

OUR MAIN *GOAL:*

TRAINING: ALL 8 ASE AREAS

- A1 - Engine Repair
- A2- Automatic Transmissions
- A3- Manual transmissions
- A4- Steering and Suspension
- A5- Brakes
- A6- Electrical
- A7- Hvac
- A8- Engine Performance

TESTING

After completing the training in the perspective course, the student will cap the class off with taking an ASE test for that subject. We have a great success rate for ASE tests, call us to hear our current rate.

PLACEMENT

Our in house placement team will work with the student to secure employment before departing the program and during internship. We always consider where the student is coming from and contact local to home dealerships for the student to make the process easy and help get them started right!

TOYOTA

OUR INDUSTRY PARTNERSHIPS

Toyota Motors North America and the T-Ten community have been instrumental in the success of our program and their contribution has been amazing. From standing our program up to the program we have now that have supported us in every way they can. Toyota believes in creating the next master technicians from the ground up through proven teaching methods and facilitating an environment for technician growth and development.

ABOUT OUR FACILITIES

BUILDING 607

Building 607 is our main Toyota facility and houses 2 classrooms, 14 lifts, 2 alignment racks, 4 tire machines, and all of our dealer specific specialty tools

ENGINE AND TRANSMISSION LABS

Building 606 is our main building and houses our engine and transmission tear down and reassembly labs. These labs ensure that each student gets their own hands on experience with these components and gets the entire experience.

OUR CURRICULUM

TOYOTA T-TEN

The Toyota T-Ten program is an advanced college level automotive technology course and gives a very indepth and complete eduaction on todays Toyota vehicles.

This program coupled with the required internships at a Toyota or a Lexus dealer covers all 8 ASE Master Technician courses of study. This program is intended to give tomorrows Master Diagnostic Technicians their start in a comprehensive and rewarding environment splitting the classwork with shop work for the duration of the program.

This program has everything for the student that wants the college automotive technology experience while also providing the hands-on that hones the skill set and applies the theory in a tactile manner. Truly the best of both worlds.
