

WELCOME TO BEAUTIFUL CEDAR LAKE

We hope you have fun and enjoy your stay.

Schroeder Park
Kids Don't Float Station

Here are a couple of news items:

Stop Aquatic Invasive Species! Please check your watercraft and trailer before launching. Have you been to a lake in the last 5 days? **Please consider doing a free decontamination before launching in Cedar.** The decontamination station is just a few miles south of Schroeder off of HWY 55.

WHERE: 1300 Business Blvd, Annandale (north on Annandale Blvd off of HWY 55)

Watch for Wright Co Watercraft Inspection signs.

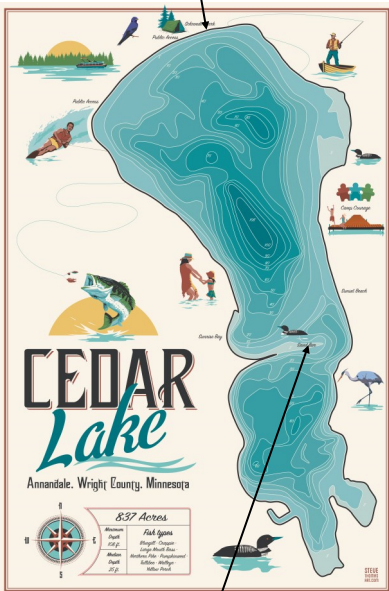

WHEN: Seven days a week, sunup to sundown

HOW LONG DOES IT TAKE?: Smaller boats about 10 minutes, larger vessels 20-30 minutes.

When you leave—please clean, drain, and dry. Be part of the solution!

To help reduce erosion, we ask for a **voluntary practice of a “no-wake”** when you are **close to shore**—at least 150 feet from shore. A “no-wake” for most water crafts is the slowest speed possible to navigate.

Sandbar

Go slow
and to the
east

Kids Don't Float | Free loaner life jackets

Are you short a life jacket? On the north side of the lake at Schroder Park is a Kids Don't Float life jacket station. There are jackets of all sizes—including adult—on loan for free. Just use and return!

Don't take a chance! Be safe and have fun!

Cedar Lake does have **Eurasian Water Milfoil**. It can be spread by water craft propeller cutting. **When possible, ski and tube in water deeper than 12 feet to reduce the chance of spreading the invasive Eurasian.**

Cedar Lake is infested with zebra mussels. If you launch a watercraft while you are here, please do a free hot water decontamination at the station in Annandale before launching in another lake. See information above regarding the station at 1300 Business Blvd.

We have **several pairs of nesting loons**. Some of the nesting areas are posted with buoys. Marvel and enjoy, but please stay at least 100 feet away.
