here is safe and enriching for everyone that comes in. We wanted to take a minute here and say Thank you to the entire team that upgraded our systems and always works their hardest to help us maintain a safe and inclusive environment for everyone.

Rising to the Top! 26th in the nation

Our recent center rating came in and we are beyond happy with the results. Earle C. Clements made a huge rise in the standing going up 35 spots from finishing 61st to finishing 26th in the nation.

Our center director Mrs. Gough says "This change shows our continued dedication, commitment, and loyalty to our center and students." Our efforts are paying off and we truly are RISING TO THE TOP!!

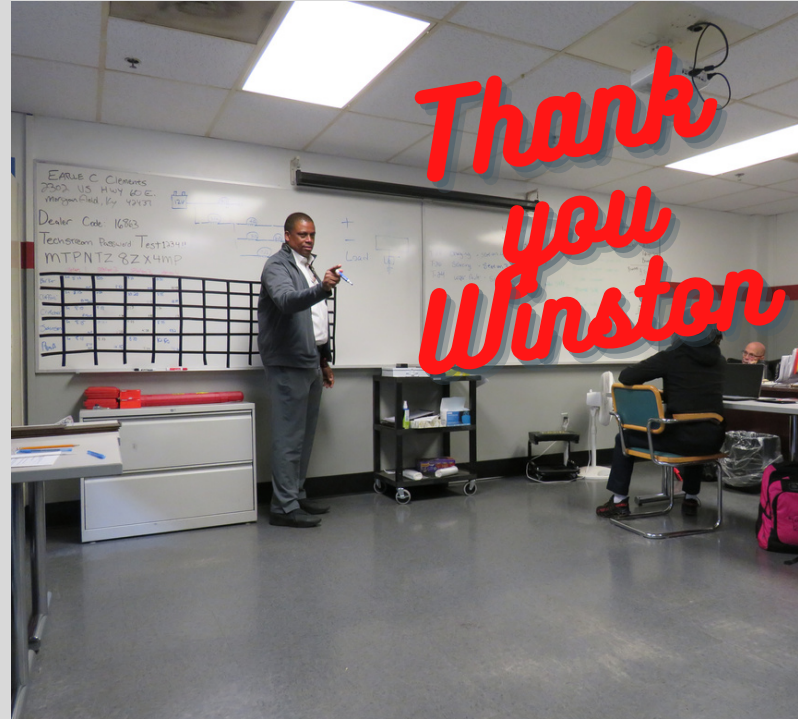

T-TEN PROGRAM UPDATES

TOYOTA • LEXUS
Technician
Development

Field Manager Visit from T-Ten Plano, Texas

This month we were so excited to welcome Winston Morgan from Toyota Hq in Plano, Tx. Winston is a T-Ten field manager and assists schools in logistics, curriculum, dealers needs, recruiting, and so much more. He was making his first visit to our school and our new T-Ten program. We look forward to our future visits with Winston and want to thank him for the time he took with our students and all of the wisdom he shared with our students.

T-Ten Third Cohort Shirt Event

Our third Cohort for the T-Ten Program recently went through our own small shirt ceremony. It signifies the student is fully accepted into the program and gives them pride in knowing they are of a very select few on center that get to wear the Toyota red shirt for trade.

Mercedes Student Austine Dennis Gives Commencement Speech at Earle C. Clements Job Corps

Earle C. Clements Job Corps.

This graduation ceremony at Earle C. Clements Job Corps was especially memorable for us here at UAW. It not only has the distinction of being the first post pandemic ceremony , but also we were fortunate enough to have one of our star pupils graduate from our program and be selected to give the commencement speech to the graduating class. It was a tremendous point of pride for us to see Austine up on the stage and deliver his address to the staff and graduating students. Austine's performance while enrolled here was nothing short of amazing and we wish the best for him!!

Instructor Training

MB Campus recently provided instructor training on Intermediate Electrical. MB Instructor, Mr. Eric Paige, gave our staff an in depth training session on Mercedes Benz electrical systems. This information is not only valuable to us, but gives us a bigger and better understanding for our own students. We wanted to give our thanks to MB and Mr. Paige!!!

Mercedes-Benz got new shirts!!!

EPA 609 Recipients

Congratulations to the students below for completing the EPA 609 refrigerant certification exam and obtaining an EPA 609 license

- Austine Dennis
- Anthony Johnson
- Ayoub Adam
- Devotie Brown

HEAVY DUTY TRUCK PROGRAM UPDATES

Pictured above; Student Jalen Neal installs new rear brake shoes on a trailer belonging to the center.

Part of our heavy truck program is dedicated to keeping the heavy trucks belonging to our center in tip top shape. Doing this affords the opportunity for our Heavy Truck students to get real world experience with OTR diesel rigs. This invaluable training stretches from basic PMI all the way to advanced pollution control and emissions management so we can be sure to get the student ready for almost any maintenance requirement they can run into at a diesel shop.

Our heavy truck program has been undergoing some modernization as of late and we are excited to offer even more. Previously we partnered with Diesel Laptops to make sure that we could talk to the vehicles, now our Heavy Truck program is testing new service information providers to make a decision moving forward with a vendor for the heavy truck program. Quality service information is paramount to performing quality work to modern machines and we only want our students to have the best service information available for them. We will make sure to keep you updated on what we choose for the future, but for now wish us luck!!

Congratulations to the students below for completing the EPA 609 refrigerant certification exam and obtaining an EPA 609 license

- Anthony Limardo**
- Jalen Neal**
- Joshua Harris**
- Josue De Leon Navas**

LETC ANNOUNCEMENTS

Official Newsletter From LETC at Earle C. Clements

Greetings Kentucky LETC staff!

I am told that the Philadelphia Region assessment went very well. There was a flood of positive comments about our LETC program. The reviewers were particularly impressed with our Toyota and Mercedes programs. They also raved about the appearance and behavior of our students and the cleanliness/neatness of our facilities. They made a point of commenting on the engagement of our staff with students and the professionalism they exhibited.

Thank you all so much for representing LETC in such a positive way. While we always hope that our program is impressive to visitors and center leadership, we are particularly pleased when we hear these comments from representatives of the Department of Labor.

THANK YOU
all for making us proud!!

Ed Schaniel, President/CEO
