

Cedar Lake Conservation Club

Maple Lake – Annandale, MN

July, 2013

President's Letter *by Mike Hankee*

Hello to all,

The warm weather has finally arrived and the lake activities are in full swing. **Did you know that this year's ice out date was May 1, making it the latest ice out date since the CLCC started keeping records in 1955? Wow!**

Our Water Quality Committee has been very busy. **Once again, the CLCC was awarded Grant Funds to help treat Curly Leaf Pondweed and Eurasian Milfoil this year.** Please be careful to stay out of weedy areas on the lake in an effort to not spread the Curly Leaf and Eurasian Milfoil around. These areas are usually in the 0-10 foot deep areas. **Think at least 10 ft deep water as a safe area to cruise around the lake.** Please check your prop for weeds and make sure you are weed-free if you go through a weedy area.

Also, because of the high water, please consider keeping a 300 foot no wake zone as you travel around the lake and please conduct your jet skiing, water skiing and wake boarding in the deeper parts of the lake.

The new PO6 Enhancement project that we have been talking about for the past year is still in the planning stages. For more complete information on our water quality issues see the Water Quality Article on page 6. Thanks again to Orv and Kathy Jonsrud for their hard work.

Please watch out for all the baby loons and their parents on the lake. We had a great year for baby loons. We believe there are four pairs of loons on the lake having a total of five babies. Unfortunately one baby washed up on shore near Leslie Kreutter's home after one of

the late June storms. Thanks to Paul Schutte, Glenn Baird and Dean Nicholson for managing and storing the loon buoys.

I was delighted to see a growing number of people from our lake getting involved with efforts to learn more about establishing native gardens along the shoreline. The April 27th native shoreline and rain garden class was well attended as was the native garden plant sale and tour on June 8th. A big thank you to Cheryl Wold for all her work and planning these events.

Get ready for the Annual CLCC Picnic and Band on the Barge! This event will again be held at Camp Courage on August 24th at 12PM followed by a band on a barge playing at the sandbar. Read more about it on page 2.

Don't forget the Annual Membership Meeting which will be held at Corrina Township Hall on September 21st at 9AM. There will be a business update, a review of our finances, Board of Director elections and time for questions. Following the Annual Meeting will be the CLCC Board of Directors Meeting. Your attendance and input is encouraged.

The CLCC is always looking for new board members and committee members. Is it your time to step up and get involved? If you're ready please email me at mlhankee@lakedalelink.net and let's get started.

The newsletter has expanded! You'll see a few more pages dedicated to local businesses that support the CLCC. Please consider supporting them if you need services they offer.

Enjoy yourself on the lake this summer, consider a native shoreline garden, help your neighbor when you can and respect the lake!

Mike Hankee

CEDAR LAKE CONSERVATION CLUB

In This Issue:

- Celebrating 60 years as a lake association
- Enjoy the Annual Picnic and Music on the Water August 24th
- New Loons!
- Lakeshore improvement efforts
- Possible Addition to P06 Water Quality Project
- Don't forget your dues!
- July 4th Fun
- Support local businesses that support CLCC (see ads inside)

Stay abreast of breaking news – visit www.cedarlakecc.org for the latest updates.

Do you enjoy reading about the activities on the lake? This publication is sent to every Cedar Lake property owner. If you don't belong to CLCC, please consider joining to support this newsletter and other CLCC activities.

Cedar Lake Conservation Club

CLCC 60th Anniversary

Help celebrate our 60th anniversary by sharing your Cedar Lake experiences.

We're having a picture display of photos at our annual summer picnic. Your daughter's first fish. Grandpa's 90th birthday party. Your boat decorated for the Fourth of July parade, and any other memorable moment on the lake. It would be great to have two or three photos from each family. Prizes will be given!

To enter, send COPIES with your name and address on the back. Then, put the photo in a zip lock baggie with a brief description and send them to Cathy Campbell (7201 Bristol Circle, Edina, 55435) or Diane Salls (7992 Irvine Ave NW, Annandale, 55302). **Please send them by August 15th.**

We are also looking for information on the history of the area. Do you remember the Candy Castle and Brown's ice cream in Annandale? How many resorts were on Cedar Lake? Who owned the original farms around the lake? Any early weed or water problems? Lake neighbor experiences? There's a lot of information that the rest of us would be interested in. Inquiring minds want to know. **HELP US CELEBRATE!!**

Native Shoreline Activity on Cedar *By Cheryl Wold*

It's been a busy season for Cedar Lake residents working on native shoreline projects. The CLCC hosted two successful events to promote and encourage shoreline restoration.

In April, Karen Terry from the University of Minnesota Shoreline Education Program led a workshop helping property owners design shoreline projects for their site. Participants left with a plan in hand and valuable resource materials. We held a native plant sale and a tour of

Cedar Lake homes with native shoreline plantings in June. It was a great opportunity to purchase healthy and inexpensive native plants. The tour gave people the chance to see existing shoreline buffers and what can be done. We saw differences in terrain, site usage, plant selection and planting techniques. Thanks to the Hankee's, Glass's, Wold's and Motzko's for sharing their shoreline experiences. Native

shoreline buffers provide many benefits to our lake. They help filter out pollutants, capture run-off, and can prevent shoreline erosion. The beautiful array of foliage and flowers provide good habitat for birds, butterflies and bees. So if you have a beach, a lawn up to the lakeshore, or other runoff or erosion challenges, please consider adding a native shoreline buffer area to your property!

Annual CLCC Picnic & Music on the Water **Saturday, August 24, 2013**

This will be the third year that CLCC is hosting the annual picnic. Once again, the event will be held at Camp Courage, from noon until 2:00. There is ample parking at Camp Courage (off County Road 7) and limited parking for boats. All members, their families, and guests are welcome. If you have paid your 2013 dues, the event is free of charge. All others will be charged a nominal fee for lunch.

The picnic lunch will be catered by the popular Cottage Gourmets, and will include beef brisket, salad, chips, lemonade and dessert. Games, raffles, information on CLCC activities and CLCC merchandise will also be part of the festive activities.

Following the picnic, everyone is invited to the sandbar to listen to music on the water with a band that is sponsored by Dingmann Marine & More. Come to the sandbar and meet new lake people, enjoy the weather, and just relax to the music.

If you have any questions or are interested in volunteering for the event, please contact Cathi Gabriel at 651-253-2675. Hope to see you at the picnic and the sandbar.

Fourth of July on Cedar Lake *By Bill Arendt*

What a wonderful day was had by all! Picture perfect weather brought many people to the lake to celebrate the holiday. The people on shore were treated to the longest boat parade in years! Many docks also displayed a patriotic spirit, with the judges declaring everyone winners, even though there were four who were singled out:

- Most Patriotic - Glenn & Liz Baird
- Most Enthusiatic - Steve Sorenson
- Most Creative - Bakken Family
- Best Decorated Dock/Shoreline - Glass Family

The Bakken Family

See p. 3 and visit the CLCC website (cedarlakecc.org) for more pictures from the 4th

CLCC COMMITTEE UPDATES

Membership Committee

By Bill Arendt

The Membership Committee encourages member involvement, using the newsletter, website, Lake Directory and all CLCC committee activities. In 2012, the CLCC membership reached a record 189 (78%) out of 242 property owners. We are slightly behind this year, but remain optimistic that the late spring delayed some members from coming to the lake and remembering to pay their dues.

Mary Ellen Wells is the editor of the newsletter that is published three times each year (April, July & November). We have added advertisers to help offset the cost of printing and mailing the newsletter—check out the ads, and please try to support these local businesses.

We also post lots of information on our website and use e-mail notices to all members who have given their addresses. These are popular ways to keep members informed of important news and activities that occur between publications of the newsletter. Mark Trostad is our web master and email guru, doing a great job! If we do not have your current e-mail address, please let us know so that all members can stay informed.

UPDATED LAKE DIRECTORY The Lake Directory is updated every two years. This lists all homeowners in alphabetical order and also by geographic location. CLCC members have told us that this directory is a great value and it is only sent to CLCC members who have paid their 2013 dues. If you would like to receive this directory and have not paid your dues, please send a check (see last page of this newsletter) or pay on-line using Pay-Pal on our website (www.cedarlakecc.org).

AIS Monitoring at Schroeder Park *By Bobby Ebert*

This year, the CLCC team implemented a new program by partnering with Schroeder Park through the jurisdiction of Marc Mattice, Wright County Parks Administrator. Marc, Bobby Ebert, and others of the CLCC Board hired a young college student, Mark Sandquist, to monitor the boats launching at the Schroeder Park landing; the DNR does not monitor this landing and focuses their attention on the CR6 landing. Mark continues to be present at Schroeder Park's landing primarily on weekends from May 25 until August 18. He has been an asset and our ally; we appreciate his hard work and dedication.

The statistics are interesting. 50 boats were polled on Saturday and Sunday from May 25th-June 23rd. Thus far, the boats are reported in good condition as they enter and leave the lake. The visitors are primarily fishing boats (31), runabouts (12), and pontoons (5) and travel an average of 20 miles to come to the lake; 22 of the 50 boats originated from Wright County. The boat operators have been cooperative, friendly, and conscientious to have their boats and trailers free of weeds. The primary concern is having the plug in the boat or water in live well, which Mark helps them correct before entering our waters.

This is a worthwhile endeavor to further protect our lake. We thank all those involved in making this happen!

CLCC COMMITTEE UPDATES

Fish and Wildlife Conservation

By Paul Schutte

Our Loons This year we were very fortunate to have three successful nesting pairs of Loons on Cedar Lake. On June 19th the pair on the sand bar hatched out two chicks on one of our loon nesting platforms. Unfortunately a chick was found dead on the south end of the lake after the big storm on June 20th. The second pair nested in the southeast channel of the lake on natural vegetation resulting in one chick. The third pair nested in the Camp Courage Bay on natural vegetation, and hatched out two chicks. There appears to be a fourth couple with no babies that is hanging out in the northeast corner. While you enjoy the lake, we ask you to keep your distance from the parents as they raise their young.

Purple Martins This year Purple Martin Landlords on the lake could see a banner year of young being born from their colonies. It appears that from the reports I have received, we have more units being occupied than ever before! At one of our public locations, Schroeder Park is currently hosting 14 nests with 36 eggs and 40 chicks in the T-14 housing. At our other public T-14 location, Camp Courage and is currently hosting 12 nests with 20 eggs and 25 chicks. This is the first year this location has been occupied!! Surprisingly, we have not lost any birds due to weather so far. This could be our biggest number of fledged birds on our lake!!

These birds have been on a decline for the past 40 years but now appear to be holding at a steady population because of the many people who are committing to be great landlords for Purple Martins! Take a moment to view these beautiful birds by checking the lake tour map out at our web site for colony locations. If you have interest in starting a colony at your location, feel free to contact me.

Pelicans and Cormorants Wondering why you are seeing more Pelicans and Cormorants this year around Cedar Lake? This past winter, Swartout Lake (a shallow lake south of Hwy 55) froze out leaving that lake without food for these birds. Pelicans and Cormorants spend much of their time on some of these shallow lakes in the area feeding on fish and just loafing. Cedar Lake offers only a minimum amount of shallow water for them so it would not be their first choice to spend allot of time here. It should also be noted that there has been an increase in Pelicans and Cormorants throughout the state.

Walleye Stocking The funding for stocking beyond the DNR efforts comes from raffles/donations and with the Visionary Donations through CLCC. Last fall we stocked 5,000 walleye fingerlings!! The DNR will be stocking this fall and we will be planning for stocking in the fall of 2014. Look for our special raffles at our summer picnic on August 24th. Remember, any donations are always accepted

and are tax deductible. Consider a contribution to the Visionary Fund (see p. 7).

Members of CLCC have worked very hard to keep our lake one of the finest in the area, not only for quality fishing, but as the host to many species of birds, animals, reptiles, insects and native plants. We will continue to work closely with the DNR to help make good management decisions for our lake. With everyone practicing good stewardship and working hard to protect our water quality, all of these will be here for us to enjoy in the future.

Fishing Contest You still have plenty of time to register that Lunker! Take that fish over to Dean Nicholson's, at 8979 Iresfeld Ave NW and have it weighed in. (North side of the lake near Schroeder Park) You could be eligible for prizes that will be given out at our Summer Picnic at Camp Courage on August 24th.

The contest will run thru the 19th of August. We encourage kids to enter the contest. Any species of fish is eligible. So grab that fishing pole, go wet a line, and it might just win!

Identifying AIS

By Kathy Jonsrud

We have some new tools and services to identify and control Curly Leaf Pondweed (CLP) and Eurasian Water Milfoil (EWM). **ASK ME!** A new CLCC campaign that not only provides a reminder to always be on the look-out for aquatic invasive species, but identifies a lake neighbor who can help! About 12

members of the Board and Water Quality Committee have offered to "fly the flag" on their watercraft or dock to let you know they can help identify an invasive species. If they are not able to help, they will connect you with someone who can. So watch for the bright green flag and be on the look-out for CLP and EWM!

Aquatic Invasive Species (AIS) Website Hotspot

The CLCC website has a hot-spot to answer AIS questions. There is a link to email for help if you think you have an invasive species. There is lots of other good information, including pictures of curly leaf pondweed and Eurasian Water Milfoil. Check it out at www.cedarlakecc.org - "AIS HOT SPOT"

CLCC COMMITTEE UPDATES

Water Quality Committee *By Kathy Jonsrud*

2013 Vegetation Mapping Every three years, we conduct a total vegetation mapping on our lake. This is not only a required activity by the DNR, but an important tool to understand the impact and effectiveness of our AIS treatment. We received three bids for the treatment and the project was awarded to Wenck and Associates at a cost of \$4,000. The vegetation mapping is extensive and precise using GPS technology which is shared with the DNR and our AIS treatment vendor (Professional Lake and Land Management). There are two steps to the mapping project: the first mapping was in late May and the second will be in late July.

DNR Grants Approved Once again, CLCC received DNR grants to help treat Aquatic Invasive Species. This is very good news indeed! The CLCC, through years of networking and leadership, is recognized as an active association with a long history of lake stewardship. The grants, for up to \$3,250 depending on the amount treated, will help toward the expense of controlling curly leaf pondweed (CLP) and Eurasian Water Milfoil (EWM).

Eurasian Water Milfoil (EWM) Treatment Another piece of good news is that we have limited EWM to treat this year. The patch on the north side that has been treated for two years has really been knocked down. Our permit to treat is for only 1.5

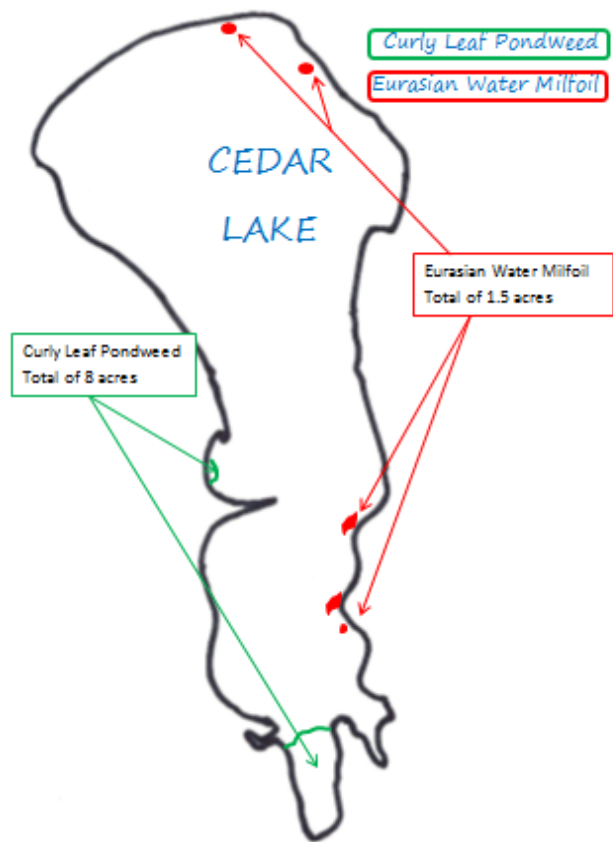

acres this year. Treatment will be completed in July. Last year we treated 22 acres. Everyone must be on the look-out for EWM. I know in our bay we see an occasional plant which is quickly harvested. Correct identification of EWM is critical; the invasive

[Eurasian water milfoil](#) typically has 12 to 21 pairs of leaflets. The non-invasive native [northern water milfoil](#) is often mistaken for EWM. We have lots of Northern, which has only 5 to 9 pairs of leaflets. Do you think you have EWM? Please check out the AIS Hot Spot on our website (click on the black bar towards the top) for more information and assistance. http://cedarlakeecc.org/AIS_Hot_Spot.php

Curly Leaf Pondweed (CLP) The DNR gave CLCC a permit for treating eight acres this year. The cost was \$4,476. Because of the treatment resistance of the CLP on the south side over the past several years, we worked with our vendor and the DNR to try a newer chemical - Clearcast. Unfortunately, the CLP treatment this year was not effective.

Though Clearcast was effective on some lakes, our vendor believes Cedar was a bit cooler and the lake was still "rolling" so the chemical did not have a chance to work. Though this is disappointing, in the whole scheme of our long term strategy, this is a minor set-back. Our vendor stands behind our contract and will reimburse for 100% of the 2013 CLP treatment costs. The detailed 2013 vegetation mapping indicates some new areas of CLP that may be candidates for the 2014 treatment. Also, we are evaluating alternate permitting strategies that will allow our vendor for greater flexibility.

2013 AQUATIC INVASIVE SPECIES TREATMENT as of July 2013

DNR Inspections on Cedar and New Laws As serious lake people know, there is not a magic bullet to prevent aquatic invasive species from entering our lake. Education is the key! Once again this year we will have DNR staffing inspections on CTY RD 6. Cedar is scheduled for 54 hours of inspections which started the second week in July.

Laws in effect to help fight invasives:

- Boaters will be subject to mandatory roadside check stations for invasive species inspections.
- Fines for those caught violating the invasive species laws range from \$100 to \$500.
- Lifts, docks, swim rafts, etc. that are removed from any water body may not be placed in another water body for at least 21 days, to kill invasive species that might be attached.

CLCC COMMITTEE UPDATES

Water Quality from p. 6

Boaters are required by law to:

- CLEAN VISIBLE AQUATIC plants, zebra mussels, and other prohibited species off watercraft, trailers, and equipment before leaving any water access.
- DRAIN WATER FROM the boat's bilge, live well, motor, ballast tanks and portable bait containers before leaving any water access or shoreline property.
- KEEP DRAIN PLUGS out and water draining devices open while transporting watercraft. This includes pontoon plugs that are reasonably accessible.

Help your friends and family who visit Cedar to remember these laws and the importance of a clean launch on our lake!

PO6 Project Enhancements—Legacy Grant for \$277,900 Awarded In 2012, the CLCC Board of Directors asked the Water Quality Committee to evaluate the effectiveness of the Clearwater River Watershed District (CRWD) PO6 project. This was the project started in 2006 to reduce phosphorus and carp population in Cedar Lake (check out www.crw.org for more details about PO6). For most of 2012, the Water Quality Committee worked closely with the CRWD staff to gather facts and data about the project's results and anticipated future success. As a result, two additional projects have been recommended to "slow down" the water runoff during heavy rain falls—one on East Swartout and the other on the south side of Cedar. In January of 2013, the CRWD received a \$277,900 grant from the Legacy Funds for these two efforts. The estimated total cost of the projects is \$554,000. Discussions and evaluation of the projects has been active this spring and early summer. Optimal designs for the projects are being evaluated. As of this writing, the project on the east - a V-Notch wier with iron/sand filters - continues to be the best option. For the project south of Cedar, a type of man-made wetland with filters is emerging as the most effective.

With the legacy grant off-set, the estimated cost to a lake shore owner on Cedar would be \$500-\$600, which, if the project is approved, could be paid as a lump sum or over a period of years. If the project moves forward, construction would begin in 2014.

Your CLCC Water Quality Committee and Board of Directors have researched this project thoroughly, asked many questions of CRWD, and attended countless meetings to fully understand the costs and benefits of the proposed enhancements. At the April 2013 Board of Directors meeting, the CLCC voted to support the PO6 project enhancements. Also, to encourage thoughtful use of all the resources available, the Board voted to contribute \$10,000 of the CLCC Water Quality Fund if the projects are ultimately approved.

The Cedar Lake Visionary Fund is a great way to donate to the CLCC. Your contributions will be directed to the fund of your choice. CLCC is a 501-C(3) tax exempt organization, so your donations are tax deductible. For 2012, we had 54 members donate \$7,800. The current funds are: General, Walleye Stocking and Water Quality.

Payments can be made either by check or very conveniently by using Pay Pal. The CLCC website (www.cedarlakeecc.org) has a tab for donating electronically. The newest visionaries since the last publication of the newsletter are:

SILVER: (up to \$99):

Bob & Gerrie Miner
 Jim Domian (sustaining)
 Scott & Christine Nelson (sustaining)
 Christa Larson/Lane
 Leslie Kreutter (sustaining)
 Karl & Mary Leslie
 Ken & Kathy Kotzer
 John & Karen Kroll
 Dan & Julie Flynn
 Glenn & Shirley Baillie

GOLD: (\$100 to \$499)

Darren & Andrea Heairet
 Tony & Jean Hoholik (sustaining)
 Bob & Cheryl Norman
 Diane Salls
 Brett & Mary Bergeron (sustaining)
 Jean & Ed Skomoroh
 Warren & Wendy Watson
 Larry & Melanie Kramer (sustaining)
 Tim & Mary Nantell (sustaining)
 Rick & Tammy Nelson (sustaining)

PLATINUM: (\$500 to \$999)

LIFETIME: (\$1,000 plus)

Dan & Jan Usset (sustaining)

Once you have reached a higher visionary category with multiple donations, you will be recognized in that higher category and "sustaining" will be added if you give each year. Please support this program by donating to the fund of your choice.

If you have any questions or for further information, contact Bill Arendt at 320-274-2422 or wfa12345@aol.com.

What's Next? The CRWD is still evaluating the design options. It will be making the final decision on whether to pursue this project and how to fund the balance remaining after the Legacy grant. There will be public hearings and many meetings before decisions are made so watch your mail, email, and check out the website www.cedarlakeecc.org for the latest. Engage and let your voice be heard!
